The Commodification of Farm Animals Sophie Riley, 2022-02-15 This book examines how the developments in veterinary science philosophy economics and law converged during the nineteenth and early twentieth centuries to entrench farm animals along a commodification pathway It covers two neglected areas of study the importance of international veterinary conferences to domestic regimes and the influence of early global treaties that dealt with animal health on domestic quarantine measures The author concludes by arguing that society needs to reconsider its understanding and the place of the welfare paradigm in animal production systems As it presently stands this paradigm can be used to justify almost any self serving reason to abrogate ethical principles The topic of this book will appeal to a wide readership not only scholars students and educators but also people involved in animal production interested parties and experts in the animal welfare and animal rights sector as well as policy makers and regulators who will find this work informative and thought provoking

Contractarianism, Role Obligations, and Political Morality Benjamin Sachs, 2021-11-17 This book argues that contractarianism is well suited as a political morality and explores the implications of deploying it in this way It promises to revive contractarianism as a viable political theory breaking it free from its Rawlsian moorings while taking seriously the long standing objections to it It's natural to think that the state owes things to its people physical

security public health and sanitation services and a functioning judiciary for example But is there a theory a political morality that can explain why this is so and who the state's people are This new contractarianism deploys a reversed state of nature thought experiment as the starting point of political theorizing From this starting point it develops a political morality a theory of the common ground of the role moralities attached to the various roles within the state Contractarianism so understood can provide a basis for already popular ideas in political theory such as political and legal liberalism and overturn conventional wisdom for example that the state is obligated to secure justice and that animals should have no legal standing Contractarianism Role Obligations and Political Morality will be of interest to scholars and advanced students working in moral and political philosophy

The Political Turn in Animal Ethics Robert Garner, Siobhan O'Sullivan, 2016-09-23 The debate about our treatment of nonhuman animals has been traditionally dominated by moral philosophers and the crucially important role of politics has been hitherto neglected This innovative edited collection seeks to redress the imbalance by interrogating some vital questions about this so called political turn in animal ethics The questions tackled include What can political philosophy tell us about our moral obligations to animals Should the boundaries of the demos be expanded to allow for the inclusion of animals What kind of political system is most appropriate for the protection of animals Does the protection of animals require limits to democracy as in constitutional devices or a usurping of democracy as in direct action What can the work of political scientists tell us about the governance of animal welfare Leading scholars in the field explain how engaging with politics in its empirical and normative guises can throw much needed light on the question of how we treat animals and how we ought to treat them

Animals, Work, and the Promise of Interspecies Solidarity Kendra Coulter, 2016-04-29 In this thought provoking and innovative book Kendra Coulter examines the diversity of work done with by and for animals Interweaving human animal studies labor theories and research and feminist political economy Coulter develops a unique analysis of the accomplishments complexities problems and possibilities of multispecies and interspecies labor She fosters a nuanced multi faceted approach to labor that takes human and animal well being seriously and that challenges readers to not only think deeply and differently about animals and work but to reflect on the potential for interspecies solidarity The result is an engaging expansive and path making text

Humans and Animals: Intersecting Lives and Worlds Anja Höing, Arieahn Matamonasa Bennett, 2019-07-22 This volume was first published by Inter Disciplinary Press in 2016 Relationships between humans and non human animals are deeply complex and often governed by tensions and paradoxes Both wild and domestic metaphorical and real assistants and adversaries animals effortlessly bridge cultural and natural spaces and form an integral part of human lives This volume addresses several currently debated topics in science and culture How shall we rethink rebuild and re envision our relationships with other animals How do we construct ideas of the animal How can we negotiate animal interests against our own In which ways do we make sense and use of animals in human cultural spaces Addressing the non human animal from the standpoint of various social and cultural

constructions from a global and multidisciplinary perspective the chapters within this volume do not seek to answer these questions but rather to draw attention to the complexity of the underlying issues and the manifold dimensions of the animal human bond *Ethical and Political Approaches to Nonhuman Animal Issues* Andrew Woodhall, Gabriel Garmendia da Trindade, 2017-08-28 This book offers ethical and political approaches to issues that nonhuman animals face The recent political turn in interspecies ethics from ethical to political approaches has arisen due to the apparent lack of success of the nonhuman animal movement and dissatisfaction with traditional approaches Current works largely present general positions rather than address specific issues and principally rely on mainstream approaches This book offers alternative positions such as cosmopolitan libertarian and left humanist thought as well as applying ethical and political thought to specific issues such as experimentation factory farming nonhuman political agency and intervention Presenting work by theorists and activists insights are offered from both ethics and politics that impact theory and practice and offer essential considerations for those engaging in interspecies ethics within the political turn era **Sentientist Politics** Alasdair Cochrane, 2018-11-09 There is now widespread agreement that many non human animals are sentient and that this fact has important moral and political implications Indeed most are in agreement that animal sentience ought to constrain the actions of political institutions limiting the harms that can be perpetrated against animals The primary aim of this book is to show that the political implications of animal sentience go even further than this For this book argues that sentience establishes a moral equality and a shared set of rights amongst those creatures who possess it Crucially this worth and these rights create a duty on moral agents to establish and maintain a political order dedicated to their interests This book is devoted to sketching what this sentientist politics might look like It argues in favour of a sentientist cosmopolitan democracy a global political system made up of overlapping local national regional and global communities comprised of human and non human members who exist within shared communities of fate Furthermore the institutions of those communities should be democratic that is to say participative deliberative and representative Finally those institutions should include dedicated representatives of non human animals whose job should be to translate the interests of animals into deliberations over what is in the public good for their communities *Political Theory and the Animal/Human Relationship* Judith Grant, Vincent G. Jungkunz, 2016-03-31 Examines how the animal human divide has influenced power dynamics The division of life into animal and human is one of the fundamental schisms found within political societies Ironically given the immense influence of the animal human divide especially upon power dynamics the discipline in charge of theorizing and studying power political science and theory has had little to say about the animal human This book seeks to amend this vast oversight Acknowledging the complexity of the changing differences between animals and humans the contributors explore such topics as Marx Freud the animal and civilization dog breeding racism and democracy the meaningful silences of animals how sovereignty reconfigures the animal human and the paradoxical struggles against being dehumanized among immigrant workers in a slaughterhouse Political

