

1 Battery and card

Remove the camera from its housing simply by opening the backdoor. Slide the latch over on the battery door and pop in the battery before closing it. On the side you'll find a memory card compartment – open it up and push your Micro SD card into place.

2 Rehouse It's important that you put the housing back on your camera correctly to ensure it's kept waterproof and safe from dust and debris. So slide the camera back into its housing and close the backdoor by snapping the top latch down firmly.

3 Let's get filming To turn the camera on press the Mode button on the front. If you press it again you'll find the folder of modes, where you can flick between filming and photography modes. When you're ready to record, hit the shutter button and tap it again to stop.

New Observations on the Behavior, Ecology, and Biology of Sharks and Rays Austin Gallagher,Emily Lester ,Brendan Shea,2025-08-28 Sharks and rays are a group of ancient ecologically important and highly threatened fishes Their large size high mobility and diversity allow for the assessment of the structure and function of large expanses of the ocean while making them a unique model for assessing how species respond to human induced changes such as climate change Despite the notion that many aspects of their biology and ecology remain poorly understood access to this information has never been greater due to the rapid development of emerging technologies and approaches to study sharks and rays in virtually all areas of the ocean from shallow reefs to deep trenches As the global research effort on sharks and rays continues to expand annually we are also increasing the likelihood of making novel behavioral physiological or molecular discoveries as is the potential to expand or refine known correlates of their biology or ecology These exciting observations shed light on future research efforts and aid in adaptive management and conservation

Digital Ultraviolet and Infrared Photography Adrian Davies,2017-10-03 Digital Ultraviolet and Infrared

Photography discusses the growing number of applications of ultraviolet and infrared photography. Scientific and technical photographers such as those engaged in scientific, medical, forensic, and landscape and wildlife photography routinely use ultraviolet and infrared techniques, and these techniques are growing in use in creative photography. This is the first book to address the application and potential for both ultraviolet and infrared photography in both science and art. The author, Adrian Davies, discusses the how-to of ultraviolet and infrared digital recording with a dissection of techniques, camera requirements, and camera conversion, a useful appendix of resources and equipment currently available, and inspirational image examples throughout. *Digital Ultraviolet and Infrared Photography* is an essential read for photographers using these tools either professionally or creatively.

Unmanned Aerial Vehicle Systems in Crop Production K. R. Krishna, 2019-07-11. This volume responds to the growing interest in adopting aerial robots, UAVs or drones, for agricultural crop production, which are revolutionizing farming methods worldwide. The book provides a detailed review of 250 UAVs that examines their usefulness in enhancing profitability, yield, and quality of crop production. Recent trends indicate an increase in agricultural drone production and use. Millions of dollars have been invested in start-ups that produce agro-drones in the past several years. North America, Europe, China, and the Far East have excelled in offering a large number of UAV models. Some of them are versatile, a few are specific, and many of them are low cost. With so many drone models over 1200 available, how do farmers and agricultural specialists choose the models best for them? This compendium examines the most useful drones and provides the pertinent details about each drone: its producer, cost incurred, and its pros and cons. It covers their technical specifications, suitability for various purposes, previous performances in farms, and possible benefits to farmers. It covers fixed-wing drones, fixed-winged hybrid VTOL helicopters, multi-copters, tilted-wing drones, etc. The book includes a few drones meant more for military or other purposes, e.g., recreation, fun, but that could be easily modified and adapted for the farming sector. The reviews compare activities among the UAVs, such as aerial imagery of crops, ability to provide spectral analyses to collect useful data about a crop's growth patterns, and how they can be used to gauge crop canopy temperature, i.e., water stress index, determine grain maturity, and much more.
