Farm Sanctuary Gene Baur, 2008-03-04 Leading animal rights activist Gene Baur examines the real cost of the meat on our plates for both humans and animals alike in this provocative and thorough examination of the modern farm industry Many people picture cows sheep pigs and chickens as friendly creatures who live happily within the confines of a peaceful family farm arriving as food for humans only at the end of their sun-drenched lives That's what Gene Baur had been told but when he first visited a stockyard he realized that this rosy depiction couldn't be more inaccurate Amid the stench noise and filth his attention was drawn in particular to one sheep who had been cast aside for dead But as Baur walked by the sheep raised her head and looked right at him She was still alive and the one thing Baur knew for sure that day was that he had to get her to safety Hilda as she was later named

was nursed back to health and soon became the first resident of Farm Sanctuary an organization dedicated to the rescue care and protection of farm animals The truth is that farm production does not depend on the family farmer with a small herd of animals but instead resembles a large assembly line factory Animals raised for human consumption are confined for the entirety of their lives and often live without companionship fresh air or even adequate food and water Viewed as production units rather than living beings with feelings ten billion farm animals are exploited specifically for food in the United States every year In Farm Sanctuary Baur provides a thoughtprovoking investigation of the ethical questions involved in the production of beef poultry pork milk and eggs and what each of us can do to stop the mistreatment of farm animals and promote compassion He details the triumphs and the disappointments of more than twenty years on the front lines of the animal protection movement And he introduces sanctuary us to some of the special creatures who live at Farm Sanctuary from Maya the cow to Marmalade the chicken all of whom escaped horrible circumstances to live happier more peaceful lives Farm Sanctuary shows how all of us have an opportunity and a responsibility to consume a kinder plate making a better life for ourselves and animals as well You will certainly never think of a hamburger or chicken breast the same way after reading this book

[The Climate Diet](#) Jonathan Harrington,2012-05-04 The atmosphere is getting fat on our carbon and other greenhouse gas emissions and it needs our help We live in a world of excess consuming too much of everything food clothes cars toys shoes bricks and mortar Our bingeing is often so extreme that it threatens our own health and wellbeing And we are not the only ones who are getting sick The Earth which provides the food air water and land that sustains us is also under severe pressure We either take steps to put our personal and planetary systems back into balance or we suffer the consequences So what does any unhealthy overweight person do when the doctor tells him or her that they are eating themselves into an early grave Go on a diet This is the must have guide to the most important diet ever explaining climate change concepts problems and solutions in ways that anyone can easily understand Following a six step climate diet plan families will be able to count their carbon calories and learn how to reduce them leaving us with a slim healthy planet now and for the future
