TABLE OF CONTENT Solved Paper 2021 2013 , *Effectiveness of teachers' guides in the Global South* Benjamin Piper,Yasmin Sitabkhan,Jessica Mejia,Kellie Betts,2018-05-10 This report presents the results of RTI International Education s study on teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the

teacher but are not written word for word for each lesson in the guide Perspectives on Interrogative Models of Inquiry Can Başkent, 2015-10-07 This book explores the two major elements of Hintikka's model of inquiry underlying game theoretical motivations and the central role of questioning The chapters build on the Hintikka tradition extending Hintikka's model and present a wide variety of approaches to the philosophy of inquiry from different directions ranging from erotetic logic to Lakatosian philosophy from socio epistemologic approaches to strategic reasoning and mathematical practice Hintikka's theory of inquiry is a well known example of a dynamic epistemic procedure In an interrogative inquiry the inquirer is given a theory and a question He then tries to answer the question based on the theory by posing questions to nature or an oracle The initial formulation of this procedure by Hintikka is rather broad and informal This volume introduces a carefully selected responses to the issues discussed by Hintikka The articles in the volume were contributed by various authors associated with a research project on Hintikka's interrogative theory of inquiry conducted in the Institut d'Histoire et de Philosophie des Sciences et des Techniques IHPST of Paris including those who visited to share their insight

Intelligent Interactive Multimedia Systems and Services Ernesto Damiani, Robert J. Howlett, Lakhmi C. Jain, Luigi Gallo, Giuseppe De Pietro, 2015-06-09 Intelligent interactive multimedia systems and services will be ever more important in computer systems Nowadays computers are widespread and computer users range from highly qualified scientists to non computer expert professionals Therefore designing dynamic personalization and adaptivity methods to store process transmit and retrieve information is critical for matching the technological progress with the consumer needs This book contains the contributions presented at the eighth international KES conference on Intelligent Interactive Multimedia Systems and Services which took place in Sorrento Italy June 17-19 2015 It contains 33 peer reviewed scientific contributions that focus on issues ranging from intelligent image or video storage retrieval transmission and analysis to knowledge based technologies from advanced information technology architectures for video processing and transmission to advanced functionalities of information and knowledge based services We believe that this book will serve as a useful source of knowledge for both academia and industry for all those faculty members research scientists scholars Ph D students and practitioners who are interested in fundamental and applied facets of intelligent interactive multimedia *Harmonic*

influential scientific contributions The 30 papers in this volume cover several scientific areas that Franz Baader has been working on during the last three decades including description logics term rewriting and the combination of decision procedures We hope that readers will enjoy the articles gathered in Franz's honour and appreciate the breadth and depth of his favourite areas of computer science

The Game Believes in You Greg Toppo, 2025-06-25 What if schools from the wealthiest suburban nursery school to the grittiest urban high school thrummed with the sounds of deep immersion More and more people believe that can happen with the aid of video games Greg Toppo's *The Game Believes in You* presents the story of a small group of visionaries who for the past 40 years have been pushing to get game controllers into the hands of learners Among the game revolutionaries you'll meet in this book A game designer at the University of Southern California leading a team to design a video game version of Thoreau's *Walden Pond* A young neuroscientist and game designer whose research on *Math Without Words* is revolutionizing how the subject is taught especially to students with limited English abilities A Virginia Tech music instructor who is leading a group of high school aged boys through the creation of an original opera staged totally in the online game *Minecraft* Experts argue that games do truly believe in you They focus inspire and reassure people in ways that many teachers can't Games give people a chance to learn at their own pace take risks cultivate deeper understanding fail and want to try again right away and ultimately succeed in ways that too often elude them in school This book is sure to excite and inspire educators and parents as well as provoke some passionate debate

Hyperbolic Dynamics, Fluctuations and Large Deviations D. Dolgopyat, Y. Pesin, M. Pollicott, L. Stoyanov, 2015-04-01 This volume contains the proceedings of the semester long special program on Hyperbolic Dynamics Large Deviations and Fluctuations which was held from January to June 2013 at the Centre Interfacultaire Bernoulli cole Polytechnique F d rale de Lausanne Switzerland The broad theme of the program was the long term behavior of dynamical systems and their statistical behavior During the last 50 years the statistical properties of dynamical systems of many different types have been the subject of extensive study in statistical mechanics and thermodynamics ergodic and probability theories and some areas of mathematical physics The results of this study have had a profound effect on many different areas in mathematics physics engineering and biology The papers in this volume cover topics in large deviations and thermodynamics formalism and limit theorems for dynamic systems The material presented is primarily directed at researchers and graduate students in the very broad area of dynamical systems and ergodic theory but will also be of interest to researchers in related areas such as statistical physics spectral theory and some aspects of number theory and geometry

