White, Devin Alan White, Sarah L Surface-Evans, 2012-03-13 Case studies that act as a

guidebook to archeologists on the uses of least cost analysis using GIS methodologies Scenario Development to Strengthen National Forest Policies and Programmes ,2014 Landscape Analysis and Visualisation Christopher Pettit,William Cartwright,Ian Bishop,Kim Lowell,David Pullar,David Duncan,2008-06-03 Michael Batty Centre for Advanced Spatial Analysis University College London Landscapes like cities cut across disciplines and professions This makes it especially difficult to provide an overall sense of how landscapes should be studied and researched Ecology aesthetics economy and sociology combine with physiognomy and deep physical structure to confuse our derstanding and the way we should react to the problems and potentials of landscapes Nowhere are these dilemmas and paradoxes so clearly highlighted as in Australia where landscapes dominate and their relationship to cities is so fragile yet so important to the sustainability of an entire nation if not planet This book presents a unique collection and synthesis of many of these perspectives perhaps it could only be produced in a land urb ised in the tiniest of pockets and yet so daunting with respect to the way non populated landscapes dwarf its cities Many travel to Australia to its cities and never see the landscapes but it is these that give the country its power and imagery It is the landscapes that so impress on us the need to consider how our intervention through activities ranging from resource exploitation and settled agriculture to climate change poses one of the greatest crises facing the modern world In this sense Australia and its landscape provide a mirror through which we can glimpse the extent to which our intervention in the world threatens its very existence **Situational analysis of a social-ecological landscape in the Ahafo Ano Southwest District of Ghana** Atampugre, Gerald,Mensah, E.,Boateng, E.,Mabhaudhi, Tafadzwanashe,Cofie, Olufunke,2022-11-01 A Social Ecological Landscape SEL comprises a set of important resources e g natural socioeconomic and cultural whose flow and use are controlled by a mix of ecological and social subsystem dynamics In developing countries drivers of SEL changes are complex and SEL pressures are growing Areas endowed with natural resources e g fertile soils forests water minerals etc tend to have high population growth rates and high poverty incidence These tend to culminate in high demand for livelihood capitals e g access to livelihood alternatives education food health water forest resources dwellings roads agriculture aquaculture spaces etc Further multiple national and global stakeholders have continued to place a high demand on exploiting natural resources at the subnational **Decision support tools for forest landscape restoration** Chazdon, R.L.,Guariguata, M.R.,2018-03-05 Decision making bodies at all scales face an urgent need to conserve remaining forests and reestablish forest cover in deforested and degraded forest landscapes The scale of the need and the opportunity to make a difference is enormous Degradation is Flood Risk and Social Justice Zoran Vojinovic,Michael B. Abbott,2012-03-05 Flood Risk and Social Justice is a response to the rising significance of floods and flood related disasters worldwide as an initiative to promote a socially just approach to the problems of flood risk It integrates the human social and the technological components to provide a holistic view This book treats flooding as a multi dimensional human and natural world tragedy that must be accommodated using all the social and technological means that

can be mobilised before during and after the flooding event It covers socially just flood risk mitigation practices which necessitate a wide range of multidisciplinary approaches starting from social and wider environmental needs including feedback cycles between human needs and technological means Flood Risk and Social Justice looks at how to judge whether a risk is acceptable or not by addressing an understanding of social and phenomenological considerations rather than simple calculations of probabilities multiplied by unwanted outcomes and their balancing between costs and benefits It is argued that the present flood management practice should be largely replaced by the social justice approach where particular attention is given to deciding what is the right thing to do within a much wider context Thus it insists upon the validity of modes of human understanding which cannot be addressed within the limited context of modern science Flood Risk and Social Justice is written to support a wide range of audiences and seeks to improve the dialogue between researchers and practitioners from different disciplines including post graduate engineering environmental and social science students industry practitioners academics planners environmental advocacy groups and environmental law professionals who have a strong interest in a new kind of social justice work that can act as a continuous counter balance to the various mechanisms that unceasingly give rise to profound injustices More information about this book can be found in this article written for the WaterWiki by the author <http://www.iwaterwiki.org/xwiki/bin/view/Articles/FloodRiskandSocialJustice> Authors Zoran Vojinovic is Associate Professor at the UNESCO IHE Institute for Water Education Delft the Netherlands with almost 20 years of consulting and research experience in various aspects of water industry in New Zealand Australia Asia Europe Central South America and the Caribbean Michael B Abbott is Emeritus Professor at the UNESCO IHE Institute for Water Education Delft the Netherlands and a Director of the European Institute for Industrial Leadership in Brussels He founded and developed the disciplines of Computational Hydraulics and Hydroinformatics and co founded the Journal of Hydroinformatics with Professor Roger Falconer

