the follow up of the very successful similar event called Venice 1 Symposium on Applied and Industrial Mathematics that
was also organized in Venice in October 1989 The Venice 1 conference ended up with a Kluwer volume like this one I am
grateful to Kluwer for having accepted to publish the present volume the aim of which is to update somehow the state of the
art in the field of Applied Mathematics as well as in that of the nowadays rather more developed area of Industrial
Mathematics The most of the invited key note speakers contributed to this volume with a paper related to their talk There are
in addition a few significant contributed papers selected on the basis of their quality and relevance to the present time
research activities The topics considered in the conference range from rather general subjects in applied and numerical

analysis to more specialized subjects such as polymers and disordered media granular flow semiconductor mathematics superconductors elasticity tomography and other inverse problems financial modeling photographic sciences etc The papers collected in this volume provide a selection of them It is clear from the previous list that some attention has been paid to relatively new and emerging fields Report Commonwealth Shipping Committee,1912 **Railway Review** ,1914
