Documentary History of the Truman Presidency Dennis Merrill, 2001

The First Atomic Bomb Jim Mangi, 2022-06-20 While German and Japanese scientists also labored unsuccessfully to create an atomic bomb by the summer of 1945 the American led team was ready to test its first weapon As the clock ticked down to the detonation time of 05 30 hours on 16 July 1945 the nervous team of technicians and scientists waited ten miles away from Ground Zero deep in the New Mexico desert No one knew how powerful the explosion would be or whether even at such a distance they would be safe from the blast Even so some chose to observe the detonation from a point four miles nearer at the control bunker but then no one was even sure that the bomb would work What if that is actually what happened Under schedule pressure from the White House the scientists assembled the device in part with tape and tissue paper knowing some components were flawed These are verifiable facts It means that as many of those who gathered in the New Mexico desert feared at the time the bomb might not have worked during that first test In The First Atomic Bomb Jim Mangi explores what might happened in the event that the world's first atomic bomb had not been ready for use when it was How would this have affected the end of the war in the Pacific and indeed the Second World War as a whole Would Emperor Hirohito's armed forces have battled on When might Colonel Paul W Tibbets at the controls of his Boeing B 29 Superfortress Enola Gay have then made his historic flight over Hiroshima and would that city even have remained the target How would Stalin and the Soviets have reacted to such developments and how would this have played out in the post war world
