Mitra,Marcelo Selowski,Juan F. Zalduendo,2009-10-30 The transition economies of Central and Eastern Europe and the former Soviet Union among all emerging and developing economy regions have been hardest hit by the global economic crisis of 2008 09 This is partly due to the region s deep integration into the global economy across many dimensions trade financial and labor flows Attempts by countries that came later to the transition to catch up rapidly to Western European living standards at a time when global liquidity was unusually abundant together with some policy weaknesses made them vulnerable to reversals in market sentiment Written on the eve of the twentieth anniversary of the fall of the Berlin Wall Turmoil at Twenty analyzes the run up to the current crisis and addresses a number of key questions related to vulnerability to the recession expected recovery and necessary reforms in the region Did the transition from command to market economies and the period during which this took place plant the seeds of vulnerability that made transition countries more prone to crisis than other developing countries Did the choices made on the road from plan to market shape the ability of crisis hit countries to recover What combination of domestic policy reform and international collective action is needed to bring about a recovery and minimize the humanitarian cost of the crisis What structural reforms are needed today to address the most binding constraints on growth in a world where capital fl ows to transition and developing countries are expected to be considerably lower than before the crisis Turmoil at Twenty will be of interest to policy makers and their advisers researchers and students of economics who seek lessons from the current economic crisis as well as scholars of the transition China Studies In South And Southeast Asia: Between Pro-china And Objectivism Chih-yu Shih,Prapin Manomaivibool,Reena Marwah,2018-08-13 The rise of China has reconstituted the regional identity in Asia as

well as the lens through which understanding of China and self understanding are no longer separate processes intellectually China scholarship in South and Southeast Asia necessarily highlights meanings of encountering China that Western social sciences fail to reflect because academics in many places being migrants navigate and combine more than one civilization forces With China in itself undergoing transformation it is unlikely that one can simply speak of China without multiple qualifications of what one actually refers to The book gathers authors who come from different scholarly traditions to reflect upon how the presentation of China in academic writings as well as think tank analyses can engender different identity possibilities The book therefore complicates the category China to enable mutual empathy between everything that in one way or another relies on Chineseness as object or subject in accordance with the identity strategies of the China experts

Gender and Fair Assessment Warren W. Willingham,Nancy S. Cole,2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience
