HAUNTED TOYS POSSESSED OBJECTS Psychic Art Storyboard Photo-essays Grace Divine, 2010-10-31 This book constitutes an expression of experience review commentary It constitutes a First Amendment Expression of Speech as well as religious expression and more written for the public benefit INTRODUCTION How does the mind of a child perceive the world A child's perception of the world is different from an adult's perception And they say that children are more psychic than adults This is because children are more open to their environments and less judgmental I was born intuitive And I grew up in a world where intuition was misunderstood Growing up places people and things held enhanced sensations In particular I remember the fantastical feelings and sensations that toys evoked in me The items that I chose to photograph for these photo painting essays were toys that move my soul even today These are items from childhood that remind me of feelings that I had as a child All children have fears of the unknown of separation of the darkness I too remember that when I was a child I attributed living characteristics to certain toys Somehow through my imagination the toys came to life And some of these toys weren't friendly These photo paintings mirror some the fears I beheld as a child For these photo painting essays I chose dolls clowns cats and a rubber ducky These are toys that I loved as a child and still fascinate me today And I think if pressed I would find it hard to part with them As an artist I believe animism is possible I believe that the universe is as yet uncharted and the possibilities of life are endless Humans for instance live in the light and fear darkness But it's possible there are other intelligent forms of life And that some of these live in darkness Children sense things differently Perhaps the possibilities of life are greater to them than for adults And why not I believe that energy can be inside things And toys for some reason hold a unique interest to these energies Could it be because they are uniquely attractive to children and hold their attention What would happen if your favorite toy suddenly and unexpectedly began to change What if it began to move What if it moved its head hand or opened its eyes What if it began to come to life What if it became possessed The thought of this possibility has most likely crossed everyone's mind And these questions are the queries of this art series This is a serious photo painting essay art series Its aim is to take the viewer in a journey into the mind In this journey it explores concepts of mind memory perception and emotions It also explores the unimaginable but wholly explainable concept of predatory behaviors by intelligent beings of other dimensions on human beings In the end I believe that we are never alone Energy abounds around us I believe that these photo paintings came out of my deep unconscious Because of this in a way this process of art is cathartic in nature I hope you will experience something from looking at these At the least you might remember a toy or an experience you had in childhood
