Safe Space Christina B. Hanhardt, 2013-12-04 Winner 2014 Lambda Literary Award in LGBT Studies. Since the 1970s a key goal of lesbian and gay activists has been protection against street violence, especially in gay neighborhoods. During the same time, policymakers and private developers declared the containment of urban violence to be a top priority. In this important book, Christina B. Hanhardt examines how LGBT calls for safe space have been shaped by broader public safety initiatives that have sought solutions in policing and privatization and have had devastating effects along race and class lines. Drawing on extensive archival and ethnographic research in New York City and San Francisco, Hanhardt traces the entwined histories of LGBT activism, urban development, and U.S. policy in relation to poverty and crime over the past fifty years. She highlights the formation of a mainstream LGBT movement as well as the very different trajectories followed by radical LGBT and queer grassroots organizations. Placing LGBT activism in the context of shifting liberal and neoliberal policies, *Safe Space* is a groundbreaking exploration of the contradictory legacies of the LGBT struggle for safety in the city.

The Globalization of Hate Jennifer Scheppe, Mark Austin Walters, 2016-05-25 *The Globalization of Hate: Internationalizing Hate Crime* is the first book to examine the impact of globalization on our understanding of hate speech and hate crime. Bringing together internationally acclaimed scholars with researchers, policy makers, and practitioners from across the world, it critically scrutinises the concept of hate crime as a global phenomenon, seeking to examine whether hate crime can or should be conceptualised within an international framework and if so, how this might be achieved. Beginning with the global dynamics of hate, the contributors analyse whether hate crime can be defined globally, whether universal principles can be applied to the phenomenon, how hatred is spread, and how it impacts upon our global society. The middle portion of the book moves beyond the broader questions of globalisation to jurisdictional examples of how globalization impacts upon our understanding of and also our responses to hate crime. The chapters explore in greater detail what is happening around the world and how the international concepts of hate crime are being operationalised locally, drawing out the themes of globalization and internationalization that are relevant to hate crime as evidenced by a number of jurisdictions from Europe, the US, Asia, and Africa. The final part of the book concludes with an examination of the different ways in which hate speech and hate crime is being combatted globally. International law, internet regulation, and the use of restorative practices are evaluated as methods of addressing hate-based conflict, with the discussions drawn from existing frameworks as well as exploring normative standards for future international efforts. Taken together, these innovative and insightful contributions offer a timely investigation into the effects of hate crime, offering an interdisciplinary approach to

tackling what is now a global issue It will be of interest to scholars and students of criminology sociology and criminal justice as well as criminal justice practitioners police officers and policy makers Opposing Hate Speech Anthony

Cortese,2005-11-30 What happens when two deeply held American values freedom of expression and freedom from discrimination clash In any well established democratic society people have the right to free speech as well as the right to equal treatment and protection under the law But when one person s speech harms another person on the basis of race ethnicity religion gender or sexual orientation it may qualify as hate speech and be subject to restriction Cortese argues that restricting hate speech does not violate the guiding principle behind the First Amendment but he is not eager to see more lawsuits Effective restriction he asserts should not focus on litigation but on speech codes and moral education Is there a limit to freedom of expression in a democracy and if so where should the line be drawn In attempting to answer that question Cortese makes a solid case for paying attention to context and common sense Some hate speech is more reprehensible than others not all discriminatory statements are equally serious There is a discernible difference between an offensive remark and an incitement to commit murder There is also a fundamental distinction between intentional and unintentional discrimination In this book Cortese rethinks some of the issues that have been silenced in ways harmful to many especially those that have been brutalized oppressed manipulated dominated segregated and disadvantaged We should recognize the grave injuries inflicted by hate speech and the potential tensions between legal solutions to those injuries and the First Amendment We must push for moral education educational speech codes and when necessary a formal legal structural response to hate speech in order to reinforce our commitment to tolerance as a value Handbook on Crime Fiona

Brookman,Mike Maguire,Harriet Pierpoint,Trevor Bennett,2010-02-01 The Handbook on Crime is a comprehensive edited volume that contains analysis and explanation of the nature extent patterns and causes of over 40 different forms of crime in each case drawing attention to key contemporary debates and social and criminal justice responses to them It also challenges many popular and official conceptions of crime This book is one of the few criminological texts that takes as its starting point a range of specific types of criminal activity It addresses not only conventional offences such as shoplifting burglary robbery and vehicle crime but many other forms of criminal behaviour often an amalgamation of different legal offences which attract contemporary media public and policy concern These include crimes committed not only by individuals but by organised criminal groups corporations and governments There are chapters on for example gang violence hate crime elder abuse animal abuse cyber crime identity theft money laundering eco crimes drug trafficking human trafficking genocide and global terrorism Many of these topics receive surprisingly little attention in the criminological literature The Handbook on Crime will be a unique text of lasting value to students researchers academics practitioners policy makers journalists and all others involved in understanding and preventing criminal behaviour Understanding Disability and Everyday Hate Leah

Burch,2021-11-05 This book examines disability hate crime It focusses on key questions concerning the ways in which hate is

understood and experienced within the context of the everyday in addition to the unique ways that hate can hurt and be resisted It introduces readers to questions surrounding the conceptual framework of hate and policy context in England and Wales and extends these discussions to center upon the experiences of disabled people It presents a conceptual reconsideration of hate crime that connects hate disability and everyday lives and spaces using an affective embodied and emotional understanding of these experiences Drawing on empirical data this framework helps to attend to the diverse ways that disabled people negotiate respond to and resist hate within the context of their everyday lives The book argues that the affective capacity of disabled people can be enhanced through their reflections upon hateful experiences and general experiences of navigating a disabling social world By working with the concept of affective possibility this book offers a more affirmative approach to harnessing the everyday forms of resistance already present within disabled people s lives It speaks to academics students and practitioners interested in disability affect studies hate crime studies sociology and criminology
