Hating Empire Properly Sunil M. Agnani, 2013-05-09 In *Hating Empire Properly* Sunil Agnani produces a novel attempt to think the eighteenth century imagination of the West and East Indies together arguing that this is how contemporary thinkers Edmund Burke and Denis Diderot actually viewed them This concern with multiple geographical spaces is revealed to be a largely unacknowledged part of the matrix of Enlightenment thought in which eighteenth century European and American self conceptions evolved By focusing on colonial spaces of the Enlightenment especially India and Haiti he demonstrates how Burke s fearful view of the French Revolution the defining event of modernity as shaped by prior reflection on these other domains Exploring with sympathy the angry outbursts against injustice in the writings of Diderot he nonetheless challenges recent understandings of him as a univocal critic of empire by showing the persistence of a fantasy of consensual colonialism in his thought By looking at the impasses and limits in the thought of both radical and conservative writers Agnani asks what it means to critique empire properly Drawing his method from Theodor Adorno s quip that one must have tradition in oneself in order to hate it properly he proposes a critical inhabiting of dominant forms of reason as a way forward for the critique of both empire and Enlightenment Thus this volume makes important contributions to political theory history literary studies American studies and postcolonial studies [Hating Empire Properly](#) Sunil M. Agnani, 2013-05-14 Discusses arguments made against empire and colonialism in the eighteenth century through works by Denis Diderot and Edmund Burke Explores the limits and failures of their arguments by emphasizing what they wrote on the two indies especially India and Haiti *Empires of Vision* Martin Jay, Sumathi Ramaswamy, 2014-03-14 Combining visual culture and postcolonial studies this reader shows that an appreciation of the role of visual experience is necessary for understanding how colonialism worked and how colonized subjects spoke to imperial rulers [The End of Enlightenment](#) Richard Whatmore, 2023-12-07 A brilliant work of intellectual interpretation by our foremost historian of Enlightenment ideas Whatmore rescues the Enlightenment from today s circular debates and places it where it belongs in the pulsing chaotic era of its genesis and demise Christopher de Bellaigue The Enlightenment is popularly seen as the Age of Reason a key moment in human history when ideals such as freedom progress natural rights and constitutional government prevailed In this radical re evaluation historian Richard Whatmore shows why for many at its centre the Enlightenment was a profound failure By the early eighteenth century hope was widespread that Enlightenment could be coupled with toleration the progress of commerce and the end of the fanatic wars of religion that were destroying Europe At its heart was the battle to establish and

maintain liberty in free states and the hope that absolute monarchies such as France and free states like Britain might even subsist together equally respectful of civil liberties Yet all of this collapsed when states pursued wealth and empire by means of war Xenophobia was rife and liberty itself turned fanatic The End of Enlightenment traces the changing perspectives of economists philosophers politicians and polemicists around the world including figures as diverse as David Hume Adam Smith Edmund Burke and Mary Wollstonecraft They had strived to replace superstition with reason but witnessed instead terror and revolution corruption gross commercial excess and the continued growth of violent colonialism Returning us to these tumultuous events and ideas and digging deep into the thought of the men and women who defined their age Whatmore offers a lucid exploration of disillusion and intellectual transformation a brilliant meditation on our continued assumptions about the past and a glimpse of the different ways our world might be structured especially as the problems addressed at the end of Enlightenment are still with us today The Invention of Humanity Siep Stuurman,2017-02-20 For much of history strangers were seen as barbarians seldom as fellow human beings The notion of common humanity had to be invented Drawing on global thinkers Siep Stuurman traces ideas of equality and difference across continents and civilizations from antiquity to present day debates about human rights and the clash of civilizations *The Color of Equality* Devin J. Vartija,2021-08-06 Enlightenment thinkers bequeathed a paradoxical legacy to the modern world they expanded the purview of equality while simultaneously inventing the modern concept of race The Color of Equality makes sense of this tension by demonstrating that the same Enlightenment impulse the naturalization of humanity underlay both of these trends

