Mapping The Political Landscape An Introduction To Political Science:

Mapping the Political Landscape Reeta Chowdhari Tremblay, 2012 *Teaching Political Science to Undergraduates* Laure Paquette, 2016-01-15 By 2020 half of the world's population and most university students will have a supercomputer in their pockets. This revolution will affect the way students respond to higher education. The university classroom must henceforth engage students and the classic lecture format alone might not be enough to do so. This book answers the question how university students can learn in the classroom what they cannot learn in any other way. The answer is inspired by options that are not available to political scientists in the way that they are in the laboratories for the sciences in the performances for the live arts and in the studios for visual arts as well as ideas that are already present but not widespread in the discipline: problem solving and case studies as in the professional schools and simulation exercises in many other disciplines. This book proposes therefore an active pedagogy for political science at a time when active pedagogy is more important than ever. Prof Laure Paquette PhD has been a visiting researcher or professor in 23 countries. She has advised several foreign governments as well as her own Canada and has published extensively in four languages. This is her sixteenth book.

Canadian Books in Print. Author and Title Index, 1975 **How to Map Arguments in Political Science** Craig Parsons, 2007-04-19 As essential and accessible introduction and critique of the main types of explanation in political science. Essential reading for students and scholars alike.

The Political Economy of Natural Resource Funds Eyene Okpanachi, Reeta Chowdhari Tremblay, 2021-08-13 This book aims to foster a better understanding of the particular challenges faced by resource dependent countries or jurisdictions in managing their resource revenues through natural resource funds (NRFs). It explores the varieties of natural resource management strategies as dictated primarily by domestic politics and how the potential negative distributional consequences of resource wealth management (the resource curse) may add political dimensions and potential conflicts to decisions about NRFs in ways that other sovereign wealth funds (SWFs) do not experience. By bridging the existing academic and practical knowledge gap arising from the limited attention given to the domestic politics of NRFs and state-society relations, this edited book is a valuable resource for academics, policymakers and civil society actors in resource driven economies and especially those interested in learning from comparative experiences of natural resource wealth management through NRFs.

Arjun Tremblay,2018-12-28 In this book Arjun Tremblay considers the future of multiculturalism contextualised within an ideological and political shift to the right Is there any hope that multiculturalism will survive alongside the rise of the political right across democracies How can policy makers continue to recognize and to accommodate minorities in an increasingly inhospitable ideological environment Based on evidence from three case studies Tremblay develops a hypothesis of multicultural outcomes arguing that while the threat to multiculturalism is real there still is hope and that not only is the fate of minority rights in liberal democracies far from sealed but it may still be possible to further protect the rights of immigrant and other minority groups in years to come In order to do this proponents of diversity politics may need to reconceptualise multiculturalism and other minority rights along instrumental lines as a means to fulfil policy objectives above and beyond the recognition and accommodation of immigrant minorities This will be an important read for scholars interested in minority rights multiculturalism diversity politics comparative politics institutionalism right wing and far right studies and public policy **The Routledge Handbook of Political Ecology** Tom Perreault,Gavin Bridge,James McCarthy,2015-06-12 The Routledge Handbook of Political Ecology presents a comprehensive and authoritative examination of the rapidly growing field of political ecology Located at the intersection of geography anthropology sociology and environmental history political ecology is one of the most vibrant and conceptually diverse fields of inquiry into nature society relations within the social sciences The Handbook serves as an essential guide to this rapidly evolving intellectual landscape With contributions from over 50 leading authors the Handbook presents a systematic overview of political ecology s origins practices and core concerns and aims to advance both ongoing and emerging debates While there are numerous

, 2007 **Mapping the Germans** Jason D. Hansen, 2015-01-22 Mapping the Germans explores the development of statistical science and cartography in Germany between the beginning of the nineteenth century and the start of World War One examining their impact on the German national identity It asks how spatially specific knowledge about the nation was constructed showing the contested and difficult nature of objectifying this frustratingly elastic concept Ideology and politics were not themselves capable of providing satisfactory answers to questions about the geography and membership of the nation rather technology also played a key role in this process helping to produce the scientific authority needed to make the resulting maps and statistics realistic In this sense Mapping the Germans is about how the abstract idea of the nation was transformed into a something that seemed objectively measurable and politically manageable Jason Hansen also examines the birth of radical nationalism in central Europe advancing the novel argument that it was changes to the vision of nationality rather than economic anxieties or ideological shifts that radicalized nationalist practice at the close of the nineteenth century Numbers and maps enabled activists to see nationality in local and spatially specific ways enabling them to make strategic decisions about where to best direct their resources In essence they transformed nationality into something that was actionable that ordinary people could take real actions to influence

Business Lobbying in the European Union David Coen, Alexander Katsaitis, Matia Vannoni, 2021-02-16 At a time when Europe and business stand at crossroads, this study provides a perspective into how business representation in the EU has evolved and valuable insights into how to organize lobbying strategies and influence policy making. Uniquely, the authors analyze business lobbying in Brussels by drawing on insights from political science, public management, and business studies. At the macro level, we explore over 30 years of increasing business lobbying and explore the emergence of a distinct European business-government relations style. At the meso level, we assess how the role of EU institutions, policy types, and the policy cycle shape the density and diversity of business lobbying activity. Finally, at the micro level, we seek to explore how firms organize their political affairs, functions, and mobilized strategic political responses. The study uses a variety of methods to analyze the business-government relations, drawing on unique business and policy maker surveys in depth, case studies, and elite interviews, large statistical analysis of lobbying registers to assess density and diversity across policy areas and EU institutions, and managerial career path and organizational analysis to assess corporate political capabilities. In contributing to discussions on corporate political strategy and interest groups activity, this monograph should be of interest to public policy scholars, policy makers, and businesses managers seeking to understand EU government affairs and political representation.
