Climate Change a volume in the America's Climate Choices series describes and assesses different activities products strategies and tools for informing decision makers about climate change and helping them plan and execute effective integrated responses It discusses who is making decisions on the local state and national levels who should be providing information to make decisions and how that information should be provided It covers all levels of decision making including international state and individual decision making While most existing research has focused on the physical aspect of climate change Informing an Effective Response to Climate Change employs theory and case study to describe the efforts undertaken so far and to guide the development of future decision making resources Informing an Effective Response to Climate Change offers much needed guidance to those creating public policy and assists in implementing that policy The information presented in this book will be invaluable to the research community especially social scientists studying climate change practitioners of decision making assistance including advocacy organizations non profits and government agencies and college level teachers and students

Informing decisions on ecosystem-based approaches for the adaptation of people in the Asia and Pacific region Hills, T., Pramova, E., **Climate Change: Observations on Federal Efforts to Adapt to a Changing Climate** John B. Stephenson, 2011 This is a print on demand edition of a hard to find publication

Changes in the climate attributable to increased concentrations of greenhouse gases may have significant environ and economic impacts in the U S For ex climate change could threaten coastal areas with rising sea levels alter agricultural productivity and increase the intensity and frequency of floods and storms Greenhouse gases already in the atmosphere will continue altering the climate system into the future regardless of emissions control efforts This testimony examines 1 actions that fed state local and internat authorities are taking to adapt to a changing climate 2 the challenges that governmental officials face in their efforts to adapt and 3 actions that the Congress and fed agencies could take to help address these challenges

The US National Climate Assessment Katharine Jacobs, Susanne Moser, James Buizer, 2016-08-09 This book offers valuable climate policy and climate assessment lessons depicting what it takes to build a sustained climate assessment process It explores the third U S National Climate Assessment NCA3 report as compared with previous US national climate assessments from both a process and content perspective The U S Global Change Research Program is required by law to produce a National Climate Assessment report every four years and these reports provide a comprehensive evaluation of climate science as well as observed and projected climate impacts on a variety of sectors As the book describes a key contribution of the NCA3 approach is a far more deliberate interdisciplinary process as well as an engagement strategy that brought hundreds of public and private sector stakeholders into the assessment community Among its most important conceptual contributions was an explicit focus on building the infrastructure to conduct better assessments over time and an experimental approach to analysis of the impacts of climate on cross sectoral systems and inter locking and cascading effects across sectors Readers may explore innovations such as the development of regional climatologies and projections for every

region of the US as well as the development of the Global Change Information System The book also highlights the need for decision makers to be part of the assessment process in order for assessment findings to be truly useful from a decision maker s perspective Many lessons have been learned by the NCA3 authors that can be useful in future assessments and adaptation processes both within the US and internationally This book passes on such lessons and includes an evaluation of the role of state climate assessments in ongoing national assessment processes

Climate in Context Adam S. Parris, Dr. Gregg M. Garfin, Professor Kirstin Dow, Dr. Ryan Meyer, Dr. Sarah L. Close, 2016-03-16 Society is increasingly affected by climate impacts from prolonged water shortages to damaging coastal floods and wildfires Scientists studying climate variations are eager to have their knowledge used in adaptive decision making To achieve this science and society must engage productively around complex management and policy challenges For over 20 years the science society interface has been fertile ground for the Regional Integrated Sciences and Assessments RISA programs sponsored by the U S National Oceanic and Atmospheric Administration Climate in Context describes what it takes to help scientists and stakeholders work together to co produce climate science knowledge policy and action This state of the art synthesis reflects on lessons learned by RISA programs and provides a sober assessment of the challenges ahead Through case studies from various US regions this book provides lessons and guidance for organizations and individuals who want to work at the science society interface on a range of climate challenges

Climate Igor Linkov, Todd S. Bridges, 2011-08-31 Rising sea levels and altered weather patterns are expected to significantly alter coastal and inland environments for humans infrastructure and ecosystems Potential land use changes and population increases coupled with uncertain predictions for sea level rise and storm frequency intensity represent a significant planning challenge While efforts to mitigate climate change continue plans must be made to adapt to the risks that climate change poses to humans infrastructure and ecosystems alike This book addresses integrated environmental assessment and management as part of the nexus of climate change adaptation Risk analysis has emerged as a useful approach to guide assessment communication and management of security risks However with respect to climate change an integrated multi criteria multi hazard risk informed decision framework is desirable for evaluating adaptation strategies The papers in Part 1 summarize societal and political needs for climate change adaptation Part 2 includes papers summarizing the state of the art in climate change adaptation Three further parts cover the process of change in coastal regions in inland regions and finally the potential challenges to homeland security for national governments Each of these parts reviews achievements identifies gaps in current knowledge and suggests research priorities

