*Personalized Law* Omri Ben-Shahar,Ariel Porat,2021-05-17 We live in a world of one size fits all law People are different but the laws that govern them are uniform Personalized Law rules that vary person by person will change that Individual

tailoring becomes increasingly possible as technology and data combine and law and regulation could similarly be applied based on personalised subjective criteria. Better drivers would be free to drive faster, more vulnerable consumers would receive stronger warranties and protections, age restrictions for driving or for the consumption of alcohol would vary according to the recklessness risk that each person poses and licensing requirements would be more demanding for the less skilled. This book is the first to explore how personalized law can be designed to deliver precision and justice, how data and algorithms might run the system and what pitfalls the regime would have to prudently avoid. Omri Ben-Shahar and Ariel Porat not only present this concept in a clear, easily accessible way but they offer specific examples of how personalized law may be implemented across a variety of real-life applications.

*Financial Literacy Education* Asta Zokaityte, 2017-06-26 This book explores the issue of consumer financial education, responding to increased interest in and calls to improve people's financial literacy skills and abilities to understand and manage their money. New conceptual frameworks introduced in the book offer academic audiences an innovative way of thinking about the project on financial literacy education. Using the concepts of education, regulation and financial knowledge democratisation to analyse the financial education project in the UK, the book exposes serious and often ignored limitations to using information and education as tools for consumer protection. It challenges the mainstream representation of financial literacy education as a viable solution to consumer financial exclusion and poverty. Instead, it argues that the project on financial literacy education fails to acknowledge important dependences between consumer financial behaviour and the socio-economic, political and cultural context within which consumers live. Finally, it reveals how these international and national calls for ever greater financial education oversimplify and underestimate the complexity of consumer financial decision making in our modern times.
