as well as entering into sharp critical debate with him this book sets out to examine the value and the potential of a theodramatic conception of history By engaging in dialogue not only with theologians and philosophers like von Balthasar Hegel and Barth but with poets and dramatists such as the Greek tragedians Shakespeare and Gerard Manley Hopkins the book makes its theological principles open and indebted to literary forms and seeks to show how such a theology might be applied to a world intrinsically and thoroughly historical By contrast with theologies that stand back from the contingencies of history and so fight shy of the uncertainties and openness of Christian existence this book's theology is committed to taking seriously the God who works in time

Rethinking Order Nancy Cartwright, Keith Ward, 2016-06-30 This book presents a radical new picture of natural order The Newtonian idea of a cosmos ruled by universal and exceptionless laws has been superseded replaced by a conception of nature as a realm of diverse powers potencies and dispositions a dappled world There is order in nature but it is more local diverse piecemeal open and emergent than Newton imagined In each chapter expert authors expound the historical context of the idea of laws of nature and explore the diverse sorts of order actually presupposed by work in physics biology and the social sciences They consider how human freedom might be understood and explore how Newton's idea of a universal designer might be revised in this new context They argue that there is not one unified totalizing program of science aiming at the completion of one closed causal system We live in an ordered universe but we need to rethink the classical idea of the laws of nature in a more dynamic and creatively diverse way

The Americana, 1911 **A History of Reasonableness** Rick Kennedy, 2004 A defense of the social operation of thinking with an emphasis on testimony and authority This book describes a lost tradition that can be called reasonableness The tradition began with Aristotle was recommended to Western education by Augustine flourished in the schools of the Renaissance through the nineteenth century then got lost in the academic and philosophic shuffles of the twentieth century Representative of the tradition is John Locke's story of a King of Siam who rejected reports of the existence of ice The King would have had to risk too much trust in another man whom he did not know too well a Dutch ambassador in order to believe that elephants could walk on cold water John Locke presented the story to encourage his readers to think about their responsibilities and risks entailed in what he called the gentle and fair ways of information The art of thinking is largely social Popular textbook writers such as Quintilian Boethius Philipp Melancthon John of St Thomas Antoine Arnauld Thomas Reid Isaac Watts Richard Whately William Hamilton L Susan Stebbings and Max Black taught strategies of belief trust assent and even submission as part of reasonableness For over two thousand years testimony and authority were at the center of lively discussions about teaching the art of thinking In the twentieth century the tradition faltered largely due to Immanuel Kant's insistence that there should be no distinction between handling testimony and personal experience This book recounts the history of a lively educational tradition and hopes to encourage its revival Rick Kennedy whose previous books and articles have been about Colonial American logic mathematics and science is Professor of History at Point Loma Nazarene

Robert M. Doran, S.J., 1990-06-01 In this challenging work Robert M Doran explores the basis of systematic theology in consciousness and goes on to consider the practical role of such theology in establishing and fostering communities with an authentic way of life This way of life would counteract the distortions and deformations of humanity that are exemplified by both late capitalism and Marxism Theology positions and interpretations today argues Doran must be stated in the categories of a theory of history The first part of the book outlines the horizon required for such categories The second third and fourth parts incrementally derive the categories expressing a theory of history in terms of the reciprocal relations among subjects cultures and social structures The final part on hermeneutics presents an argument for the pertinence of what has preceded for interpreting the words and deeds of others Doran draws extensively on the thought of Bernard Lonergan and the work develops Lonergan's methodological insights It issues a call to persons genuineness and authenticity informed by religious moral intellectual affective and psychic conversions by interior differentiation of one's consciousness and by Christian faith on the parts of theologians who aspire to arrest effectively the course of cultural decline
