Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 2 Jo Boaler, Jen Munson, Cathy Williams, 2021-12-10 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts In this volume you ll find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas in second grade through visualization play and investigation During their work with tens of thousands of teachers authors Jo Boaler Jen Munson and Cathy Williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach So the authors designed Mindset Mathematics around the principle of active student inquiry with tasks that reflect the latest brain science on learning Open creative and visual math tasks have been shown to support student learning and more importantly change their relationship with mathematics and start believing in their own potential The tasks in Mindset Mathematics reflect the lessons from brain science that There is no such thing as a math person and anyone can learn mathematics to high levels Mistakes struggle and challenge are opportunities for brain growth Speed is unimportant and even counterproductive in mathematics Mathematics is a visual and beautiful subject and our brains want to think visually about mathematics With engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards CCSS and can be used with any current curriculum

Hands Down, Speak Out Kassia Omohundro Wedekind, Christy Hermann Thompson, 2023-10-10 Math coach Kassia Omohundro Wedekind and literacy coach Christy Hermann Thompson have spent years comparing notes on how to build effective classroom communities across the content areas How they wondered can we lay the groundwork for classroom conversations that are less teacher directed and more conducive to student to student dialogue Their answers start with Hands Down Conversations an innovative discourse structure in which students ideas and voices take the lead while teachers focus on listening and facilitating In addition to classroom stories and examples Christy and Kassia provide 28 micro lessons designed to help K 5 students develop and exercise their speaking and listening muscles Inside Hands Down Speak Out you ll learn how to Build talk communities that are accessible to everyone especially those whose voices are often traditionally left out of classroom discourse Analyze classroom conversations in order to plan next steps for developing the classroom talk community Plan and facilitate three types of conversations across literacy and math Christy and Kassia believe that the development of dialogue skills is worth the investment of time not only because it has the power to deepen our understanding of literacy and

mathematics but also to deepen our understanding of ourselves our communities and the world *Teaching Math With Examples* Michael Pershan, 2021-02-23 Some teachers think that there s little to say about teaching with examples after all everyone uses them But here are just some of the questions you might have about teaching with worked examples How do we introduce an example What do we ask students to do when studying a solution Should a solution be presented all at once or revealed step by step After we study an example what comes next Does it matter if the solution is presented as if from a fictional student a real student in class or from the teacher How do we help students move from understanding someone else s ideas towards using it on their own to solve problems How do we write a solution in a clear way that students can learn from When is a good time to offer a worked example When is it better to let students try a problem Are worked examples more useful for some mathematical content than others This book will answer all of these questions In some cases research offers answers Other questions represent gaps in the research literature and the book offers solutions arrived at through experience and trial and error and the author s own process of classroom problem solving Welcome to the world of teaching with examples **Teaching Mathematical Thinking** Marian Small, 2017-03-17 This new resource by math education expert Marian Small helps schools and districts to refine their teaching of standards based mathematical practices Small devotes a chapter to each of the eight standards of practice and includes a discussion of what each standard looks like in grades K 2 3 5 and 6 8 Specific attention is given to helping students make sense of problems and persevere in solving them Standard 1 and to encouraging students to create viable mathematical arguments and to effectively and respectfully critique the reasoning of others Standard 3 The author also discusses how to formatively assess student performance for each practice standard To provide additional support to U S teachers in their instructional planning this resource includes attention to the Canadian math processes of visualization and mental math and estimation Book Features Addresses common misunderstandings and places where teachers and students struggle Provides lucid explanations of difficult concepts Presents fresh and engaging teaching examples Offers helpful troubleshooting tips Includes examples of student work PROFESSIONAL DEVELOPMENT Visit Marian Small s website onetwainfinity.ca for in person and online professional development **Good Questions** Marion Small, 2011 **Teaching Math Online** Marian Small, 2020-10-02 This book will be an invaluable aid for any teacher who is teaching K 8 math online or may be called upon to teach either wholly online or in blended classrooms with student in physical classrooms part time and learning from home part time to limit physical class sizes This new book will feature Marian s special brand of lucid explanation of difficult concepts engaging teaching examples guidance for teachers about what to expect troubleshooting tips and formative assessments This book will be a wonderful supplement to Marian s Differentiating text and a stand alone aid for new readers It can be used with any program that schools may be using This resource will show how materials teachers already have might be appropriately adapted to help enrich mathematics instruction in the virtual environment It shows how teachers can have students use their home

environment and materials as the basis for engaging open questions and tasks It shows teachers how to build and maintain community with students online explores the logistics of independent meetings with students and parents and setting up office hours for individual help It provides samples and directions for duplicating or creating tools like number lines and manipulatives at home It provides exemplar videos available either on the TCP website or a YouTube channel that teachers can use or recreate for communicating with parents about goals methods and materials or to provide students spoken instruction that they can save and replay

instruction that they can save and replay *Aulus Gellius and Roman Reading Culture* Joseph A. Howley, 2018-04-12 Long a source for quotations fragments and factoids the *Noctes Atticae* of Aulus Gellius offers hundreds of brief but vivid glimpses of Roman intellectual life In this book Joseph Howley demonstrates how the work may be read as a literary text in its own right and discusses the rich evidence it provides for the ancient history of reading thought and intellectual culture He argues that Gellius is in close conversation with predecessors both Greek and Latin such as Plutarch and Pliny the Elder and also offers new ways of making sense of the text s miscellaneous qualities like its disorder and its table of contents Dealing with topics ranging from the framing of literary quotations to the treatment of contemporary celebrities who appear in its pages this book offers a new way to learn from the *Noctes* about the world of Roman reading and thought Son of Sherwood Carrie Drury, 2014-01-05 It was a time of uncertainty and darkness Feudal England was caught between bloody crusades and corrupt nobility No one could predict that an outlaw would be the one to bring a spark of hope to the people of a small region in England He wished neither fame nor wealth like some outlaws but his deeds of courage and chivalry would become known throughout the world as would his name Nobility called him a wolf s head Serfs called him a hero Historians called him a myth Legend would know him as Robin Hood **Problem Posing** Stephen I. Brown, Marion I. Walter, 2014-01-14 As a result of the editors collaborative teaching at Harvard in the late 1960s they produced a ground breaking work *The Art Of Problem Posing* which related problem posing strategies to the already popular activity of problem solving It took the concept of problem posing and created strategies for engaging in that activity as a central theme in mathematics education Based in part upon that work and also upon a number of articles by its authors other members of the mathematics education community began to apply and expand upon their ideas This collection of thirty readings is a testimony to the power of the ideas that originally appeared In addition to reproducing relevant materials the editors of this book of readings have included a considerable amount of interpretive text which places the articles in the context of problem solving While the preponderance of essays focus upon mathematics and mathematics education some of them point to the relevance of problem posing to other fields such as biology or psychology In the interpretive text that accompanies each chapter they indicate how ideas expressed for one audience may be revisited or transformed in order to ready them for a variety of audiences
