International Education Daniel Ness, Chia-Ling Lin, 2015-03-17 This encyclopedia is the most current and exhaustive reference available on international education. It provides thorough up to date coverage of key topics, concepts and issues as well as in depth studies of approximately 180 national educational systems throughout the world. Articles examine education broadly and at all levels from primary grades through higher education, formal to informal education, country studies to global organizations.

International Handbook on Education in Southeast Asia Lorraine Pe Symaco, Martin Hayden, 2021-12-23 This International Handbook provides a detailed account of the education systems of 11 Southeast Asian nations including Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, the Philippines, Singapore, Thailand, Timor Leste and Vietnam. It presents a systematic sector by sector explanation of how these national education systems deliver educational services and respond to national and international issues and challenges. With 56 chapters, the International Handbook is the region's most comprehensive educational reference source. In the first of its chapters, the editors introduce the regional context and draw attention to the distinctive characteristics of each of the 11 systems. Southeast Asia, representing 8.5% of the world's population, is as dynamic as it is diverse. The International Handbook charts progress and establishes a benchmark for documenting future developments. It also provides a stepping off point for more detailed investigations of decision making processes and outcomes across the 11 national education systems.

Innovation in Language Learning and Teaching Linh Phung, Hayo Reinders, Vu Phi Ho Pham, 2024-05-22 This book investigates the ways in which new developments in areas of language teaching practice such as policy making, planning, methodology and the use of educational technology are locally adopted, adapted, initiated and implemented in Vietnam and Cambodia. The region is responding to a large number of significant challenges including large scale education reforms, the effects of globalisation and the need for lifelong learning as well as concerns about the quality of its language education system. By looking at the drivers, stakeholders, obstacles and affordances in one particular regional context, the authors examine how processes of change occur. This will help anyone involved in language development from curriculum reform to materials development and from programme evaluation to the setting of assessment standards. The book will be of particular interest to those involved in managing change in language education that attempts to mediate between global trends and local needs as well as students and scholars working in language education, applied linguistics and related fields.

Education in Cambodia Vincent McNamara, Martin Hayden, 2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia. It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars. Significant achievements over the past two decades are evident but many problems remain including the poor quality of teaching, research and institutional management. Under funding is an ongoing obstacle but so too is a bureaucratic culture of
