**Patrimonio cultural y Marketing Digital.** María Cristina Fernández Laso, Ma Cristina Fernández-Laso, 2018-12-31 El libro Patrimonio cultural y Marketing Digital constituye una contribución de enorme relevancia a los nuevos desafíos que presenta hoy en día conectar con el turista o visitante cultural. Este libro es una respuesta a la transformación que está experimentando el Patrimonio cultural y el marketing por la aplicación de las Tecnologías de la Información y la Comunicación TIC. En la actualidad los destinos turísticos culturales, los yacimientos arqueológicos, los museos o los bienes patrimoniales en general deben diferenciarse por la generación de contenidos a través del uso de las nuevas herramientas tecnológicas, las aplicaciones móviles, la realidad virtual o aumentada, etc., y metodologías constructivistas con el fin de dar respuesta a los nuevos patrones de comportamiento del visitante y a las demandas del turista 2.0. Desde un enfoque multidisciplinar, un seleccionado equipo de especialistas en la materia analiza aspectos clave que están marcando los cambios conductuales y de actitud en los consumidores culturales. Resultado de ello, en este libro se ofrecen cinco grandes apartados: el marketing y neuromarketing, el turismo, la realidad virtual, los museos y la educación patrimonial o didáctica del Patrimonio cultural. La finalidad de todo ello es conectar con el turista 2.0 y, al mismo tiempo, preservar los recursos patrimoniales naturales y culturales, logrando un turismo sostenible.

**Close-Range Photogrammetry and 3D Imaging** Thomas Luhmann, Stuart Robson, Stephen Kyle, Jan Boehm, 2019-11-18 This is the third edition of the well known guide to close range photogrammetry. **Photogrammetry of a 5m Inflatable Space Antenna with Consumer Digital Cameras** Richard S. Pappa, 2000 This paper discusses photogrammetric measurements of a 5m diameter inflatable space antenna using four Kodak DC290 2.1 megapixel digital cameras. The study had two objectives: 1. Determine the photogrammetric measurement precision obtained using multiple consumer grade digital cameras and 2. Gain experience with new commercial photogrammetry software packages, specifically PhotoModeler Pro from Eos Systems Inc. The paper covers the eight steps required using this hardware/software combination. The baseline data set contained four images of the structure taken from various viewing directions. Each image came from a separate camera. This approach simulated the situation of using multiple time synchronized cameras, which will be required in future tests of vibrating or deploying ultra lightweight space structures. With four images, the average measurement precision for more than 500 points on the antenna surface was less than 0.020 inches inplane and approximately 0.050 inches out of plane.

**Journal of Rehabilitation Research & Development**, 2006 **Structure from Motion in the Geosciences** Jonathan L. Carrivick, Mark W. Smith, Duncan J. Quincey, 2016-07-15 Structure from Motion with Multi View Stereo provides hyperscale landform models using images acquired from standard compact cameras and a network of ground control points. The technique is not limited

in temporal frequency and can provide point cloud data comparable in density and accuracy to those generated by terrestrial and airborne laser scanning at a fraction of the cost It therefore offers exciting opportunities to characterise surface topography in unprecedented detail and with multi temporal data to detect elevation position and volumetric changes that are symptomatic of earth surface processes This book firstly places Structure from Motion in the context of other digital surveying methods and details the Structure from Motion workflow including available software packages and assessments of uncertainty and accuracy It then critically reviews current usage of Structure from Motion in the geosciences provides a synthesis of recent validation studies and looks to the future by highlighting opportunities arising from developments in allied disciplines This book will appeal to academics students and industry professionals because it balances technical knowledge of the Structure from Motion workflow with practical guidelines for image acquisition image processing and data quality assessment and includes case studies that have been contributed by experts from around the world Journal of Rehabilitation R & D, 2006 **Technologie Et Méthodologie Pour la Pratique en Archéologie** International Union of Prehistoric and Protohistoric Sciences, 2009 Proceedings of the XV World Congress UISPP Lisbon 4 9 September 2006 Series editor Luiz Oosterbeek Volume 37 Session C04 **Pacific 2000** Christopher Moore Stevenson, Georgia Lee, Frank J.
