Learning and Understanding National Research Council,Division of Behavioral and Social Sciences and Education,Center for Education,Committee on Programs for Advanced Study of Mathematics and Science in American High Schools,2002-09-06 This book takes a fresh look at programs for advanced studies for high school students in the United States with a particular focus on the Advanced Placement and the International Baccalaureate programs and asks how advanced studies can be

significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.

[Informatics in Schools. A Step Beyond Digital Education](#) Andreas Bollin, Gerald Futschek, 2022-08-24. This book constitutes the proceedings of the 14th International Conference on Informatics in Schools: Situation, Evolution, and Perspectives (ISSEP 2021) held in Nijmegen, The Netherlands, in November 2020. Due to COVID-19 related travelling restrictions, the conference had to be switched to an online format. The 12 full papers presented together with 4 short papers were carefully reviewed and selected from 57 submissions. They are organized in 2 topical sections: named state of research and best practice; country and experience reports. As in our school education, subjects like digital literacy or media literacy are making their way in complementing or partially replacing computer science education. The current ISSEP conference reacted to this trend and therefore invited computer scientists, media didactics, and representatives of politics, media, and industry to a discussion round on the topic: Media Education or Computer Science? Quo Vadis School Teaching?
