Industrial Colonies and Village Settlements for the Consumptive (Classic Reprint) German Woodhead, 2018-01-19 Excerpt from *Industrial Colonies and Village Settlements*

for the Consumptive Symonds and we together examined the patients sampled the climate and other conditions and argued with Unger and Ruedi Then for the second time came Hope more solid Hope Given a fairly early case and three years and recovery was in the offing And so we went on cheerfully with Davos But Davos was not for every one nor was every case an early one Then came the discovery that lower altitudes would do if certain conditions were obtained and so arose the great sanatorium movement But slowly we found that patients could not spend their lives in sanatoriums and one day on making my way up to one of them in England I met on the way patient after patient slouching along bored to death with themselves and with each other and even worse in morale than in body Better discipline and better notions of therapeutics mended some of that still I could not forget those listless saunterers and it became evident to some of us however unwillingly that Hope was drooping again The sanatorium was doing a great educative work no doubt but at the end of its four or six months what then To send the patient away with recommendations about light jobs and a regime was almost a mockery or quite What about the wage and the family to be supported The next lesson was brought home to me by a visit with other commissioners to certain cities concerning some such problems Before me now I see a gaunt hollow eyed man coughing and leaning against the wall as he tried to talk to us saying that his mates when he came out of the sanatorium good fellows as they were had bought him a milk that he might creep round and earn a bit The brave wife shawl on head and mill apron on had just come from the factory and apologised for the dirty house as well she might The poor thing was working all day at the factory to keep the wolf from the door All being dragged down together into the pit What is the value of a good house or a clean house if no wages What is there for the children And what is to stop the infection Who then would have the imagination the initiative the business capacity to lift this burden like lifting a world About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Braund presents the only annotated edition of Bernard Romans's rare and valuable 18th century account of his observations in the southeastern United States Bernard Romans's *A Concise Natural History of East and West Florida* William Bartram's *Travels* and James Adair's *History of the American Indian* are the three most significant accounts of the southeastern United States published during the late 18th century This new edition of Romans's *Concise Natural History* edited by historian Kathryn Braund provides the first fully annotated edition of this early and rare description of both the European settled areas and the adjoining Indian lands in what are now the states of Florida Georgia Alabama Mississippi and Louisiana Romans's purpose in producing his *Concise Natural History* was twofold to aid navigators and shippers by detailing the sailing passages of the region and to promote trade and settlement in the region To those ends he provided detailed scientific observations on the natural history of the area a summary of the region's political history and an assessment of the potential for economic growth in the Floridas based on the area's natural resources A trained surveyor and cartographer and a self taught naturalist Romans supplied detailed descriptions of the region's topography and environment including information about the climate and weather patterns plants animals and diseases He provided information about the state of scientific inquiry in the South and touched on many of the most important intellectual arguments of the day such as the origin of the races the practice of slavery and the benefits and drawbacks of monopoly on trade In addition *Concise Natural History* can be placed firmly in the genre of colonial promotional literature Romans's book was an enthusiastic guide aimed at those seeking to establish modest holdings in the region What a field is open here No country ever had such inexhaustible

resources no empire had ever had so many advantages combining in its behalf. Romans explained how settlers should travel to the area, what they would need in terms of provisions and tools, and what it would cost to have their land surveyed. In addition to providing an abundance of practical advice, Romans also offered information about the history of earlier settlements, including the earliest and most complete account of New Smyrna near St. Augustine. Romans also presented unique information about the various Indian tribes he encountered. In fact, historians agree that among the most useful portions of the book are Romans's descriptions of the largest Indian tribes in the 18th-century Southeast: the Creeks, Choctaws, and Chickasaws. Romans's account of the diet of the Creeks and Choctaws is one of the most complete available. And his description of the location of Choctaw village sites is one of the best sources for this information.
