**After the Education Wars** Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers. After the Education Wars helps us to see a better way forward. Cathy N Davidson, The New York Times Book Review. After the Education Wars is an important book that points the way to genuine reform. Diane Ravitch, author of *Reign of Error* and *The Death and Life of the Great American School System*. A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler, more democratic entrepreneurialism. In an entirely fresh take on school reform, business journalist and bestselling author Andrea Gabor argues that Bill Gates, Eli Broad, and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world. After the Education Wars explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well. These rich, detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up. Lessons also learned from both the open source software and quality movements. The good news is that solutions born of this philosophy are all around us. From Brockton, Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander, Texas, a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life. A welcome exception to the doom and gloom canon of education reform. After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools.

**Grading for Growth** David Clark, Robert Talbert, 2023-07-03 Are you satisfied with your current and traditional grading system? Does it accurately reflect your students' learning and progress? Can it be gamed? Does it lead to grade grubbing and friction with your students? The authors of this book, two professors of mathematics with input from colleagues across disciplines and institutions, offer readers a fundamentally more effective and authentic approach to grading that they have implemented for over a decade. Recognizing that traditional grading penalizes students in the learning process by depriving them of the formative feedback that is fundamental to improvement, the authors offer alternative strategies that encourage revision and growth. Alternative grading is concerned with students' eventual level of understanding. This leads to big changes. Students take time to review past failures and learn from them. Conversations shift from "why did I lose a point for this?" to productive discussions of content and process. Alternative grading can be used successfully at any level in any situation and any discipline in classes that range from seminars to large multi-section lectures. This book offers a comprehensive introduction

to alternative grading beginning with a framework and rationale for implementation and evidence of its effectiveness The heart of the book includes detailed examples including variations on Standards Based Grading Specifications Grading and ungrading of how alternative grading practices are used in all kinds of classroom environments disciplines and institutions with a focus on first hand accounts by faculty who share their practices and experience The book includes a workbook chapter that takes readers through a step by step process for building a prototype of their own alternatively graded class and ends with concrete practical time tested advice for new practitioners The underlying principles of alternative grading involve Evaluating student work using clearly defined and context appropriate content standards Giving students helpful actionable feedback Summarizing the feedback with marks that indicate progress rather than arbitrary numbers Allowing students to revise without penalty using the feedback they receive until the standards are met or exceeded This book is intended for faculty interested in exploring alternative forms of learning assessment as well as those currently using alternative grading systems who are looking for ideas and options to refine practice Cigarette Smoking and Lung Obstruction Among Adults Aged 40-79 Ryne Paulose-Ram,2015

**Problem-Solving Courts, Criminal Justice, and the International Gold Standard** Anna Kawałek,2021-01-03 This book presents findings from a process evaluation carried out at a problem solving court located in England Manchester Review Court Unlike the widely documented successes of similar international models there is no detail of Manchester Review Court in the accessible literature not in any policy document nor is there a court handbook or website outlining objectives and expected practice In adopting the seminal wine and bottle analytical framework propounded by therapeutic jurisprudence scholars and by carrying out a detailed comparative analysis comparing the court to successful international problem solving courts the original empirical data brings clarity to an overlooked area A fidelity analysis is also offered for the forerunning English and Welsh drug courts which were established during the early 2000s but then shortly fell by the wayside without satisfactory explanation for why Findings from the book shed new light on the causes of the English and Welsh drug court downfalls pending recent calls to roll out a fresh suite of problem solving courts In light of the international evidence base and national struggles in the field the book proposes a renewed UK specific fidelity matrix to forge the impetus for new practice in this area whilst accounting for past failures and acknowledging current issues Therefore this book not only breaks new ground by advancing knowledge of a significantly uncharted area but provides important inroads for helping policymakers with their strategies in tackling recidivism addiction victimisation and austerity as widespread social and human issues currently facing both Manchester and the UK more broadly Presenting significant advancements in theory policy and practice at both national and international scale the book will be a valuable resource for academics and practitioners working in the fields of Therapeutic Justice Criminal Law Criminology Criminal Justice and Socio Legal Studies **Captivating Technology** Ruha Benjamin,2019-06-07 The contributors to Captivating Technology examine how carceral technologies such as electronic ankle monitors and predictive policing algorithms are being deployed to classify

and coerce specific populations and whether these innovations can be appropriated and reimaged for more liberatory ends
