Conference Charles Henderson, Mel Sabella, Leon Hsu, 2008-11-21 The 2008 Physics Education Research Conference brought together researchers studying a wide variety of topics in physics education The conference theme was Physics Education Research with Diverse Student Populations Researchers specializing in diversity issues were invited to help establish a dialog and spur discussion about how the results from this work can inform the physics education research community The organizers encouraged physics education researchers who are using research based instructional materials with non traditional students at either the pre college level or the college level to share their experiences as instructors and researchers in these classes Ready for Fall? Near-Term Effects of Voluntary Summer Learning Programs on Low-Income Students' Learning Opportunities and Outcomes Jennifer Sloan McCombs, John F. Pane, Catherine H. Augustine, Heather L. Schwartz, Paco Martorell, Laura Zakaras, 2014-12-16 The Wallace Foundation's National Summer Learning Study conducted by RAND and launched in 2011 offers the first assessment of district run voluntary summer programs over the short and long run This report the second of five that will result from the study looks at how summer programs affected student performance on math reading and social and emotional assessments in fall 2013 Service-Learning to Advance Access & Success Travis T. York, Alan S. Tinkler, Barri E. Tinkler, 2018-11-01 Throughout the 90s and early 2000s service learning research was intensely focused on the student outcomes That body of research has effectively brought service learning from the fringes into the mainstream of institutionalized pedagogies In the past decade service learning research has experienced an infusion of exploration in three distinct ways first large scale quantitative methodologies second a proliferation of research that has explored how different sub groups of students experience the pedagogy differently thusly resulting in variation among outcomes and third a focus on the experiences and outcomes associated for communities and community partners engaged in service learning In an effort to support these movements this volume of the Advances in Service Learning Research series Service Learning to Advance Access Success Bridging Institutional and Community Capacity focuses on how service learning can advance access and success Not simply access and success of students but the ways that service learning can advance access and success for all through bridging institutional and community capacity building The chapters in this volume serve as a testament to the ways in which service learning research continue to be advanced by thoughtful scholar practitioners The 12 chapters included in this volume are organized into three sections The first section focuses on how institutional and community partnerships can be leveraged to build community capacity The second section focuses on how institutions might build their own capacity to effect change for the good of society The third and final section focuses on six studies exploring the relationship service learning pedagogy has with access and success for students Of the six studies three are situated within the context of teacher preparation programs *Models of Secondary Education and Social Inequality* Hans-Peter Blossfeld, Sandra Buchholz, Jan Skopek, Moris Triventi, 2016-11-25 From an international comparative perspective this third book in the prestigious eduLIFE Lifelong Learning series provides a thorough

investigation into how social inequalities arise during individuals secondary schooling careers Paying particular attention to the role of social origin and prior performance it focuses on tracking and differentiation in secondary schooling examining the short and long term effects on inequality of opportunities It looks at ways in which differentiation in secondary education might produce and reproduce social inequalities in educational opportunities and educational attainment The international perspective allows illuminating comparison in light of the different models rules and procedures that regulate admission selection and learning in different countries

Effectiveness of reading and mathematics software products findings from the first student cohort : report , Mathematics in Service to the Community Charles Robert Hadlock,2005

Publisher description This book looks at the wide variety of ways in which math statistics and math education teachers have incorporated service learning into their courses These projects are not just stand alone community service initiatives but rather they specifically target the improvement of mathematics skills and insights of the college students in the courses with which they are associated In some cases the projects are the major focus of the courses In others they may range from an essential component to one of several options The book also speculates about heretofore untapped possibilities for service learning even including courses in pure mathematics College faculty often may not fully appreciate the wide range of support mechanisms for such ventures even within their own institutions so the book includes a lengthy chapter on the details of converting a rough idea to a solid action plan sometimes even picking up financial support and other often unexpected benefits along the way Creative teachers rarely implement a project in exactly the same way as a colleague might have so the emphasis here is to display a wide range of successful projects in order to encourage readers to develop some of their own
