

HomeworkUse the Commutative Property to solve for n .

1. $26,184 + 1,546 = 1,546 + n$

$n = \underline{\hspace{2cm}}$

2. $17.39 + 12.58 = 12.58 + n$

$n = \underline{\hspace{2cm}}$

Regroup the numbers using the Associative Property. Then add.

3. $(389 + 700) + 300 =$

4. $1.02 + (0.98 + 4.87) =$

Use the Distributive Property to rewrite each problem so it has only two factors. Then solve.

5. $(8 \times 700) + (8 \times 300) =$

6. $(25 \times 9) + (75 \times 9) =$

Group the numbers to make the addition easier. Then add.

7.
$$\begin{array}{r} 20,000 \\ 70,000 \\ 30,000 \\ 60,000 \\ + 80,000 \\ \hline \end{array}$$

8.
$$\begin{array}{r} 10,000 \\ 25,000 \\ 80,000 \\ 75,000 \\ + 30,000 \\ \hline \end{array}$$

9.
$$\begin{array}{r} 10.75 \\ 10.4 \\ 10.25 \\ 10.57 \\ + 10.6 \\ \hline \end{array}$$

10.
$$\begin{array}{r} 1.600 \\ 1.200 \\ 1.200 \\ + 1.479 \\ \hline \end{array}$$

Subtract.

11. $\$182.09 - 37c = \underline{\hspace{2cm}}$

12. $\$5,287.32 - 59c = \underline{\hspace{2cm}}$

13. $\$362 - 48c = \underline{\hspace{2cm}}$

14. $6\text{ m} - 0.03\text{ m} = \underline{\hspace{2cm}}$

develop problem solving and reasoning skills The strong emphasis in Math Expressions on representation and discussion opens up the world of mathematics to all learners Every lesson includes intervention on level and challenge differentiation to support classroom needs Publisher **Getting to the Common Core** Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research Uncomplicating Algebra to Meet Common Core Standards in Math, K-8 Marian Small, 2014-12-04 In the second book in the Uncomplicating Mathematics Series professional developer Marian Small shows teachers how to uncomplicate the teaching of algebra by focusing on the most important ideas that students need to grasp Organized by grade level around the Common Core State Standards for Mathematics Small shares approaches that will lead to a deeper and richer understanding of algebra for both teachers and students The book opens with a clear discussion of algebraic thinking and current requirements for algebraic understanding within standards based learning environments The book then launches with Kindergarten where the first relevant standard is found in the operations and algebraic thinking domain and ends with Grade 8 where the focus is on working with linear equations and functions In each section the relevant standard is presented followed by a discussion of important underlying ideas associated with that standard as well as thoughtful concept based

questions that can be used for classroom instruction practice or assessment Underlying ideas include Background to the mathematics of each relevant standard Suggestions for appropriate representations for specific mathematical ideas Suggestions for explaining ideas to students Cautions about misconceptions or situations to avoid The Common Core State Standards for Mathematics challenges students to become mathematical thinkers not just mathematical doers This resource will be invaluable for pre and inservice teachers as they prepare themselves to understand and teach algebra with a deep level of understanding Uncomplicating Algebra is an excellent resource for teachers responsible for the mathematical education of K 8 students It is also a valuable tool for the training of preservice teachers of elementary and middle school mathematics Carole Greenes associate vice provost for STEM education director of the Practice Research and Innovation in Mathematics Education PRIME Center professor of mathematics education Arizona State University The current climate in North America places a major emphasis on standards including the Common Core State Standards for Mathematics in the U S In many cases teachers are being asked to teach content with which they themselves struggle In this book Dr Small masterfully breaks down the big ideas of algebraic thinking to assist teachers math coaches and preservice teachers helping them to deepen their own understanding of the mathematics they teach She describes common error patterns and examines algebraic reasoning from a developmental viewpoint connecting the dots from kindergarten through grade 8 The book is clearly written loaded with specific examples and very timely I recommend it strongly as a must read for all who are seeking to broaden their understanding of algebra and how to effectively teach this important content area to children Daniel J Brahier director Science and Math Education in ACTION professor of mathematics education School of Teaching and Learning Bowling Green State University
