Emotional Labour and Lesson Observation Ursula Edgington, 2016-11-21 This book presents research on emotion work and the emotional labour of teaching and learning based in England's further education sector where an increasing emphasis on marketised systems means accountability and audit cultures have become embedded within everyday teaching practice. Uniquely this book explores micro level issues of the managerial policies relating to classroom lesson observations as well as the profoundly emotional philosophical aspects of these situations which research asserts cause stress and anxiety for many staff. Drawing on theoretical psychosocial concepts exploring the interplay of hidden or underground micro and macro elements of teaching and learning contexts the book illuminates how the presence of an observer fundamentally alters the dynamics of a classroom. The author argues that it is not necessarily the performativity that creates the stress and anxiety in an observation but the individual's perception of this performativity and how it relates to a wider consideration of their emotional labour in the classroom. For this reason the book puts forward a case for ending the formal graded method of lesson observations in favour of a developmental holistic approach that is sensitive to the emotional nuances of the individuals involved as well as the social and historical contexts of the institutions in which they are situated. The diverse use of lesson observations as a tool for staff development and quality assurance policies make this a valuable resource for educational researchers policy makers teachers and managers from many different sectors and backgrounds. This first handbook on Ethiopian Public Administration is written by Ethiopian academics and practitioner academics and builds on PhD studies and conference papers including studies presented at the meetings of the Ethiopian Public Administration Association EPAA established in 2016. Public Administration in Ethiopia presents a wide range of timely issues in four thematic parts: Governance, Human Resources, Performance and Quality, and Governance of Policies. Each of the individual chapters in this volume contributes in a different way to the overarching research questions: How can we describe and explain the contexts, the processes and the results of the post 1990 politico-administrative reforms in Ethiopia? And what are the implications for sustainable development? This book is essential for students, practitioners and theorists interested in public administration, public policy and sustainable development. Moreover, the volume is a valuable stepping stone for PA teaching and PA research in Ethiopia. **The Trustee Governance Guide** Christopher K. Merker, Sarah W. Special Administrative Region highlights that it has developed a sound framework for the regulation of securities markets which exhibits a high level of implementation of the International Organization of Securities Commissions Principles. Both the Securities and Futures Commission (SFC) and the Hong Kong Monetary Authority (HKMA) are sophisticated regulators and have been able to leverage from domestic and international expertise to develop sound supervisory practices. Further, while traumatic the Lehman minibond experience has led to material improvements in conduct supervision that have permeated both the SFC and the HKMA. Continuing efforts by the SFC to build up its capacity to identify and monitor emerging risks should increase the SFC's ability to react in a timely manner to an evolving landscape marked by an increased interconnection with the Mainland China, an active presence by international players and increased regional competition as an international finance center. It is important to consider translating the operational independence that the regulators have enjoyed into de jure independence through modifications in the current legal governance arrangements for both SFC and HKMA.
