Managing Copyright in Higher Education Donna L. Ferullo, 2014-10-30. As more and more colleges and universities establish copyright offices and/or assign the responsibilities of copyright education and advisory services to specific individuals within the institution, many times librarians, there is a paucity of resources available on how to manage that responsibility. Most works on copyright discuss the law and court cases interpreting the law but few address the situational application of it and the management and coordination of copyright efforts on a campus. Here is a complete one stop guide to managing copyright at all levels: community college, college and university. Complete chapters are devoted to: The university culture; The role of a copyright office; How to establish a copyright office; Copyright services for librarians; Copyright services for faculty; Copyright services for administrators and staff; Copyright services for students. Written by the director of the University Copyright Office at Purdue University who holds both law and library science degrees, this is a complete authoritative guide, a must purchase for every institution of higher education seeking to comply with the copyright law and thus avoid potential liability exposure.

What if we could reimagine copyright? Rebecca Giblin, Kimberlee Weatherall, 2017-01-09. What if we could start with a blank slate and write ourselves a brand new copyright system? What if we could design a law from scratch unconstrained by existing treaty obligations, business models and questions of political feasibility? Would we opt for radical overhaul or would we keep our current fundamentals? Which parts of the system would we jettison? Which would we keep? In short, what might a copyright system designed to further the public interest in the current legal and sociological environment actually look like? Taking this thought experiment as their starting point, the leading international thinkers represented in this collection reconsider copyright's fundamental questions: the subject matter that should be protected; the ideal scope and duration of those rights; and how it should be enforced. Tackling the biggest challenges affecting the current law, their essays provocatively explore how the law could better secure to creators the fruits of their labours, ensure better outcomes for the world's more marginalised populations and solve orphan works. And while the result is a collection of impossible ideas, it also tells us much about what copyright could be and what prescriptive treaty obligations currently force us to give up. The book

shows that reimagined copyright could serve creators and the broader public far better than it currently does and exposes intriguing new directions for achievable reform

Intellectual Privilege Tom W. Bell, 2014-04-14 A consensus has recently emerged among academics and policymakers that US copyright law has fallen out of balance Lawmakers have responded by taking up proposals to reform the Copyright Act But how should they proceed This book offers a new and insightful view of copyright marking the path toward a world less encumbered by legal restrictions and yet richer in art music and other expressive works Two opposing viewpoints have driven the debate over copyright policy One side questions copyright for the same reasons it questions all restraints on freedoms of expression and dismisses copyright like other forms of property as a mere plaything of political forces The opposing side regards copyrights as property rights that deserve like rights in houses cars and other forms of property the fullest protection of the law Each of these viewpoints defends important truths Both fail however to capture the essence of copyright In Intellectual Privilege Tom W Bell reveals copyright as a statutory privilege that threatens our natural and constitutional rights From this fresh perspective come fresh solutions to copyright s problems Published by the Mercatus Center at George Mason University

Copyright's Broken Promise John Willinsky, 2022-12-06 A comprehensive proposal for reforming copyright law to ensure sustainable public access to research and scholarship Open access is widely supported by researchers librarians scholarly societies and research funders as well as large and small publishers Yet despite this support and the pandemic s demonstration of the importance of open access for scientific progress the scholarly publishing market is failing to deliver open access quickly enough In Copyright s Broken Promise John Willinsky presents the case for reforming copyright law so that it supports rather than impedes public access to research and scholarship He draws on the legal strategy of statutory licensing to set out the terms and structures by which the Copyright Act could ensure that publishers are fairly compensated for providing immediate open access What sets Willinsky s analysis apart is its focus on the current state of scholarly publishing Because copyright offers so little legal

support for moving publishing to open access though it is best for science he says it is time to stop regarding the Copyright Act as a law of nature that can only be circumvented contravened or temporarily set aside Specifically he proposes that the Copyright Act add a new category of work called research publications which would be subject to statutory licensing This would allow publishers to receive royalty payments from the principal institutional users universities industry R D research institutes and so on and sponsors of the work foundations and government agencies while providing immediate open access

Collective Management of Music Copyright Qinqing Xu, 2023-04-17 Two of the objectives of the Chinese Copyright Law are to protect the copyright of authors to their literary and artistic works and encourage the creation and dissemination of works In practice however in spite of the existence of the Music Copyright Society of China MCSC that was established to assist with exercising copyright music creators in China remain in need of help to protect and manage their fragmented copyright The MCSC was the first collective management organisation CMO in mainland China and is the only CMO in the field of musical works While there is a large music industry and copyright business in China the MCSC only had 11 356 members at the end of 2021 The third amendment of the Chinese Copyright Law was initiated in 2011 and came into effect in June 2021 after a long debate for almost ten years The discussion of the third amendment has highlighted the controversial topic of collective management of copyright This book explores the adequacy of the MCSC as an intermediary representing rights for music creators The main argument developed in this study is that the work of the MCSC for individual composers and lyricists is hampered by shortcomings in the regulatory regime as well as by a lack of members rights to participate in the management of their own rights and by the ineffective international cooperation between the MCSC and other musical CMOs overseas The analysis is undertaken through a case study approach comparing the collective management systems of music copyright in China the United States and Australia and addressing the question of how musical CMOs operate in these countries Specifically three perspectives are examined the regulatory systems designed to limit the misuse of those CMOs monopoly members rights in the organisations and international cooperation between these CMOs Overall the main findings of this book suggest that the MCSC in China could work more effectively to protect music creators interests In contrast although the operational frameworks of the American Society of Composers Authors and Publishers ASCAP and the Broadcasting Broadcast Music Inc BMI in the United States and the Australasian Performing Right Association APRA in Australia are not perfect models the systems in these two countries may at least provide reference points for potential improvement of the regime of the MCSC The research recommends three courses of action strengthening the regulatory design overseeing the MCSC s monopoly clarifying the relationship between the MCSC and its members while providing the members with the right to manage their own copyright and improving the international cooperation between the MCSC and CMOs in other countries

Retransmission and U. S. Compliance with TRIPs David J. Brennan, 2003-01-01 This book seeks to answer one central question do the U S cable and satellite retransmission statutory licenses comply with the TRIPs

minimum standard As with all legal problems the resolution of ambiguity provides the challenge and the interest In this regard by far the greatest ambiguity is created by the use of the term equitable remuneration in the TRIPs retransmission norm Resort will be had to not only the drafting history of the TRIPs incorporated Berne Convention article but also to the discipline of economics and to the field of restitutionary monetary awards in common law countries to seek to provide a meaning for that term This book is unique in so far as it purports to undertake to provide an analysis whereby a TRIPs compliance issue is considered fully at a theoretical level in an attempt to provide an answer In so doing it is hoped that the analysis will provide a methodology for the consideration of the compliance of national laws with intellectual property treaty obligations which is of use to anyone who may wish to consider such compliance issues in the future
