The West and the Word Steffen Wöll, 2020-10-12 Western expansion in North America has mainly been described as either a linear sequence energized by nineteenth century nation building processes at a moving frontier or as the practice of settler colonialism and its exploitation of resources and displacement of nonwhite peoples This book suggests that shifting the focus from this binary pattern towards spatial imaginations and spatialization processes a new theoretical framework developed at SFB 1199 provides novel insights into the placemaking dynamics of the American West It brings to light a

discursive diversity that often contradicts unidirectional interpretive patterns It becomes clear that while some discourses solidified into spatial metanarratives like the character shaping clash of civilizations at the frontier or manifest destiny alternative spatial imaginations exist juxtaposed to or obfuscated by canonical interpretations Making use of a variety of sources including works of literature poetry newspapers paintings and speeches to access spatialization processes on several sociocultural scales the book presents a careful exploration of the parameters that informed the creation affirmation and subversion of spatial imagination of the American West throughout the nineteenth century from the perspective of American Studies

**Somatic States** Franck Billé, 2025-02-28 In *Somatic States* Franck Bill examines the conceptual link between the nation state and the body particularly the visceral and affective attachment to the state and the symbolic significance of its borders Bill argues that corporeal analogies to the nation state are not simply poetic or allegorical but reflect a genuine association of the individual body with the national outline an identification greatly facilitated by the emergence of the national map Bill charts the evolution of cartographic practices and the role that political maps have played in transforming notions of territorial sovereignty He shows how states routinely and effectively mobilize corporeal narratives such as framing territorial loss through metaphors of dismemberment and mutilation Despite the current complexity of geopolitics and neoliberalism Bill demonstrates that corporeality and bodily metaphors remain viscerally powerful because they offer a seemingly simple way to apprehend the abstract nature of the nation state

**Thinking with Maps** Bertram C. Bruce, 2021-05-15 A 2022 Choice Reviews Outstanding Academic Title Spatial reasoning which promises connection across wide areas is itself ironically often not connected to other areas of knowledge *Thinking with Maps* Understanding the World through Spatialization addresses this problem developing its argument through historical analysis and cross disciplinary examples involving maps The idea of maps here includes traditional cartographic representations of physical environments but more broadly encompasses the wide variety of ways that visualizations are used across all disciplines to enable understanding to generate new knowledge and to effect change The idea of thinking with maps is also used broadly Maps become not simply one among many items to learn about but indispensable tools for thinking across every field of inquiry in a way similar to that of textual and mathematical language Effective use of maps becomes a way to make knowledge much as writing or mathematical exploration not only displays ideas but also creates them The book shows that maps for thinking are not just a means to improve geographic knowledge as valuable as that may be Instead they provide mechanisms for rejuvenating our engagement with the world helping us to become more capable of facing our global challenges This book has a broader aim It is fundamentally about general principles of how we learn and know It calls for a renewed focus on democratic education in which both the means and ends are democratic Education just as the political realm should follow Dewey's dictum that democratic ends need democratic methods for their realization Maps and mapping are invaluable in that endeavor

**From Ancient Rome to Colonial Mexico** David Charles Wright-Carr, Francisco Marco Simón, 2023-05-01

From Ancient Rome to Colonial Mexico compares the Christianization of the Roman Empire with the evangelization of Mesoamerica offering novel perspectives on the historical processes involved in the spread of Christianity Combining concepts of empire and globalization with the notion of religion from a postcolonial perspective the book proposes the method of analytical comparison as a point of departure to conceptualize historical affinities and differences between the ancient Roman Empire and colonial Mesoamerica An international team of specialists in classical scholarship and Mesoamerican studies engage in an interdisciplinary discussion involving ideas from history anthropology archaeology art history iconography and philology Key themes include the role of religion in processes of imperial domination religion s use as an instrument of resistance or the imposition appropriation incorporation and adaptation of various elements of religious systems by hegemonic groups and subaltern peoples the creative misunderstandings that can arise on the middle ground and Christianity s rejection of ritual violence and its use of this rejection as a pretext for inflicting other kinds of violence against peoples classified as barbarian pagan or diabolical From Ancient Rome to Colonial Mexico presents a sympathetic vantage point for discussing and attempting to decipher past processes of social communication in multicultural contexts of present day realities It will be significant for scholars and specialists in the history of religions ethnohistory classical antiquity and Mesoamerican studies Publication supported in part by Spain s Ministry of Economy and Competitiveness Contributors Sergio Botta Maria Celia Fontana Calvo Martin Devecká Gyrgy N meth Guilhem Olivier Francisco Marco Sim n Paolo Taviani Greg Woolf David Charles Wright Carr Lorenzo P rez Yarza Translators Emma Chesterman Benjamin Adam Jerue Layla Wright Contreras *Recapturing Space: New Middle-Range Theory in Spatial Demography* Frank M. Howell,Jeremy R. Porter,Stephen A. Matthews,2015-11-04 With a unique focus on middle range theory this book details the application of spatial analysis to demographic research as a way of integrating and better understanding the different transitional components of the overall demographic transition This book first details key concepts and measures in modern spatial demography and shows how they can be applied to middle range theory to better understand people places communities and relationships throughout the world Next it shows middle range theory in practice from using spatial data as a proxy for social science statistics to examining the effect of fracking in Pennsylvania on the formation of new coalitions among environmental advocacy organizations The book also traces future developments and offers some potential solutions to promoting and facilitating instruction in spatial demography This volume is an ideal resource for advanced undergraduate and graduate students enrolled in courses involving spatial analyses in the social sciences from sociology and political science to economics and educational research In addition scholars and others interested in the role that geographic context plays in relation to their research will find this book a helpful guide in further developing their work **Pass the Paddle:** Gerald E.
