Inner Mongolia Chinas Provinces In Transition Book 15:

Mongolia in Transition Ole Bruun,Ole Odgaard,2013-05-13 Squeezed between powerful neighbours for decades Mongolia played the role of buffer state Its full independence in 1990 offered new opportunities for both economic growth and the restoration of Mongolian identity But with a huge land area poor infrastructure and a small population the new republic is highly vulnerable and also dependent on international support This book provides easily accessible information for developers planners consultants scholars students and others with an interest in contemporary Mongolia Prefaced by a general overview of the land and society its chapters all written by international experts cover a wide range of topics including foreign policy domestic politics local government structure living standards and poverty women in society grassland management the common herding household and science and technology policy A comprehensive bibliography is provided

China's Regions in an Era of Globalization Tim Summers,2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization yet China is a continent sized economy and society with substantial diversity across its different regions This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China s regions This book responds to this challenge by looking at the development of China s regions in this era of globalization It traces the evolution of regional policy in China and its implications in a global context Detailed chapters examine the global trajectory of what is now becoming known as the Greater Bay Area in southern China the globalization of the inland mega city of Chongqing and the role of China s regions in the globally focused belt and road initiative launched by the Chinese government in late 2013 The book will be of interest to practitioners and scholars engaging with contemporary China s political economy and international relations

China's Frontier Regions Doug Smith,Michael E. Clarke,2016-03-08 China has traditionally viewed her frontier regions Zxinjiang Tibet Inner Mongolia and Yunnan as buffer zones Yet their importance as commercial and cosmopolitan hubs intimately involved in the transmission of goods peoples and ideas between China and it west and southwest has meant they are crucial for China s ongoing development The resurgence of China under Deng Xiaoping s policy of reform and opening has therefore led to a focus on integrating these regions into the PRC People s Republic of China This has important implications not only for the frontier regions themselves but also for the neighbouring states with which they have strong cultural religious linguistic and economic ties China s Frontier Regions explores the challenges presented by this integrationist policy both for domestic relations and for diplomatic and foreign policy relations with the countries abutting their frontier regions

Labrang Monastery Paul Kocot Nietupski,2012-07-10 The Labrang Tibetan Buddhist Monastery in Amdo and its extended support community are one of the largest and most famous in Tibetan history This crucially important and little studied community is on the northeast corner of the Tibetan Plateau in modern Gansu Province in close proximity to Chinese Mongol and Muslim

communities It is Tibetan but located in China it was founded by Mongols and associated with Muslims Its wide ranging Tibetan religious institutions are well established and serve as the foundations for the community s social and political infrastructures The Labrang community s borderlands location the prominence of its religious institutions and the resilience and identity of its nomadic and semi nomadic cultures were factors in the growth and survival of the monastery and its enormous estate This book tells the story of the status and function of the Tibetan Buddhist religion in its fully developed monastic and public dimensions It is an interdisciplinary project that examines the history of social and political conflict and compromise between the different local ethnic groups The book presents new perspectives on Qing Dynasty and Republican era Chinese politics with far reaching implications for contemporary China It brings a new understanding of Sino Tibetan Mongol Muslim histories and societies This volume will be of interest to undergraduate and graduate student majors in Tibetan and Buddhist studies in Chinese and Mongol studies and to scholars of Asian social and political studies

Communist China Digest ,1961 **Institutions in Transition** Peter Ho,2005-07-21 China s urban sprawl has led to serious social cleavages Unclear land and property rights have resulted in an uneasy alliance between real estate companies and local authorities with most willing to strike illegal deals over land The results have been devastating Farmers live in fear that the land they till today will be gone tomorrow while urban citizens are regularly evicted from their homes to make way for new skyscrapers and highways These shocking incidents underscore the urgency of the land question in China The recent conviction of the Chinese Minister for Land Resources and the forced evictions that have led to the injury and death of ordinary Chinese citizens highlight the case for land reform Against this backdrop many scholars criticize China s lack of privatization and titling of property This monograph however demonstrates that these critically depend on timing and place Land titling is imperative for the wealthier regions yet may prove detrimental in areas with high poverty The book argues that China s land reform can only succeed if the clarification of property rights is done with caution and ample regard for regional variations

Minority Groups in Mainland China ,1965 **China's Economic Supertrends: How China is Changing from the Inside Out to Become the World's Next Economic Superpower** , **Biotic changes in terrestrial environments around the Eocene-Oligocene transition** Lucja A. China's Ethnic Minorities Rongxing Guo,2013-04-26 The majority of China s population is the Han Till now China has officially identified except for other unknown ethnic groups and foreigners with Chinese citizenship 55 ethnic minorities Ethnic minorities vary widely in size in China With a population of more than 15 million the Zhuang have been the largest minority group and the Lhoba with only 2 thousand or more the smallest China s ethnic diversity has resulted in a special socioeconomic landscape of China itself The book sets out to collect and estimate a full set of data on the socioeconomic situations of China s ethnic minorities Till present a complete socioeconomic picture of China s ethnic groups still remains unclear from China s official sources How different have been China s ethnic minorities in every sphere of daily life and

economic development during China's fast transition period. In order to answer these questions we need a detailed and comparable set of data for each of China's ethnic minorities. This book provides in an easy to use format a broad collection of data on China's 55 ethnic minorities. It is a resource book that profiles the demography, employment and wages, people's livelihood, agriculture, industry, education, science and technology, and culture, sports and public health for each of these ethnic minorities. These indicators, estimated on the author's basis on materials gathered from a variety of sources and clearly presented in one volume, will be of great value to researchers, businesses, government agencies and news media.

Low Carbon Transitions for Developing Countries Frauke Urban, 2014-06-13 Global climate change is one of the greatest challenges of our times and in order to tackle this carbon emissions need to be mitigated. China and India have recently become some of the world's largest greenhouse gas emitters. Transitions to low carbon energy for reducing emissions that lead to climate change are therefore an urgent priority for China and India and at a global level. This is the first book focusing on low carbon energy transitions for emerging economies such as China and India, assessing the opportunities and barriers for transitions to renewable and low carbon energy as climate change mitigation options. It uses energy modelling to assess the China's power sector, the economy of Beijing and rural Indian households that do not have access to electricity. The research evaluates the environmental, technical, socio-economic and policy implications of these low carbon transitions, concluding that they are possible in China and India and they can considerably contribute to climate change mitigation. This interdisciplinary book will be of interest to scholars, students, practitioners and policy makers working in the fields of energy and development, energy policy, energy studies and modelling, climate policy, climate change mitigation, climate change and development, low carbon development, sustainable development, environment and development and environmental management.

The Archaeology of Early China Gideon Shelach-Lavi, 2015-01-26 This volume aims to satisfy a pressing need for an updated account of Chinese archaeology. It covers an extended time period from the earliest peopling of China to the unification of the Chinese Empire some two thousand years ago. The geographical coverage includes the traditional focus on the Yellow River basin but also covers China's many other regions. Among the topics covered are the emergence of agricultural communities, the establishment of a sedentary way of life, the development of sociopolitical complexity, advances in lithic technology, ceramics and metallurgy and the appearance of writing, large scale public works, cities and states. Particular emphasis is placed on the great cultural variations that existed among the different regions and the development of interregional contacts among those societies.

China's Provinces in Transition: Inner Mongolia R. Guo, Luc Guo, 2012-12-22 This volume is one of the book series entitled China's Provinces in Transition. This series includes 31

volumes China's Multicultural Economies Rongxing Guo,2012-11-29 Although the majority of China's population is of the Han nationality which accounts for more than 90% of China's population the non Han ethnic groups have a population of more than 100 million Until now China has officially identified except for other unknown ethnic groups and foreigners with Chinese citizenship 56 ethnic groups In addition ethnic groups vary widely in size With a population of more than 15 million the Zhuang have the largest ethnic minority and the Lhoba with only two thousand or more the smallest China's ethnic diversity has resulted in a special socioeconomic landscape of China itself This book develops a complete socioeconomic picture and a detailed and comparable set of data for each of China's ethnic groups There have not been any precise data on China's socioeconomic statistics from multi ethnic dimension The only official data released can be found in China Ethnic Statistical Yearbook released by the State Commission of Ethnic Affairs SCEA of the People's Republic of China since 1994 However as this Yearbook has only reported the socioeconomic statistics for the minority based autonomous areas a complete set of China's multi ethnic data cannot be derived from it This book provides a broad collection of data on China's 56 ethnic groups and profiles the demography cultural economy and business climates for each of China's diverse ethnic groups Multicultural China Rongxing Guo,Uradyn E. Bulag,Michael A. Crang,Thomas Heberer,Eui-Gak Hwang,James A Millward,Morris Rossabi,Gerard A. Postiglione,Chih-yu Shih,Nicholas Tapp,Luc Changlei Guo,2014-07-29 With its easy to use format this book provides a collection of annual data on China's 56 ethnic groups It is a resource book that profiles the demography employment and wages livelihood agriculture industry education science and technology culture sports and public health for each of these ethnic groups This material which is compiled from a variety of sources will be of great value to researchers businesses government agencies and news media In this book data are presented on an ethnic group by ethnic group basis and the ethnic groups are ordered alphabetically from the Achang to the Zhuang Though most of the data are as of 2011 the latest year when our research was conducted we also provide some historical data for a few of indicators This is intended to help readers to conduct time series comparisons and analyses **Manchuria** Mark Gamsa,2020-02-06 Manchuria is a historical region which roughly corresponds to Northeast China The Manchu people who established the last dynasty of Imperial China the Qing 1644 1911 originated there and it has been the stage of turbulent events during the twentieth century the Russo Japanese war Japanese occupation and establishment of the puppet state of Manchukuo Soviet invasion and Chinese civil war This innovative and accessible historical survey both introduces Manchuria to students and general readers and contributes to the emerging regional perspective in the study of China Encyclopedia of Chinese History Michael Dillon,2016-12-01 China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty The number of westerners travelling to China to study for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture society and economy and increasing coverage of contemporary China in the media Our understanding of China's history has also been evolving The

study of history in the People's Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers, there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the Encyclopedia includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang, and Tibet that have played such an important role in the history of China. Proper and will also include material on Taiwan and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the Encyclopedia will be an invaluable resource for students of Chinese history, politics, and culture.
