Journey to the Blue Planet - Book I Charlene Haupt, 2024-07-16 Rodane Arcos is a renowned archaeologist who is about to have the knowledge of a world he's always known and explored upended Most people are unaware that we have had a presence of an alien population going back 250 000 years They have peacefully embedded themselves in our world raised their families and joined with us in every way Their families with their advanced technology and their influence are a part of every culture in most established populations Uncovering this would threaten the very foundation of our facts of human evolution and all existing cultures Even historians scientists and archaeologists cannot agree on a rational explanation for numerous mysteries that still astound us They have continued questioning many of those finds for centuries Rodane's new education now repudiates some of the major findings he has always thought of as humanity's great advances Earth is at a nexus between what man and our world really are and what most people believe they are The results revealed can be catastrophic or healing and beneficial to all Time is now their enemy in some respects because with time comes new revelations new discoveries new questions that could point a finger at all the anomalies of which historians and archeologists are aware but seek reliable answers Those mysteries continue and those finds are becoming more and more suspect To make matters worse there are those who are renegades from some unsuccessful landings and have been trying for centuries to undo and collect what the others have used to help our world and all its people to move forward There are factions trying to collapse this mixed population expose it and use any means to do so even to the detriment of the entire planet and all living things here He and his family as well as many others are now in danger as long as they cannot find the ones responsible for attempts to undo all the good and bring disasters to the entire earth The danger rises to the highest ranks of government everywhere and all living standards in every culture It could all fall apart in an instant Or it could bring out the best in all mankind

Cultivating an Ethical School Robert J. Starratt, 2012 Often the school is left as an institution

seemingly ethically neutral leaving untouched questions about whether the school itself is a site of injustice toward both educators and children Springing from his well known Building an Ethical School Robert J Starratt now looks more closely at the educational leader s responsibility to ensure that the whole fabric of the educational process reflects an ethical philosophy of education Starratt argues that the work of educating young people is by its very nature an ethical work as well as an intellectual work and that this work inescapably engages educators and their pupils with an academic curriculum a social curriculum and a civic curriculum Cultivating an Ethical School lays a foundation for educators seeking to cultivate a comprehensive ethical educating environment The second half of the book then takes up the more specific perspectives on teaching and learning that constitute the heart of cultivating an ethical school Starratt provides examples of how an ethical school can expose students to a variety of perspectives on the challenges they will be called upon to face in the worlds of culture nature and society This valuable book shows leaders and educators the importance of organizing a curriculum and a pedagogy that simultaneously respect and cultivate the intellectual personal and social qualities of being human

The Knowledge Gap Natalie Wexler, 2020-08-04 Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America s education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country s frustrating lack of progress when it comes to providing every child with a quality education The problem wasn t one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum s intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff s The Prize and Dana Goldstein s The Teacher Wars Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But The Knowledge Gap isn t just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention
