Tilman, Robert D. Holt, 2020-06-02 This volume provides a series of essays on open questions in ecology with the overarching goal being to outline the most important most interesting or most fundamental problems in ecology that need to be addressed The contributions span ecological subfields from behavioral ecology and population ecology to disease ecology and conservation and range in tone from the technical to more personal meditations on the state of the field Many of the chapters start or end in moments of genuine curiosity like one which takes up the question of why the world is green or another which asks what might come of a thought experiment in which we turn off evolution entirely **Amartya Sen's Work and Ideas**

Bina Agarwal, Jane Humphries, Ingrid Robeyns, 2013-09-13 This unique volume is the first to examine Nobel Laureate Amartya Sen's ideas through the lens of gender His humanitarian approach to economics has been crucial to the development of several aspects of feminist economics and gender analysis This book outlines the range and usefulness of his work for gender analysis while also exploring some of its silences and implicit assumptions The result is a collection of groundbreaking and insightful essays which cover major topics in Sen's work such as the capability approach justice freedom social choice agency missing women and development and well being Perspectives have been drawn from both developing and developed countries with most of the authors applying Sen's concepts to cultural geographic and historical contexts which differ from his original applications Significant highlights include a wide ranging conversation between the book's editors and Sen on many aspects of his work and an essay by Sen himself on why he is disinclined to provide a definitive list of capabilities These essays were previously published in *Feminist Economics* The English Catalogue of Books, 1968 *Economic Thought Since Keynes*

Michel Beaud, Gilles Dostaler, 2005-09-27 *Economic Thought Since Keynes* provides a concise overview of changing economic thought in the latter part of the twentieth century Offering a concise biography of 150 influential economists since Keynes it is an invaluable reference tool *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1976 *The Human Network* Matthew O. Jackson, 2020-02-04 Here is a fresh intriguing and above all

authoritative book about how our sometimes hidden positions in various social structures our human networks shape how we think and behave and inform our very outlook on life Inequality social immobility and political polarization are only a few crucial phenomena driven by the inevitability of social structures Social structures determine who has power and influence account for why people fail to assimilate basic facts and enlarge our understanding of patterns of contagion from the spread of disease to financial crises Despite their primary role in shaping our lives human networks are often overlooked when we try to account for our most important political and economic practices Matthew O Jackson brilliantly illuminates the complexity of the social networks in which we are often unwittingly positioned and aims to facilitate a deeper appreciation of why we are who we are Ranging across disciplines psychology behavioral economics sociology and business and rich with historical analogies and anecdotes *The Human Network* provides a galvanizing account of what can drive success or failure in life **Ideas, Interests and the Development of the European Banking Systems** Florian Brugger, 2020-08-17 What

are the grand dynamics that drive the history of economies The laws of supply demand most economists would argue For the history of European banking this book offers an alternative explanation Rather than market forces the coincidence and coalitions of charismatic ideas and powerful interests is what shaped banking in Europe In *Ideas Interests and the Development of the European Banking Systems* Florian Brugger traced decisive moments in the history of the European Banking Sector from the time of the Italian City States to the post World War I period he shows how coalitions of ideas and interests built the tracks along which the European Banking Sector developed Inspired by Max Weber he argues that economic organizations and institutions like the Banking Sector are embedded into three fundamental orders the economic the cultural and the political order Enforced and institutionalized by vested interests ideas of the cultural order legitimate and empower interests of the economic and political order What is more decisive moments were frequently characterized by coalitions of ideas and interests between parties that in normal times had nothing in common or were even confronting each other in a hostile way [Resources in Education](#) ,1998 [El-Hi Textbooks & Serials in Print](#), 2000 ,2000 *The Divergent Dynamics of Economic Growth* Richard H. Day,2003-11-13 This book explains how changing technology and economizing behaviour induce vast changes in productivity resource allocation labour utilization and patterns of living Economic growth is seen as a process by which businesses regimes countries and the whole world pass through distinct epochs each one emerging from its predecessor each one creating the conditions for its successor Viewed from a long run perspective growth must be characterized as an explosive process marked by turbulent transitions in social and political life as societies adapt to new opportunities the demise of old ways of living and to the vast increase and redistribution of human populations The book is based on a synthesis of classical economics and contemporary concepts of adaptation and economic evolution Although it is based on analytical methods the text has been stripped of all equations and with few exceptions is devoid of technical jargon **The American economic review** ,1948