Edmund Burke and the Conservative Logic of Empire Daniel O'Neill,2016-03-01 Edmund Burke long considered modern conservatism's founding father is also widely believed to be an opponent of empire However Daniel O'Neill turns that latter belief on its head This fresh and innovative book shows that Burke was a passionate supporter and staunch defender of the British Empire in the eighteenth century whether in the New World India or Ireland Moreover and against a growing body of contemporary scholarship that rejects the very notion that Burke was an exemplar of conservatism O'Neill demonstrates that Burke's defense of empire was in fact ideologically consistent with his conservative opposition to the French Revolution Burke's logic of empire relied on two opposing but complementary theoretical strategies Ornamentalism which stressed cultural similarities between civilized societies as he understood them and Orientalism which stressed the putative cultural differences distinguishing savage societies from their civilized counterparts This incisive book also shows that Burke's argument had lasting implications as his development of these two justifications for empire prefigured later intellectual defenses of British imperialism **The Books that Made the European Enlightenment** Gary Kates,2022-08-11 In contrast to traditional Enlightenment studies that focus solely on authors and ideas Gary Kates employs a literary lens to offer a wholly original history of the period in Europe from 1699 to 1780 Each chapter is a biography of a book which tells the story of the text from its inception through to the revolutionary era with wider aspects of the Enlightenment era being

revealed through the narrative of the book's publication and reception. Here Kates joins new approaches to book history with more traditional intellectual history by treating authors, publishers, and readers in a balanced fashion throughout. Using a unique database of 18th-century editions representing 5,000 titles, the book looks at the multifaceted significance of bestsellers from the time. It analyses key works by Voltaire, Adam Smith, Madame de Graffigny, Jean-Jacques Rousseau, and David Hume and champions the importance of a crucial innovation of the age: the rise of the erudite blockbuster, which for the first time in European history helped to popularize political theory among a large portion of the middling classes. Kates also highlights how, when, and why some of these books were read in the European colonies, as well as incorporating the responses of both ordinary men and women as part of the reception histories that are so integral to the volume. **Edmund**

Burke and the British Empire in the West Indies P. J. Marshall, 2019-07-04 Edmund Burke was both a political thinker of the utmost importance and an active participant in the day-to-day business of politics. It is the latter role that is the concern of this book, showing Burke engaging with issues concerning the West Indies, which featured so largely in British concerns in the later eighteenth century. Initially, Burke saw the islands as a means by which his close connections might make their fortunes; later, he was concerned with them as a great asset to be managed in the national interest, and finally, he became a participant in debates about the slave trade. This volume adds a new dimension to assessments of Burke's views on empire, hitherto largely confined to Ireland, India, and America, and explores the complexities of his response to slavery. The system outraged his abundantly attested concern for the suffering caused by abuses of British power overseas, but one which he also recognised to be fundamental for sustaining the wealth generated by the West Indies, which he deemed essential to Britain's national power. He therefore sought compromises in the gradual reform of the system rather than immediate abolition of the trade or emancipation of the slaves. Animal Rhetoric and Natural Science in Eighteenth-Century Liberal Political Writing

Andrew Billing, 2023-12-07 Our tendency to read French Enlightenment political writing from a narrow disciplinary perspective has obscured the hybrid character of political philosophy, rhetoric, and natural science in the period. As Michel Duchet and others have shown, French Enlightenment thinkers developed a philosophical anthropology to support new political norms and models. This book explores how five important eighteenth-century French political authors—Rousseau, Diderot, La Mettrie, Quesnay, and Rétif de La Bretonne—also constructed a political zoology in their philosophical and literary writings, informed by animal references drawn from Enlightenment natural history, science, and physiology. Drawing on theoretical work by Derrida, Latour, and Fontenay, and others, it shows how these five authors signed on to the old rhetorical tradition of animal comparisons in political philosophy, which they renewed via the findings and speculations of contemporary science. Engaging with recent scholarship on Enlightenment political thought, it also explores the links between their political zoologies and their family resemblance as liberal political thinkers. The Enlightenment William E. Burns, 2015-11-10

Cosmopolitanism and the Enlightenment Joan-Pau Rubiés, Neil Safier, 2023-03-23 As we face new global challenges from climate change to the international political order the need to re-examine the historical roots of cosmopolitanism and liberal principles on a global scale has become increasingly central to the political conversation Cosmopolitanism and the Enlightenment brings together leading scholars in cultural history the history of ideas and global politics in order to reassess the complexity of cosmopolitanism during the Enlightenment and its various interpretations over time Through a fresh and revisionist perspective the volume explores issues of universalism and cultural diversity the idea of civilization race gender empire colonialism global inequality national patriotism international and civil conflict and other forms of political discourse challenging the simple negative stereotype that the Enlightenment was inevitably hierarchical and Eurocentric This timely intervention into the debate about the legacy of the Enlightenment highlights both the plurality and the continuing relevance of Enlightened cosmopolitanism to contemporary global concerns

