Brands, 2012-12-04 From the early years of fur trading to today's Silicon Valley empires America has proved to be an extraordinarily fertile land for the creation of enormous fortunes Each generation has produced one or two phenomenally successful leaders often in new industries that caught contemporaries by surprise and each of these new fortunes reconfirmed the power of fanatically single minded visionaries John Jacob Astor and Cornelius Vanderbilt were the first American moguls John D Rockefeller Andrew Carnegie and J P Morgan were kingpins of the Gilded Age David Sarnoff Walt Disney Ray Kroc and Sam Walton were masters of mass culture Today Oprah Winfrey Andy Grove and Bill Gates are giants of the Information Age America has again and again been the land of dizzying mountains of wealth Here in a wittily told and deeply insightful history is a complete set of portraits of America's greatest generators of wealth Only such a collective study allows us to appreciate what makes the great entrepreneurs really tick As H W Brands shows these men and women are driven they are focused they deeply identify with the businesses they create and they possess the charisma necessary to persuade other talented people to join them They do it partly for the money but mostly for the thrill of creation The stories told here including how Nike got its start as a business school project for Phil Knight how Robert Woodruff almost refused to take control of Coca Cola to spite his father how Thomas Watson saved himself from prison by rescuing Dayton Ohio from a flood how Jay Gould nearly cornered the gold market how H L Hunt went from gambling at cards to gambling with oil leases make for a narrative that is always lively and revealing and often astonishing An observer in 1850 studying John Jacob Astor would not have predicted the rise of Henry Ford and the auto industry Nor would a student of Ford in 1950 have anticipated the takeoff of direct marketing that made Mary Kay Ash a trusted guide for millions of American women Full of surprising insights written with H W Brands's trademark flair the stories in *Masters of Enterprise* are must reading for all students of American business history **The Masters of Enterprise** H. John D McDowall Author of *Complex Enterprise Architecture* *Digital Transformation of Enterprise Architecture* is the first book to propose Enterprise Architecture (EA) as the most important element after Business Models for digital transformation of enterprises. This book makes digital transformation more tangible by showing the rationale and typical technologies associated with it and these technologies in turn reveal the essence of digital transformation. This book would be useful for analysts, designers and developers of future ready agile application systems. This book proposes that it is the perennial quest for interoperability, portability, scalability, availability etc that has directed and driven the evolution of the IT/IS industry in the past 50 years. It is this very quest that has led to the emergence of technologies like service oriented cloud and big data computing. In addition to the conventional attributes of EA like interoperability, scalability and availability, this book identifies additional attributes of mobility, ubiquity, security, analyticity and usability. This pragmatic book identifies three parts: effort for any digital transformation, Business Models, Enterprise Architectures and Enterprise Processes. Describes eight attributes of EA: interoperability, scalability, availability, mobility, ubiquity, security, analyticity and usability. Explains the corresponding technologies of service oriented
