Harmonic Maps Into Homogeneous Spaces Chapman Hallcrc Research Notes In Mathematics Series:

Harmonic Maps Into Homogeneous Spaces Malcolm Black,1991-09-02 This book is concerned with harmonic maps into homogeneous spaces and focuses upon maps of Riemann surfaces into flag manifolds to bring results of twistor methods for symmetric spaces into a unified framework by using the theory of compact Lie groups and complex differential geometry

Harmonic Maps Between Riemannian Polyhedra James Eells,B. Fuglede,2001-07-30 Harmonic maps between smooth Riemannian manifolds play a ubiquitous role in differential geometry Examples include geodesics viewed as maps minimal surfaces holomorphic maps and Abelian integrals viewed as maps to a circle The theory of such maps has been extensively developed over the last 40 years and has significant applications throughout mathematics This 2001 book extends that theory in full detail to harmonic maps between broad classes of singular Riemannian polyhedra with many examples being given The analytical foundation is based on existence and regularity results which use the potential theory of Riemannian polyhedral domains viewed as Brelot harmonic spaces and geodesic space targets in the sense of Alexandrov and Busemann The work sets out much material on harmonic maps between singular spaces and will hence serve as a concise source for all researchers working in related fields **Mathematical Reviews** ,2005 Harmonic Analysis and Integral Geometry Massimo Picardello,2000-09-07 Comprising a selection of expository and research papers Harmonic Analysis and Integral Geometry grew from presentations offered at the July 1998 Summer University of Safi Morocco an annual advanced research school and congress This lively and very successful event drew the attendance of many top researchers who offered both individual lectures and coordinated courses on specific research topics within this fast growing subject Harmonic Analysis and Integral Geometry presents important recent advances in the fields of Radon transforms integral geometry and harmonic analysis on Lie groups and symmetric spaces Several articles are devoted to the new theory of Radon transforms on trees With its related presentations addressing recent developments in various aspects of these intriguing areas of study Harmonic Analysis and Integral Geometry becomes an important addition not only to the Research Notes in Mathematics series but to the general mathematics literature *Harmonic Analysis and Integral Geometry* Massimo Picardello,

Harmonic Maps with Symmetry, Harmonic Morphisms, and Deformations of Metrics Paul Baird,1983 The aim of this book is to construct harmonic maps between Riemannian manifolds and in particular between spheres These maps have a delightful geometry associated with them they preserve families of level hypersurfaces of constant mean curvature New maps between Euclidean spheres are constructed as well as harmonic maps from hyperbolic space to sphere and from Euclidean space to sphere The author makes considerable use of the stress energy tensor which has not previously been used in the context of harmonic maps In particular it is used to solve the rendering problem for certain classes of maps between spheres back cover *Harmonic Analysis on Homogeneous Spaces* Nolan R. Wallach,1973 *Lectures on Harmonic Maps* Richard M. Schoen,Shing-Tung Yau,1997 A presentation of research on harmonic maps based on lectures given at the

University of California San Diego Schoen has worked to use the Fells Sampson theorem to reprove the rigidity theorem of Masfow and superrigidity theorem of Marquis Many of these developments are recorded here [Equivariant harmonic maps into homogeneous spaces](#) Caio J. Negreiros,1989 *Selected Topics in Harmonic Maps* James Eells,Luc Lemaire,1983-01-01 **Harmonic Maps with Symmetry, Harmonic Morphisms and Deformations of Metrics** P. Baird,1986-05 **Harmonic Maps and Integrable Systems** John C. Wood,2013-07-02 **Harmonic Analysis on Homogeneous Spaces** Calvin C. Moore,1978 *Developments of Harmonic Maps, Wave Maps and Yang-Mills Fields into Biharmonic Maps, Biwave Maps and Bi-Yang-Mills Fields* Yuan-Jen Chiang,2013-06-18 Harmonic maps between Riemannian manifolds were first established by James Eells and Joseph H Sampson in 1964 Wave maps are harmonic maps on Minkowski spaces and have been studied since the 1990s Yang Mills fields the critical points of Yang Mills functionals of connections whose curvature tensors are harmonic were explored by a few physicists in the 1950s and biharmonic maps generalizing harmonic maps were introduced by Guoying Jiang in 1986 The book presents an overview of the important developments made in these fields since they first came up Furthermore it introduces biwave maps generalizing wave maps which were first studied by the author in 2009 and bi Yang Mills fields generalizing Yang Mills fields first investigated by Toshiyuki Ichiyama Jun Ichi Inoguchi and Hajime Urakawa in 2008 Other topics discussed are exponential harmonic maps exponential wave maps and exponential Yang Mills fields **Harmonic Analysis on Homogeneous Spaces. Harmonic Maps Into Homogenous Spaces Malcolm Black,2018 **Selected Topics in Harmonic Maps** James Eells,Luc Lemaire,Conference Board of the Mathematical Sciences,1983 Gives an account of the various aspects of the theory of harmonic maps between Riemannian manifolds This book presents an exposition of the qualitative aspects of harmonic maps It also proposes certain unsolved problems together with comments and references which are of widely varying difficulty *Harmonic Maps: Selected Papers By James Eells And Collaborators* James Eells,1992-08-21 These original research papers written during a period of over a quarter of a century have two main objectives The first is to lay the foundations of the theory of harmonic maps between Riemannian Manifolds and the second to establish various existence and regularity theorems as well as the explicit constructions of such maps *Geometric and Harmonic Analysis on Homogeneous Spaces* Ali Baklouti,Takaaki Nomura,2019-08-31 This book presents a number of important contributions focusing on harmonic analysis and representation theory of Lie groups All were originally presented at the 5th Tunisian Japanese conference Geometric and Harmonic Analysis on Homogeneous Spaces and Applications which was held at Mahdia in Tunisia from 17 to 21 December 2017 and was dedicated to the memory of the brilliant Tunisian mathematician Majdi Ben Halima The peer reviewed contributions selected for publication have been modified and are without exception of a standard equivalent to that in leading mathematical periodicals Highlighting the close links between group representation theory and

harmonic analysis on homogeneous spaces and numerous mathematical areas such as number theory algebraic geometry differential geometry operator algebra partial differential equations and mathematical physics the book is intended for researchers and students working in the area of commutative and non commutative harmonic analysis as well as group representations
