Guide to Information Sources in Mathematics and Statistics Martha A. Tucker, Nancy D. Anderson, 2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free **Measure, Integration & Real Analysis** Sheldon Axler, 2019-11-29 This open access textbook welcomes students into the fundamental theory of measure integration and real analysis Focusing on an accessible approach Axler lays the foundations for further study by promoting a deep understanding of key results Content is carefully curated to suit a single course or two semester sequence of courses

creating a versatile entry point for graduate studies in all areas of pure and applied mathematics Motivated by a brief review of Riemann integration and its deficiencies the text begins by immersing students in the concepts of measure and integration Lebesgue measure and abstract measures are developed together with each providing key insight into the main ideas of the other approach Lebesgue integration links into results such as the Lebesgue Differentiation Theorem The development of products of abstract measures leads to Lebesgue measure on $\mathbb{R}^n$ Chapters on Banach spaces L_p spaces and Hilbert spaces showcase major results such as the Hahn Banach Theorem Hölder's Inequality and the Riesz Representation Theorem An in depth study of linear maps on Hilbert spaces culminates in the Spectral Theorem and Singular Value Decomposition for compact operators with an optional interlude in real and complex measures Building on the Hilbert space material a chapter on Fourier analysis provides an invaluable introduction to Fourier series and the Fourier transform The final chapter offers a taste of probability Extensively class tested at multiple universities and written by an award winning mathematical expositor Measure Integration students and instructors looking to reinforce these ideas will appreciate the electronic Supplement for Measure Integration Real Analysis that is freely available online For errata and updates visit <https://measure.axler.net>

Quantum Physics of Semiconductor Materials and Devices Debdeep Jena, 2022-05-16 Quantum Phenomena do not occur in a Hilbert space They occur in a laboratory Asher Peres Semiconductor physics is a laboratory to learn and discover the concepts of quantum mechanics and thermodynamics condensed matter physics and materials science and the payoffs are almost immediate in the form of useful semiconductor devices Debdeep Jena has had the opportunity to work on both sides of the fence on the fundamental materials science and quantum physics of semiconductors and in their applications in semiconductor electronic and photonic devices In *Quantum Physics of Semiconductors and Nanostructures* Jena uses this experience to make each topic as tangible and accessible as possible to students at all levels Consider the simplest physical processes that occur in semiconductors electron or hole transport in bands and over barriers collision of electrons with the atoms in the crystal or when electrons and holes annihilate each other to produce a photon The correct explanation of these processes require a quantum mechanical treatment Any shortcuts lead to misconceptions that can take years to dispel and sometimes become roadblocks towards a deeper understanding and appreciation of the richness of the subject A typical introductory course on semiconductor physics would then require prerequisites of quantum mechanics statistical physics and thermodynamics materials science and electromagnetism Rarely would a student have all this background when s/he takes a course of this nature in most universities Jena's work fills in these gaps and gives students the background and deeper understanding of the quantum physics of semiconductors and nanostructures

Iterative Methods for Solving Nonlinear Equations and Systems Juan R. Torregrosa, Alicia Cordero, Fazlollah Soleymani, 2019-12-06 Solving nonlinear equations in Banach spaces real or complex nonlinear equations nonlinear systems and nonlinear matrix equations among others is a non trivial task that involves many areas of science and technology Usually the solution is not directly affordable and require an

approach using iterative algorithms This Special Issue focuses mainly on the design analysis of convergence and stability of new schemes for solving nonlinear problems and their application to practical problems Included papers study the following topics Methods for finding simple or multiple roots either with or without derivatives iterative methods for approximating different generalized inverses real or complex dynamics associated to the rational functions resulting from the application of an iterative method on a polynomial Additionally the analysis of the convergence has been carried out by means of different sufficient conditions assuring the local semilocal or global convergence This Special issue has allowed us to present the latest research results in the area of iterative processes for solving nonlinear equations as well as systems and matrix equations In addition to the theoretical papers several manuscripts on signal processing nonlinear integral equations or partial differential equations reveal the connection between iterative methods and other branches of science and engineering **The Lewis**
