Manual of the International List of Causes of Death as Adopted for Use in the United States, Based on the 5th Decennial Revision; [and] Manual Joint Cause of Death, 4th Ed., 1939 United States. Bureau of the Census, 1940 The Lancet: Stillbirths The Lancet, 2012-08-24. Around 2.6 million stillbirths, the death of a baby at 28 weeks gestation or more, occur each year. Although 98% of these deaths take place in low-income and middle-income countries, stillbirths also continue to affect wealthier nations, with around 1 in every 300 babies stillborn in high-income countries. This book highlights the rates and causes of stillbirth globally, explores cost-effective interventions to prevent stillbirths as well as maternal and neonatal deaths, and sets key actions to halve stillbirth rates by 2020. Also included are comments from professional organizations and parent groups, the latter demonstrating the unique tragedy for families of the birth of a baby bearing no signs of life. This research was launched in London, New York, Hobart, Geneva, New Delhi, Florence, and Cape Town on April 14, 2011. *Measuring Health* Anthony J. Culyer, 1978-12-15. Planning and evaluating any health care program is a formidable task; how do you measure the health of a population? This fundamental question has been approached from various perspectives in medical, administrative, and economic studies. This book provides a guide to health measurement literature and relates it to Ontario's current and prospective policy choices and to the federal context of health indicators and indices to existing statistics in Ontario in a county-by-county survey of the province's health care. He also outlines the kinds of information essential to health assessment but not currently available. The book as a whole emphasizes the importance of health care measurement in the humane and efficient planning of health services. It will be of interest to all concerned with the practice of medicine in the 1980s and the planning of health services at the federal and provincial levels as well as to those with a special interest in health from the economic, political, and sociological perspectives. *Manual of the International List of Causes of Death as*