Guide American Anthropological Association, 2004 **Research Anthology on Citizen Engagement and Activism for Social Change** Management Association, Information Resources, 2021-11-26 Activism and the role everyday people play in making a change in society are increasingly popular topics in the world right now especially as younger generations begin to speak out From traditional protests to activities on college campuses to the use of social media more individuals are finding accessible platforms with which to share their views and become more actively involved in politics and social welfare With the emergence of new technologies and a spotlight on important social issues people are able to become more involved in society than ever before as they fight for what they believe It is essential to consider the recent trends technologies and movements in order to understand where society is headed in the future The Research Anthology on Citizen Engagement and Activism for Social Change examines a plethora of innovative research surrounding social change and the various ways citizens are involved in shaping society Covering topics such as accountability social media voter turnout and leadership it is an ideal work for activists sociologists social workers

Bossler,James B. Campbell,Robert B. McMaster,Chris Rizos,2010-03-05 Following in the tradition of its popular predecessor the Manual of Geospatial Science and Technology Second Edition continues to be the authoritative volume that covers all aspects of the field both basic and applied and includes a focus on initiating planning and managing GIS projects This comprehensive resource which contains contributio **Media and Information Literacy Curriculum for Educators and Learners** UNESCO,2021-09-30 **Change at Hand** Holly Ashley,2009 There are dozens of emerging interactive web applications and services often referred to as the participatory web or Web 2 0 This title addresses such questions as how can Web 2 0 applications be integrated with participatory development approaches and how can they facilitate and contribute to people s participation and decision making **Social Policy Review 35** Ruggero Cefalo,Marcia Rose,Andy Jolly,2023-06-30 Published in association with the Social Policy Association this volume addresses current issues and critical debates throughout the international social policy field *Mapping the Social Landscape* Susan J. Ferguson,2017-06-15 Now with SAGE Publishing Mapping the Social Landscape Readings in Sociology is one of the most established and widely used anthologies for Introductory Sociology Susan J Ferguson selects edits and introduces 58 readings representing a plurality of voices and views within sociology The selections include classic statements from great thinkers like C Wright Mills Karl Marx Howard Becker and Max Weber as well as the works of contemporary scholars who address current social issues Many of the readings integrate questions of diversity helping students see the interrelationships among race ethnicity social class and gender and understand how these relationships have shaped the experiences of all people in society New selections focus on o how Superstorm Sandy damaged social as well as physical structures o gender panics and bathrooms o extreme poverty in the United States o transgender challenges to our understanding of gender o a Muslim American punk rock subculture that is challenging Islamophobia o lessons from the Affordable Care Act o revolutionary movements for social change *Material Cultures, Migrations, and Identities* Anna Pechurina,2016-04-29 Focusing on the experiences of Russian migrants to the United Kingdom this book explores the connection between migrations homes and identities It evaluates several approaches to studying them and is structured around a series of case studies on attitudes to homemaking food and cooking and clothing **The Field Guide to Mixing Social and Biophysical Methods in Environmental Research** Rebecca Lave,Stuart Lane,2025-02-25 Despite ongoing debates about its origins the Anthropocene a new epoch characterized by significant human impact on the Earth s geology and ecosystems is widely acknowledged Our environment is increasingly a product of interacting biophysical and social forces shaped by climate change colonial legacies gender norms hydrological processes and more Understanding these intricate interactions requires

a mixed methods approach that combines qualitative and quantitative biophysical and social research However mixed methods environmental research remains rare hindered by academic boundaries limited training and the challenges of interdisciplinary collaboration Time funding and the integration of diverse data further complicate this research whilst the dynamics and ethics of interdisciplinary teams add another layer of complexity Despite these challenges mixed methods research offers a more robust and ultimately transformative understanding of environmental questions This Field Guide aims to inspire and equip researchers to undertake such studies Organized like a recipe book it assists researchers in the preparation of their field work as well as offering entry points to key methods and providing examples of successful mixed methods projects This book will be of interest to scholars wishing to tackle environmental research in a more holistic manner spanning sister disciplines such as anthropology statistics political science public health archaeology geography history ecology and Earth science
