3. If the brake discs are misaligned or in the wrong locations, proceed as follows:

- Remove the front wheel. Remove both brake discs from hub.
- Place the inboard sides of the brake discs together. Be sure the stampings (minimum thickness, part number and location) on both brake discs are on the outboard side.
- Rotate discs as necessary until all vent holes are in alignment. Holding brake discs aligned, use a magic marker or paint pen to make a line across the edge of both brake discs.
- Keeping the paint marks aligned, install brake discs to hub using new screws. Alternately tighten screws to 16-24 ft-lbs (22-33 Nm). Be sure that the brake disc stamped P/N 44156-00 LEFT is installed on the right side of the hub (valve stem side), and the brake disc stamped P/N 44136-00 RIGHT is installed on the left side of the hub.
- Verify that the paint marks on the edges of the brake discs are still aligned. A long Phillips screwdriver or straight piece of drill rod can be inserted straight through the vent holes of both the left and right brake discs when correctly aligned. See Figure 2-10.
