SHARMA, 2009-12 This book presents the fundamentals for developing more reliable demand plans and schedules It also shows what is necessary to build successful tradition partner relationships for demand collaboration This book defines what is reasonable to expect from a demand management process It is our hope that the lesson shared in the book will stimulate improvements on how demand management is applied in your company and in the supply chains in which your company operates **Human Resource Management Practices in Selected Ethiopian Private Companies: A Study to Increase Employee Productivity in Ethiopia** Dirk J. van Wasbeek, 2004-09-24 This dissertation examines how human resources are managed at selected Ethiopian private companies how Ethiopian human resource management practice is evolving and how it can be improved The examination is qualitative and exploratory since no comparative research on human resource management has yet been conducted at Ethiopian profit or non profit organizations An understanding of Ethiopian human resource management practice makes it possible to improve Ethiopian human resource management practice and thus to increase employee productivity The study took place at four manufacturing and four service companies in Addis Ababa all representative of their

sector The research claim is that Ethiopian human resource management practices differ from human resource management practices in the West due to differences in cultural factors economic systems political systems and legal and industrial relations For this reason Ethiopia s culture politics economy and legal and industrial relations have been analyzed The main finding of this study is that the importance of human resource management is not uniformly understood at all the case study companies Although the multinational companies based in Ethiopia see their human resources as the companies most important asset as human capital the local companies generally do not The fact that respondents claim that Ethiopia has limited experience in industrialization might explain why human resource management in Ethiopia is rudimentary and still has a long way to go With this dissertation the researcher wants to contribute to improving Ethiopian human resource management practice Moreover this dissertation may be used as a framework for similar research in other sectors or for more specific in depth research This dissertation may also serve as a knowledge base for company managers business consultants academics and government officials of countries with a national culture similar to Ethiopia s for example Kenya Tanzania and Zambia countries undergoing or which have undergone a recent transition to a free market economy and countries facing similar macro economic developments

The Strategy Paradox Michael E. Raynor, 2007-02-20 A compelling vision Bold leadership Decisive action Unfortunately these prerequisites of success are almost always the ingredients of failure too In fact most managers seeking to maximize their chances for glory are often unwittingly setting themselves up for ruin The sad truth is that most companies have left their futures almost entirely to chance and don't even realize it The reason Managers feel they must make choices with far reaching consequences today but must base those choices on assumptions about a future they cannot predict It is this collision between commitment and uncertainty that creates THE STRATEGY PARADOX This paradox sets up a ubiquitous but little understood tradeoff Because managers feel they must base their strategies on assumptions about an unknown future the more ambitious of them hope their guesses will be right or that they can somehow adapt to the turbulence that will arise In fact only a small number of lucky daredevils prosper while many more unfortunate but no less capable managers find themselves at the helms of sinking ships Realizing this even if only intuitively most managers shy away from the bold commitments that success seems to demand choosing instead timid unremarkable strategies sacrificing any chance at greatness for a better chance at mere survival Michael E Raynor coauthor of the bestselling The Innovator's Solution explains how leaders can break this tradeoff and achieve results historically reserved for the fortunate few even as they reduce the risks they must accept in the pursuit of success In the cutthroat world of competitive strategy this is as close as you can come to getting something for nothing Drawing on leading edge scholarship and extensive original research Raynor's revolutionary principle of Requisite Uncertainty yields a clutch of critical counter

intuitive findings Among them The Board should not evaluate the CEO based on the company's performance but instead on the firm's strategic risk profile The CEO should not drive results but manage uncertainty Business unit leaders should not focus on execution but on making strategic choices Line managers should not worry about strategic risk but devote themselves to delivering on commitments With detailed case studies of success and failure at Sony Microsoft Vivendi Universal Johnson Johnson AT T and other major companies in industries from financial services to energy Raynor presents a concrete framework for strategic action that allows companies to seize today's opportunities while simultaneously preparing for tomorrow's promise

Strategic Management and Drivers of Success Surja Datta,Tobias Kutzewski,2024-08-22 Strategy is essentially about achieving organisational success Growth Adaptation Resilience and Competition GARC is a general framework that helps organisations think creatively about attaining success and acknowledges the reality that there is no one single criteria for success What drives and defines organisational success Using the path breaking GARC framework this book provides an answer to this important question Combining practice with theory the reversal of the conventional theory with practice idea being intentional one of the standout features of this book is that it articulates business heuristics for each of the drivers of success along with guidelines on how to use them To illustrate the empirical grounding of the theoretical aims the authors connect multiple real life business cases to each of the four GARC dimensions This book will therefore be of value to researchers academics practitioners and advanced students in the fields of strategy organisational studies and management

The Management Shift V. Hlupic,2014-10-29 Research shows that corporate life expectancy and performance have declined 75% in the last 50 years organizations need a different approach if they are to survive let alone thrive While people are often stated as a company's greatest asset few businesses have a clear model of leadership that improves engagement removes barriers to innovation and uncovers hidden strengths in people and the organization This book addresses that need and more importantly demonstrates HOW organizations can make The Management Shift to a new way of thinking and working Professor Hlupic argues that organizations now need to adopt a leadership style that focuses on people purpose and knowledge sharing creating new types of value and ultimately improving innovation and engagement leading to improved business Based on leading edge research supported by numerous case studies which demonstrate the power and impact of change The Management Shift offers managers a practical and systemic approach to diagnose leadership issues in their organization It then provides an implementation process to shift their mindset and organizational culture to the new level of thinking performance and ultimately business success

What Is So Real About Real Options, and Why Are They Optional? Johnathan Mun,2011-09-14 In the past corporate investment decisions were cut and dried Buy a new machine that is more efficient make more products costing a certain amount and if the benefits outweigh the costs execute the investment Hire a larger pool of sales associates expand the current geographical area and if the marginal increase in forecast sales revenues exceeds the additional salary and implementation costs start

hiring Need a new manufacturing plant Show that the construction costs can be recouped quickly and easily by the increase in revenues the plant will generate through new and improved products and the initiative is approved However real life business conditions are a lot more complicated Your firm decides to go with an e commerce strategy but multiple strategic paths exist Which path do you choose What are the options you have If you choose the wrong path how do you get back on the right track How do you value and prioritize the paths that exist You are a venture capitalist firm with multiple business plans to consider How do you value a start up firm with no proven track record How do you structure a mutually beneficial investment deal What is the optimal timing to a second or third round of financing This chapter provides a novel approach to applying real options to answering these issues and more
