How Chinese Acquire and Improve Mathematics Knowledge for Teaching Yeping Li, Rongjin Huang, 2018-05-16. While the importance of knowledge for effective instruction has long been acknowledged and the concept and structure of mathematics knowledge for teaching are far from being new, the process of such knowledge acquisition and improvement remains underexplored empirically and theoretically. The difficulty can well associate with the fact that different education systems embody different values for what mathematics teachers need to learn and how they can be assisted to develop their knowledge. To improve this situation with needed consideration about a system context and policies, *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* takes a unique approach to present new research that views knowledge acquisition and improvement as part of teachers' life long professional learning process in China. The book includes such chapters that can help readers to make possible connections of teachers' mathematical knowledge for teaching in China with educational policies and program structures for mathematics teacher education in that system context. *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* brings invaluable inspirations and insights to mathematics educators and teacher educators who wish to help teachers improve their knowledge and to researchers who study this important topic beyond a static knowledge conception.

On Unemployment, Volume II Mark R. Reiff, 2015-10-07. With unemployment at historically high rates that show signs of becoming structural, there is a pressing need for an in depth exploration of this economic injustice.

Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book s various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology

 scientists and patients have long grappled with the dubious nature of certainty in medical practice To help navigate the
 chaos caused by ongoing bodily change we rely on scientific reductions and deductions We take what we know now and make
 best guesses about what will be But bodies in flux always outpace the human gaze Particularly in cancer care processes deep
 within our bodies are at work long before we even know where to look In the face of constant biological and technological
 change how do medical professionals ultimately make decisions about care Bodies in Flux explores the inventive ways
 humans and nonhumans work together to manufacture medical evidence Each chapter draws on rhetorical theory to
 investigate a specific scientific method for negotiating medical uncertainty in cancer care including evidential visualization
 assessment synthesis and computation Case studies unveil how doctors rely on visuals when deliberating about a patient s
 treatment options how members of the FDA use inferential statistics to predict a drug s effectiveness how researchers
 synthesize hundreds of clinical trials into a single evidence based recommendation and how genetic testing companies
 compute and commoditize human health Teston concludes by advocating for an ethic of care that pushes back against the
 fetishization of certainty an ethic of care that honors human fragility and bodily flux **Catalog of Federal Domestic**