Climate Change and Food Security in West Asia and North Africa Mannava V.K. Sivakumar, Rattan Lal, Ramasamy Selvaraju, Ibrahim Hamdan, 2013-07-30 The countries of West Asia and North Africa WANA have long had the challenge of

providing sustainable livelihoods for their populations in the fragile ecosystems of semi arid and arid areas Climate change is already a reality in WANA and it places additional constraints on the already fragile ecosystems of dry areas and limited natural resources in WANA A comprehensive and integrated approach to planning and implementing the climate change adaptation strategies across the wide range of agro ecosystems in different countries in WANA could help both the planners and the local communities to deal effectively with the projected impacts and also contribute to overall sustainability of agricultural production systems This book addresses the important issue of climate change and food security in West Asia and North Africa and presents the appropriate strategies which could help in the development of new policies to better adapt agriculture production systems and enhance food security in WANA Energy and Water Development Appropriations for 2010 United States. Climate Change and Society Riley E. Dunlap,Robert J. Brulle,2015 Climate change is one of today s most important issues presenting an intellectual challenge to the natural and social sciences While there has been progress in natural science understanding of climate change social science research has not been as fully developed This collection of essays breaks new theoretical and empirical ground by presenting climate change as a thoroughly social phenomenon embedded in our institutions and cultural practices

Ocean Acidification National Research Council,Division on Earth and Life Studies,Ocean Studies Board,Committee on the Development of an Integrated Science Strategy for Ocean Acidification Monitoring,2010-10-14 The ocean has absorbed a significant portion of all human made carbon dioxide emissions This benefits human society by moderating the rate of climate change but also causes unprecedented changes to ocean chemistry Carbon dioxide taken up by the ocean decreases the pH of the water and leads to a suite of chemical changes collectively known as ocean acidification The long term consequences of ocean acidification are

not known but are expected to result in changes to many ecosystems and the services they provide to society Ocean Acidification A National Strategy to Meet the Challenges of a Changing Ocean reviews the current state of knowledge explores gaps in understanding and identifies several key findings Like climate change ocean acidification is a growing global problem that will intensify with continued CO₂ emissions and has the potential to change marine ecosystems and affect benefits to society The federal government has taken positive initial steps by developing a national ocean acidification program but more information is needed to fully understand and address the threat that ocean acidification may pose to marine ecosystems and the services they provide In addition a global observation network of chemical and biological sensors is needed to monitor changes in ocean conditions attributable to acidification Decision Making under Deep Uncertainty

Vincent A. W. J. Marchau, Warren E. Walker, Pieter J. T. M. Bloemen, Steven W. Popper, 2019-04-04 This open access book focuses on both the theory and practice associated with the tools and approaches for decisionmaking in the face of deep uncertainty It explores approaches and tools supporting the design of strategic plans under deep uncertainty and their testing in the real world including barriers and enablers for their use in practice The book broadens traditional approaches and tools to include the analysis of actors and networks related to the problem at hand It also shows how lessons learned in the application process can be used to improve the approaches and tools used in the design process The book offers guidance in identifying and applying appropriate approaches and tools to design plans as well as advice on implementing these plans in the real world For decisionmakers and practitioners the book includes realistic examples and practical guidelines that should help them understand what decisionmaking under deep uncertainty is and how it may be of assistance to them Decision Making under Deep Uncertainty From Theory to Practice is divided into four parts Part I presents five approaches for designing strategic plans under deep uncertainty Robust Decision Making Dynamic Adaptive Planning Dynamic Adaptive Policy Pathways Info Gap Decision Theory and Engineering Options Analysis Each approach is worked out in terms of its theoretical foundations methodological steps to follow when using the approach latest methodological insights and challenges for improvement In Part II applications of each of these approaches are presented Based on recent case studies the practical implications of applying each approach are discussed in depth Part III focuses on using the approaches and tools in real world contexts based on insights from real world cases Part IV contains conclusions and a synthesis of the lessons that can be drawn for designing applying and implementing strategic plans under deep uncertainty as well as recommendations for future work The publication of this book has been funded by the Radboud University the RAND Corporation Delft University of Technology and Deltares **The Fiscal Year 2010 Budget for the National Oceanic and Atmospheric Administration** United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Oceans, Atmosphere, Fisheries, and Coast Guard, 2010 **Effective Risk Communication** Joseph Arvai, Louie Rivers III, 2013-10-30 There are two questions often asked of risk communication what has been learned from

past work and what is needed to push the field forward Drawing on the experience of leading risk researchers and practitioners Effective Risk Communication focuses on answering these questions The book draws together new examples of research and practice from contexts as diverse as energy generation human health nuclear waste climate change food choice and social media This book treats risk communication as much more than the interchange of risk information between experts and non experts rather it aims to emphasise the diversity in viewpoints and practices In each specially commissioned chapter the authors reflect on the theoretical and applied underpinnings of their best projects and comment on how their approach could be used effectively by others Building upon each other the chapters will provoke new discussion and action around a discipline which many feel is neither meeting important needs in practice nor living up to its potential in research Through a more careful examination of the work already done in risk communication the book will help develop better more reflective practice for the future