Colonialism, World Literature, and the Making of the Modern Culture of Letters Baidik Bhattacharya, 2024-02-08 In a radical and ambitious reconceptualization of the field this book argues that global literary culture since the eighteenth century was fundamentally shaped by colonial histories It offers a comprehensive account of the colonial inception of the literary sovereign how the realm of literature was thought to be separate from history and politics and then follows that narrative through a wide array of different cultures multilingual archives and geographical locations Providing close studies of colonial archives German philosophy of aesthetics French realist novels and English literary history this book shows how colonialism shaped and reshaped modern literary cultures in decisive ways It breaks fresh ground across disciplines such as literary studies anthropology history and philosophy and invites one to rethink the history of literature in a new light

Jones,2023-05-09 Why we need a materialist spirituality for the secular left and how to build one The left commonly rejects religion and spirituality as counter revolutionary forces citing Marx s famous dictum that religion is the opium of the people Yet forms of spirituality have motivated struggles throughout history ranging from medieval peasant uprisings and colonial slave revolts to South American liberation theology and the US civil rights movement And in a world where religion is growing and political movements are ridden with conflict burnout and failure what can the left learn from religion Red Enlightenment argues not only for a deepened understanding of religious matters but calls for the secular left to develop its own spiritual perspectives It proposes a materialist spirituality built from socialist and scientific sources finding points of contact with the global history of philosophy and religion From cybernetics to liberation theology from ancient Indian and Chinese philosophy to Marxist dialectical materialism from traditional religious practices to contemporary art music and film Red Enlightenment sets out a plausible secular spirituality a new socialist praxis and a utopian vision **Georg Forster**

Todd Kontje,2022-06-29 Georg Forster 1754 1794 was famous during his lifetime notorious after his death and largely forgotten by the later nineteenth century Remembered today as the young man who sailed around the world with Captain Cook and as one of the leading figures in the revolutionary Republic of Mainz Forster was also a prolific writer and translator who left behind two travelogues a series of essays on diverse topics and numerous letters This in depth look at Forster s work and life reveals his importance for other writers of the age Todd Kontje traces the major intellectual themes and challenges found in Forster s writings interweaving close textual analysis with his rich but short life Each chapter engages with themes that reflect the current debates in eighteenth century literary and cultural studies including changing notions of authorship multilingualism the representation of so called primitive societies Enlightenment ideas about race and early forms of ecological thinking As Kontje shows Forster s peripatetic life malleable sense of national identity and fluency in multiple languages contrast with the image of the solitary genius in the age of Goethe In this way Forster provides a different model of authorship and citizenship better understood in the context of an increasingly globalized world Compellingly argued and engagingly written this book restores Forster to his rightful place within the German literary tradition and in so doing it urges us to reconsider the age of Goethe as multilingual and malleable local and cosmopolitan dynamic and decentered It will be welcomed by specialists in German studies and the Enlightenment **Reimagining Empire in India** Andrea

Major,2025-01-09 This book explores debates about East India Company colonialism that took place on the lecture circuits of Britain in the meeting houses of Calcutta and at the Mughal court in Delhi in the late 1830s and 1840s In the decades that followed the Emancipation Act 1833 British abolitionists and colonial philanthropists turned their attention to conditions across the empire sometimes collaborating with colonised groups to challenge the impositions and iniquities of British

colonial rule and sometimes prescribing their own vision of how an imperial relationship should look This book uses the travels experiences and activism of anti slavery lecturer and East India reformer George Thompson as a starting point for a wider exploration and reassessment of the ways in which Company rule in India was challenged in the decades before the Indian Uprising of 1857 An important organiser in the campaign for East India reform as the main spokesperson for the Aborigines Protection Society and a champion of the causes of Indian rulers such as Pratap Singh and Bahadur Shah Zafar Thompson was also a flawed character As a paid agent he was remunerated for his activism and accusations of pecuniary self interest were never far away His story therefore offers important insights into the limitations of early anti colonial sentiment and the problems of cosmopolitan collaboration in colonial contexts By exploring early Victorian debates about India s commercial potential role in the imperial labour market and place within an increasingly interconnected post emancipation empire the book seeks to contextualise evolving ideas regarding Britain s humanitarian responsibilities towards her fellow subjects in the East and how these connected with and were superseded by nascent forms of Indian anti colonialism political protest and civic activism
