

Inleiding in de psychologie

Hoofdstuk 3

3.1

Sensatie: proces waarbij gestimuleerde receptoren (bijv oren of ogen) een patroon van neurale impulsen creëren dat waargenomen stimuli representeert in de hersenen, waardoor een initiële ervaring van stimuli ontstaat.

Perceptie (waarneming): proces waarbij aan het patroon van sensorische zenuwimpulsen een gedetailleerde betekenis wordt toegekend. Perceptie wordt sterk beïnvloed door herinnering, motivatie en emotie.

- Perceptie creëert een interpretatie van de sensatie.

Transductie: proces waarbij de ene vorm van energie wordt omgezet in een andere vorm. (omzetting stimulusinformatie in zenuwimpuls).

Sensorische adaptie: zintuigen (receptorcellen) worden steeds minder gevoelig naarmate een stimulus langer aanhoudt.

Absolute drempel: de minimumhoeveelheid fysische energie die nodig is om tot een sensorische ervaring te leiden. Hier wordt uitgegaan van het aantal stimuli dat je sensorische systeem ongeveer de helft van de tijd kan detecteren.

Verschildrempel: het kleinste waarneembare verschil tussen twee stimuli dat iemand betrouwbaar, de helft van het aantal keren, als verschil kan opmerken ook wel: JWV (Juist Waarneembaar Verschil).

Wet van Weber: stelt dat de grootte van het JWV proportioneel samenhangt met de intensiteit van de stimulus.

Signaaldetectietheorie: sensatie is afhankelijk van de kenmerken van de stimulus en de detector. En erkent het feit dat een waarnemer (wiens lichamelijke en geestelijke toestand voortdurend verandert) een sensorische ervaring moet vergelijken met constant veranderende verwachtingen en biologische omstandigheden.

3.2

Retina: netvlies, de lichtgevoelige laag achter in de oogbol.

Fotoreceptoren: lichtgevoelige cel in de retina die lichtenergie omzet in neurale impulsen: staafjes en kegeltjes.

Staafjes: kunnen 'in het donker zien': ze kunnen zwak licht waarnemen, maar geen kleuren.

Kegeltjes: vooral actief bij helderder licht, extra gevoelig voor kleuren. (blauw, groen of rood)

Fovea: gele vlek, centrale gedeelte van de retina waarmee je het scherpst ziet, bestaat bijna alleen maar uit kegeltjes.

Ganglioncellen: zenuwcel in de binnenste laag van de retina, die in contact staat met de oogzenuw.

Oogzenuw: alle axonen van de ganglioncellen bij elkaar. Brengt visuele informatie van het oog naar de hersenen. (geleid geen licht, alleen patronen van zenuwimpulsen).

Veldverkenningen in de psychologie Stefan Lievens, 1998 *Phenomenological Psychology* J.J. Kockelmans, 2012-12-06

Over the past decades many books and essays have been written on phenomenological psychology. Some of these publications are historical in character and were designed to give the reader an idea of the origin, meaning and function of phenomenological psychology and its most important trends. Others are theoretical in nature and were written to give the reader an insight into the ways in which various authors conceive of phenomenological psychology and how they attempt to justify their views in light of the philosophical assumptions underlying their conceptions. Finally, there are a great number of publications in which the authors do not talk about phenomenological psychology but rather try to do what was described as possible and necessary in the first two kinds of publications. Some of these attempts to do the latter have been quite successful; in other cases the results have been disappointing. This anthology contains a number of essays which I have brought together for the explicit purpose of introducing the reader to the Dutch school in phenomenological psychology. The Dutch school occupies an important place in the phenomenological movement as a whole. Buytendijk was one of the first Dutch scholars to contribute to the field and for several decades he remained the central figure of the school.

Classic Writings for a Phenomenology of Practice Michael van Manen, Max Van Manen, 2020-10-01 Classic Writings for a Phenomenology of Practice features examples of newly translated classic phenomenological texts that have been largely forgotten or misunderstood. The writings are unique in that they speak to the practice of doing phenomenological research for the purpose of gaining insights and better understandings regarding aspects of professional practice and ordinary life phenomena and events. Phenomenology does not have to be impenetrable philosophy dealing with tedious technical issues. Instead, phenomenology may offer relevance, value and enduring allure to readers and researchers who are engaged with the quotidian life experiences and events of students, patients, clients, friends and other individuals. This phenomenological approach aims to stay as close as possible to the ordinary events of everyday life: seeing the first smile of a child, feeling compulsive, being humorous, having a conversation, experiencing childhood, secrecy, encountering new things, topics that span a manifold of life experiences. In this collection of classic phenomenological writings, each author is thoughtfully introduced and each text is followed by a conversational descant, a reflection on the phenomenological reflection. The presentation of these classic writings and their reflections aims to show us what it means to do phenomenology directly on the phenomena that we live, thus asking us to be attentive to the fascinating varieties and subtleties of primal lived experiences and

consciousness in all its remarkable complexities This book is relevant for scholars and students who are interested in human science research and the origins and practices of the phenomenological method

