Teaching and Learning Secondary School Mathematics Ann Kajander,Jennifer Holm,Egan J Chernoff,2018-10-24

This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step.

Teaching Computing Henry M. Walker, 2018-04-24. Teaching can be intimidating for beginning faculty. Some graduate schools and some computing faculty provide guidance and mentoring, but many do not. Often a new faculty member is assigned to teach a course with little guidance, input, or feedback. *Teaching Computing: A Practitioner's Perspective* addresses such challenges by providing a solid resource for both new and experienced computing faculty. The book serves as a practical, easy-to-use resource covering a wide range of topics in a collection of focused, down-to-earth chapters. Based on the author's extensive teaching experience and his teaching-oriented columns that span 20 years and informed by computing education research, the book provides numerous elements that are designed to connect with teaching practitioners, including a wide range of teaching topics and basic elements of teaching, including tips and techniques. Practical tone: the book serves as a down-to-earth practitioners' guide. Short, focused chapters. Coherent and convenient organization. Mix of general educational perspectives and computing-specific elements. Connections between teaching in general and teaching computing. Both historical and contemporary perspectives. This book presents practical approaches, tips, and techniques that provide a strong starting place for new computing faculty and perspectives for reflection by seasoned faculty wishing to freshen their own teaching.

Learning as Development Daniel A. Wagner, 2017-10-04. Learning is the foundation of the human experience. It begins at birth and never stops: a continuous and malleable link across life stages of human development. Disparities in learning access and outcomes around the world have deep consequences for income, social mobility, health, and well-being. For international development practitioners faced with today's unprecedented environmental and geopolitical pressures, learning should be viewed as a touchstone and target for those seeking to truly effect global change. This book traces the path of

international development work from its pre colonial origins to the emergence of economics as the dominant discipline in the field and lays out a new agenda for policymakers researchers and practitioners from early education through adulthood

Learning as Development is an attempt to rethink international education in a changing world **E-Systems for the 21st Century** Seifedine Kadry, Abdelkhalak El Hami, 2019-07-10 E based systems and computer networks are becoming standard practice across all sectors including health engineering business education security and citizen interaction with local and national government With contributions from researchers and practitioners from around the world this two volume book discusses and reports on new and important developments in the field of e systems covering a wide range of current issues in the design engineering and adoption of e systems **Empirical Research on Semiotics and Visual Rhetoric** Danesi, Marcel, 2018-02-23 The study of symbols has long been considered a necessary field to unravel concealed meanings in symbols and images These methods have since established themselves as staples in various fields of psychology anthropology computer science and cognitive science Empirical Research on Semiotics and Visual Rhetoric is a critical academic publication that examines communication through images and symbols and the methods by which researchers and scientists analyze these images and symbols Featuring coverage on a wide range of topics such as material culture congruity theory and social media this publication is geared toward academicians researchers and students seeking current research on images symbols and how to analyze them **That's the Way I Think** David Grant, 2017-01-20 About 1 in 20 individuals are dyslexic This figure also applies for dyspraxia and ADHD This fully revised edition of David Grant's thought provoking insightful book develops our understanding of these specific learning differences and considers the further challenges presented by these overlapping conditions This new edition includes a brand new chapter on dyscalculia New sections also explore updates in the study of dyslexia dyspraxia and ADHD as well as visualisation and synaesthesia in the light of new data and research These updates enable the reader to gain a fuller understanding of the sensory experiences and thoughts of individuals with specific learning differences The author takes a life style approach to explain many of the everyday experiences and choices of individuals with specific learning differences including sleep sports visualisation and creativity and uses real life examples explained in the words of those with specific learning differences The accessible style of this book will immediately strike a chord with anyone with first or second hand experience of specific learning differences It is invaluable and insightful reading for those with specific learning differences as well as their parents and or partner teachers teaching assistants and SENCos **Research for Educational Change** Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning

and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research
