

# Kentucky Proficiency Tables from Scale Alignment Study

These tables were extracted from "A Study of the Alignment of the NWEA RIT Scale with the Kentucky Commonwealth Accountability Testing System," Michael P. Doherty, Ph.D., May, 2008. For a copy of the full report, please visit NWEA's web site at [www.nwea.org](http://www.nwea.org) >> Research >> State Information.

NWEA determines a cut score that best matches the score that is equivalent to the minimum proficiency score on the state test. Because this score is barely passing, if retested, students with this score would have about a 50% probability of passing. Consequently, the minimum RIT score for proficiency is aligned with 50% probability of passing. Tables showing the level of performance needed for higher probability of passing are provided. NWEA Scale Alignment Studies typically produce 80 - 90% predictive accuracy rates.
