Governance Of Science Issues In Society:

Governance as a Dialogue: Government-Society-Science in Transition Anthony R. Turton, Johanna Hanlie Hattingh, Gillian A. Maree, Dirk J. Roux, Marius Claassen, Wilma F. Strydom, 2007-02-16 The last two decades have been marked by a dramatic increase in global attention to the concept of governance especially in relation to the effective and sustainable management of natural resources During this period issues of water governance have received particular attention for example in relation to the provision of reliable water supplies as a catalyst for poverty eradication Within the context of the Millennium Development Goals and against a backdrop of an increasing frequency of water crises ranging from widespread flooding to severe water scarcity it is essential that each country and particularly those countries that face development challenges should be in a position to ensure that access to water is available to those who need it most This issue has been highlighted by the Global Water Partnership which stated that the water crisis facing the world is in reality a crisis of governance The South African political environment has changed dramatically in recent years and the central concepts of social equity and the right to a healthy environment are now entrenched in the country's Constitution These concepts are supported by several new laws in particular the National Environmental Management Act and the National Water Act which in turn are based on the principles of sustainable development However despite the highly desirable attributes of these landmark pieces of legislation South African authorities are still struggling to implement the requirements of these Acts almost a decade after their promulgation

Best Practices for the Knowledge Society. Knowledge, Learning, Development and Technology for All Miltiadis D. Lytras, Patricia Ordóñez de Pablos, Ernesto Damiani, David Avison, Ambjörn Naeve, David G. Horner, 2009-09-16

It is a great pleasure to share with you the Springer LNCS proceedings of the Second World Summit on the Knowledge Society WSKS 2009 organized by the Open search Society Ngo <http://www.openknowledge.society.org> and held in Samaria Hotel in the beautiful city of Chania in Crete Greece September 16-18 2009 The 2nd World Summit on the Knowledge Society WSKS 2009 was an international scientific event devoted to promoting dialogue on the main aspects of the knowledge society towards a better world for all The multidimensional economic and social crisis of the last couple of years has brought to the fore the need to discuss in depth new policies and strategies for a human centric developmental processes in the global context This annual summit brings together key stakeholders involved in the worldwide development of the knowledge society from academia industry and government including policy makers and active citizens to look at the impact and prospects of information technology and the knowledge based era it is creating on key facets of living working learning innovating and collaborating in today's hyper complex world The summit provides a distinct unique forum for cross disciplinary fertilization of research favoring the dissemination of research on new scientific ideas relevant to international research agendas such as the EU FP7 OECD or UNESCO We focus on the key aspects of a new sustainable deal for a bold response to the multidimensional crisis of our times

The American Society of International Law's First Century Frederic L. Kirgis, Jr., 2006 From the historic launch of the organization by such luminaries as Elihu Root and Charles Evans Hughes to the recent era when international law is more and more in the public realm Kirgis's book traces the evolution of the organization and its relationship to events in the United States and around the world As he says in the preface In the end the reader will have to make his/her own judgment about how well the Society has run the course it set out for itself in 1906 I hope this book will provide a basis for that judgment And of course no judgment at this stage can be final The American Society of International Law will carry on into its second century with new and continuing programs that take into account what it has done in its first one hundred years It will continue to do its best to demonstrate not only what international law is or should be but also that in the words of former ASIL President Louis Henkin international law matters

Bridges between Science, Society and Policy Michael Decker, Miltos Ladikas, 2013-03-09 The Europäische Akademie zur Erforschung von Folgen wissenschaftlich technischer Entwicklungen Bad Neuenahr Ahrweiler GmbH european academy is concerned with the scientific study of the consequences of scientific and technological advance for the individual and social life and for the natural environment The main focus is to examine foreseeable mid and long term processes that are especially influenced by natural and engineering sciences and the medical disciplines The academy fulfills this task by organizing interdisciplinary expert discussions Another important issue of the work of the Europäische Akademie concerns

the methodology of Technology Assessment as a general issue This is the main reason that the European Academy organized during the past two years a project funded by the European Commission on Technology Assessment Methods and Impact TAMI Together with partners from all over Europe a common understanding of what Technology Assessment TA is supposed to do was developed Most importantly it was acknowledged that the core of any TA activity has to be a sound scientific understanding of the relevant phenomena Communication then is of cardinal importance to reach the relevant decision makers as well as the general public It is true that this phase of the TA process has been treated with too little attention for many years The communication processes between scientific advisers and policy makers have hence to be further scrutinized

Science, Technology and Global Governance John R. De La Mothe, 2014-04-23 Science technology and innovation have long been key factors in the competitive advantage of nations Today however the new international political economy is being increasingly driven by science and technology in new ways Integration globalization and internationalization have all become watchwords for a series of dynamic processes in which science and technology are deeply implicated As a result not only are the policies of national governments being exposed in terms of the limits of their sovereignty but science and technology are being increasingly implicated in a wide array of public issues ranging from security privacy development and economic growth to employment environment foreign policy and geopolitics Clearly in today's emerging world the ways in which governments organize their science and technology policy their science and technology intelligence and their research advisory structures and resources matter more today than ever before In turn the contract between science and democracy is being rapidly redefined This book is the first to comprehensively discuss these critical issues Green Transition Impacts on the Economy, Society, and Environment Yıldırım, Seda, Yıldırım, Durmuş Çağrı, Demirtaş, Işıl, Kandpal, Vinay, 2024-08-14 The challenge of achieving sustainability is complex and multifaceted with varying approaches and policies across different countries and industries This lack of universal standards poses a significant obstacle to the global transition towards a sustainable future The COVID 19 pandemic has further exacerbated these disparities highlighting the urgent need for cohesive and practical sustainability strategies What sets Green Transition Impacts on the Economy Society and Environment apart is its comprehensive and unique solution to this pressing issue offering a unified framework for sustainability that can be applied across diverse contexts By gathering insights and approaches from researchers worldwide this book provides a holistic view of sustainability addressing critical issues such as climate change energy security and social responsibility It offers practical solutions and case studies demonstrating effective strategies for achieving sustainability goals Through this approach the book aims to equip policymakers practitioners and researchers with the knowledge and tools needed to navigate the complexities of sustainability in the 21st century Society, Science, and Problem-Solving Courts Full Foundation Professor Interdisciplinary Social Psychology PhD Program and Department of Criminal Justice Monica K Miller, Assistant Professor Department of Criminal Justice Mia A Holbrook, Associate Professor of Psychology Logan A

Yelderman, PhD Student Interdisciplinary Social Psychology PhD Program Kylie Kulak, 2024-12-04 Problem solving courts are special courts that do not simply punish offenders but employ other justice and psychology principles to help solve the underlying social issues that contributed to the crime. The prevalence and practice of problem solving courts vary widely around the world. Society Science and Problem Solving Courts lays out the societal and scientific factors that explain the development of problem solving courts and chart a path for their future.