Inleiding in de psychologie Henry Gleitman, W. Tomic, 1986
The Indispensability of Phenomenology, Experiment and History René Van Hezewijk, Henderikus J. Stam, 2024-11-08 This book is the first comprehensive intellectual biography of Johannes Linschoten whose work has been credited with helping to bring down the Utrecht School of phenomenological psychology The authors show this to be a mistaken assumption in the light of Linschoten's entire oeuvre and demonstrate his importance for an understanding of a phenomenological psychology that necessarily coexists with an experimental scientific psychology In the Netherlands Linschoten is particularly appreciated for his last book published posthumously That volume Idols of the Psychologist took a critical look at phenomenological psychology and its pretensions while simultaneously acknowledging that a phenomenological outlook is a necessity for beginning any kind of experimental investigation Most commentators on this book considered Linschoten a convert from phenomenology to experimental psychology but have either ignored his earlier substantive work or have not seen the importance of the intellectual context for his final work By examining his life and the full extent of his voluminous writings this book demonstrates Linschoten's importance for the development of psychology in the Netherlands and beyond It will shed new light on the life and work of Johannes Linschoten as well as the Dutch school of phenomenology and its postwar contributions to psychology in Europe and North America Furthermore for the first time this book brings together important aspects of Linschoten's life with his prodigious output It demonstrates how his life and work created a unique psychology that deserves to be continued and developed

Cognitieve therapie. Patricia van Oppen, Susan M. Bögels, 2004-02-11 De laatste jaren wint cognitieve therapie aan populariteit wordt op grote schaal uitgevoerd bij steeds meer verschillende psychische stoornissen en onderzocht op haar effectiviteit Dit boek geeft een helder en actueel overzicht van de cognitieve behandeling van psychische problemen De nadruk ligt op de praktische toepassing De beschreven interventies worden uitvoerig geïllustreerd aan de hand van onder andere gevalbeschrijvingen en letterlijk weergegeven fragmenten Het boek bevat veel praktisch materiaal zoals folders en dagboekformulieren dat tijdens de therapie gebruikt kan worden Het boek is bedoeld voor psychologen pedagogen en psychiaters en hen die hiervoor in opleiding zijn

Medische psychologie A.A. Kaptein, J.B. Prins, E.H. Collette, R.L. Hulsman, 2010-06-22 Medische psychologie vormt een belangrijk aspect van de moderne geneeskunde Bij gezond blijven ziek worden hulp zoeken bij klachten diagnostische procedures behandeling en nazorg revalidatie zijn niet alleen medische factoren van belang Ook gedrag speelt hierin een cruciale rol Psychologie is de wetenschap die zich bezighoudt met de bestudering van gedrag Medische psychologie richt zich specifiek op het gedrag van mensen in de medische situatie Medische psychologie geeft een helder overzicht van de kernthema's in de medische psychologie Het boek is ingedeeld volgens de drie thema's van het vak Gedrag en gezondheid Gedrag en ziekte en Communicatie en professioneel gedrag Aan de orde komen de psychologische aspecten

van de belangrijkste diagnoses en therapieën bij gezondheidsproblemen Er wordt stilgestaan bij vragen als Welk gedrag leidt tot ziekte Hoe reageren patiënten op een diagnose of een therapie Wat zijn de psychische en sociale gevolgen van een ziekte of een behandeling Aan welke eisen moet het gedrag van artsen voldoen in de omgang met patiënten Deze onderwerpen worden geïllustreerd aan de hand van herkenbare voorbeelden uit de praktijk Extra materiaal wordt aangeboden op de website bij het boek die voor de lezer kosteloos toegankelijk is Beschikbaar zijn samenvattingen verdiepingsvragen en zelfstudieopdrachten links naar beeldmateriaal en interessante sites en PowerPoints speciaal voor docenten Tevens is de gehele inhoud van dit boek op de website geplaatst zodat het overal online te raadplegen en snel te doorzoeken is Extra materiaal wordt aangeboden op de website bij het boek die voor de lezer kosteloos toegankelijk is Beschikbaar zijn samenvattingen verdiepingsvragen en zelfstudieopdrachten links naar beeldmateriaal en interessante sites en PowerPoints speciaal voor docenten Tevens is de gehele inhoud van dit boek op de website geplaatst zodat het overal online te raadplegen en snel te doorzoeken is