Theory and the Animal Human Relationship is necessary reading for anyone who wants to understand how power has been influenced by the animal human divide and what we can do about it *Justice and food security in a changing climate* Hanna Schübel,Ivo Wallimann-Helmer,2023-08-14 The UN s Sustainable Development Goals saw the global community agree to end hunger and malnutrition in all its forms by 2030 However the number of chronically undernourished people is increasing continuously Ongoing climate change and the action needed to adapt to it are very likely to aggravate this situation by limiting agricultural land and water resources and changing environmental conditions for food production Climate change and the actions it requires raise questions of justice especially regarding food security These key concerns of ethics and justice for food security due to climate change challenges are the focus of this book which brings together work by scholars from a wide range of disciplines and a multitude of perspectives These experts discuss the challenges to food security posed by mitigation geoengineering and adaptation measures that tackle the impacts of climate change Others address the consequences of a changing climate for agriculture and food production and how the Covid 19 pandemic has affected food security and animal welfare Animal Labour Charlotte E. Blattner,Kendra Coulter,Will Kymlicka,2020 Animals do a wide range of work in our society but they are rarely recognized as workers or accorded any labour rights and their working conditions are often oppressive and exploitative Drawing on law ethics and labour studies the essays in this volume explore the potential and dangers of animal labour *At Home and Astray* Philip Howell,2015-04-13 Although the British consider themselves a nation of dog lovers what we have come to know as the modern dog came into existence only after a profound and relatively recent transformation in that country s social attitudes and practices In *At Home and Astray* Philip Howell focuses on Victorian Britain and especially London to show how the dog s changing place in society was the subject of intense debate and depended on a fascinating combination of forces even to come about Despite a relationship with humans going back thousands of years the dog only became fully domesticated and installed at the heart of the middle class home in the nineteenth century Dog breeding and showing proliferated at that time and dog ownership increased considerably At the same time the dog was increasingly policed out of public space the stray becoming the unloved counterpart of the household pet Howell shows how this redefinition of the dog s place illuminates our understanding of modernity and the city He also explores the fascinating process whereby the dog s changing role was proposed challenged and confronted and in the end conditionally accepted With a supporting cast that includes Charles Dickens Elizabeth Barrett Browning Thomas Carlyle and Charles Darwin and subjects of inquiry ranging from vivisection and the policing of rabies to pet cemeteries dog shelters and the practice of walking the dog *At Home and Astray* is a contribution not only to the history of animals but also to our understanding of the Victorian era and its legacies Saving Animals, Saving Ourselves Jeff Sebo,2022 In 2020 COVID 19 the Australia bushfires and other global threats served as vivid reminders that human and nonhuman fates are increasingly linked Human use of nonhuman animals contributes to pandemics climate change and other

global threats which in turn contribute to biodiversity loss ecosystem collapse and nonhuman suffering Both an urgent call to action and a survey of what ethical and effective action will require this book will be invaluable for scholars advocates policy makers and anyone interested in what kind of world we should attempt to build and how

Livestock Erin McKenna, 2018 Most livestock in America currently live in cramped and unhealthy confinement have few stable social relationships with humans or others of their species and finish their lives by being transported and killed under stressful conditions In *Livestock* Erin McKenna allows us to see this situation and presents alternatives She interweaves stories from visits to farms interviews with producers and activists and other rich material about the current condition of livestock In addition she mixes her account with pragmatist and ecofeminist theorizing about animals drawing in particular on John Dewey's account of evolutionary history and provides substantial

historical background about individual species and about human animal relations This deeply informative text reveals that the animals we commonly see as livestock have rich evolutionary histories species specific behaviors breed tendencies and individual variation just as those we respect in companion animals such as dogs cats and horses To restore a similar level of respect for livestock McKenna examines ways we can balance the needs of our livestock animals with the environmental and social impacts of raising them and she investigates new possibilities for human ways of being in relationships with animals This book thus offers us a picture of healthier more respectful relationships with livestock