Multiple Criteria Decision Analysis Salvatore Greco, Matthias Ehrgott, José Rui Figueira, 2016-02-18 In two volumes this new edition presents the state of the art in Multiple Criteria Decision Analysis MCDA Reflecting the explosive growth in the field seen during the last several years the editors not only present surveys of the foundations of MCDA but look as well at many new areas and new applications Individual chapter authors are among the most prestigious names in MCDA

research and combined their chapters bring the field completely up to date Part I of the book considers the history and current state of MCDA with surveys that cover the early history of MCDA and an overview that discusses the pre theoretical assumptions of MCDA Part II then presents the foundations of MCDA with individual chapters that provide a very exhaustive review of preference modeling along with a chapter devoted to the axiomatic basis of the different models that multiple criteria preferences Part III looks at outranking methods with three chapters that consider the ELECTRE methods PROMETHEE methods and a look at the rich literature of other outranking methods Part IV on Multiattribute Utility and Value Theories MAUT presents chapters on the fundamentals of this approach the very well known UTA methods the Analytic Hierarchy Process AHP and its more recent extension the Analytic Network Process ANP as well as a chapter on MACBETH Measuring Attractiveness by a Categorical Based Evaluation Technique Part V looks at Non Classical MCDA Approaches with chapters on risk and uncertainty in MCDA the decision rule approach to MCDA the fuzzy integral approach the verbal decision methods and a tentative assessment of the role of fuzzy sets in decision analysis Part VI on Multiobjective Optimization contains chapters on recent developments of vector and set optimization the state of the art in continuous multiobjective programming multiobjective combinatorial optimization fuzzy multicriteria optimization a review of the field of goal programming interactive methods for solving multiobjective optimization problems and relationships between MCDA and evolutionary multiobjective optimization EMO Part VII on Applications selects some of the most significant areas including contributions of MCDA in finance energy planning problems telecommunication network planning and design sustainable development and portfolio analysis Finally Part VIII on MCDM software presents well known MCDA software packages

Must Inclusion be Special? Jonathan Rix, 2015-06-05 *Must Inclusion be Special* examines the discord between special and inclusive education and why this discord can only be resolved when wider inequalities within mainstream education are confronted It calls for a shift in our approach to provision from seeing it as a conglomeration of individualised needs to identifying it as a conglomeration of collective needs The author examines the political medical and cultural tendency of current times to focus upon the individual and contrasts this with the necessity to focus on context This book distinguishes the theoretical perspectives that are often associated with special or inclusive education and the broad range of interests which depend upon their ongoing development This examination leads to a problematisation of mainstream education provision our understanding of why social inequities emerge and how additional support can overcome these inequities Further chapters explore the underlying challenges which emerge from our use and understanding of the notions of special and inclusive outlining an alternative approach based upon a community of provision This approach recognises the interconnectedness of services and the significance of context and it encapsulates the aspiration of much international legislation for participation and inclusion for all But it also assumes that we tend towards diffuse practices services policies settings and roles spread across provision which is variously inclusive and exclusionary In seeking to create equitable

participation for all support needs to shift its focus from the individual to this diffuse network of contexts Must Inclusion be Special emerges from the research base which problematises inclusion and special education drawing upon examples from many countries It also refers to the author s research into pedagogy language and policy and his experiences as a teacher and the parent of a child identified with special educational needs

Recent Progress in Flow Control for Practical Flows Piotr Doerffer, George N. Barakos, Marcin M. Luczak, 2017-05-11 This book explores the outcomes on flow control research activities carried out within the framework of two EU funded projects focused on training through research of Marie Skłodowska Curie doctoral students The main goal of the projects described in this monograph is to assess the potential of the passive and active flow control methods for reduction of fuel consumption by a helicopter The research scope encompasses the fields of structural dynamics fluid flow dynamics and actuators with control Research featured in this volume demonstrates an experimental and numerical approach with a strong emphasis on the verification and validation of numerical models The book is ideal for engineers students and researchers interested in the multidisciplinary field of flow control

Closing the Gap Vicky Neale, 2017-09-29 In 2013 a little known mathematician in his late 50s stunned the mathematical community with a breakthrough on an age old problem about prime numbers Since then there has been further dramatic progress on the problem thanks to the efforts of a large scale online collaborative effort of a type that would have been unthinkable in mathematics a couple of decades ago and the insight and creativity of a young mathematician at the start of his career Prime numbers have intrigued inspired and infuriated mathematicians for millennia Every school student studies prime numbers and can appreciate their beauty and yet mathematicians difficulty with answering some seemingly simple questions about them reveals the depth and subtlety of prime numbers Vicky Neale charts the recent progress towards proving the famous Twin Primes Conjecture and the very different ways in which the breakthroughs have been made a solo mathematician working in isolation and obscurity and a large collaboration that is more public than any previous collaborative effort in mathematics and that reveals much about how mathematicians go about their work Interleaved with this story are highlights from a significantly older tale going back two thousand years and more of mathematicians efforts to comprehend the beauty and unlock the mysteries of the prime numbers

Multi-Attribute Multi-Perception Decision-Making Based on Generalized T-Spherical Fuzzy Weighted Aggregation Operators on Neutrosophic Sets Shio Gai Quek , Ganeshsree Selvachandran , Muhammad Munir , Tahir Mahmood, Kifayat Ullah , Le Hoang Son, Pham Huy Thong, Raghvendra Kumar, Ishaani Priyadarshini, The framework of the T spherical fuzzy set is a recent development in fuzzy set theory that can describe imprecise events using four types of membership grades with no restrictions The purpose of this manuscript is to point out the limitations of the existing intuitionistic fuzzy Einstein averaging and geometric operators and to develop some improved Einstein aggregation operators
