International Conference on Computer Applications 2012 :: Volume 05 Kokula Krishna Hari K, Green Technology: An Innovative Solution for Environmental Sustainability Prof. (Dr.) Sanjay Kumar Samantarai, Prof. (Dr.) Biswajit Rath, Prof. (Dr.) Jogeswari Rout, Dr. Smaranika Das, Dr. Diptikanta Acharya, Shantanu kumar Sahu, 2025-06-04 The escalating threat of global warming and environmental degradation has become a defining challenge of our time As the world grapples with climate change there is an urgent need to adopt innovative strategies that integrate sustainability with technological advancement This book Green Technology An Innovative Solution for Environmental Sustainability is a comprehensive endeavor to explore and address these pressing issues through focused modules practical insights and policy based solutions Module I introduces readers to the foundations of global warming its physical definition causes and alarming consequences It

further explores the new carbon problem its accumulation longevity and global heating potential A special focus is laid on India s emission status and responses through international agreements like the Kyoto Protocol and national initiatives such as the National Action Plan on Climate Change NAPCC The module also lays out adaptive and mitigative strategies for ensuring the safety and resilience of local communities Module II emphasizes the opportunities and procedures for controlling carbon emissions and accumulation It sheds light on India s unique position to blend traditional and green power sources for optimal environmental benefit The section further outlines business and policy frameworks payment mechanisms and promotional tools necessary to encourage carbon conscious practices The module concludes with a detailed overview of existing and emerging green energy technologies cost comparisons and the urgent need for R D in the sector Module III transitions the discussion to real world applications of green technologies at personal local and citywide levels From green buildings and energy codes to transportation ports industries and village development this module illustrates how sustainable innovations can transform urban and rural India It also underscores the importance of integrating green infrastructure into town planning and municipal services along with the role of public awareness and stakeholder participation Module IV explores high tech solutions aimed at achieving significant carbon reduction This includes advanced tools like satellite based solar systems carbon capture and storage CCS and the use of microorganisms A concise SWOT analysis highlights the strengths and limitations of such technologies The module concludes with a recommended action plan based on India s climate missions global case studies and tailored adaptive measures to safeguard vulnerable populations and ecosystems This book is intended for students researchers policymakers environmental professionals and anyone passionate about creating a sustainable future It aims to inform inspire and guide action by providing practical knowledge rooted in science policy and real world success stories We sincerely hope this work contributes meaningfully to the global discourse on climate action and green technology and serves as a catalyst for change at all levels of society *The Frugal Librarian* Carol

Smallwood,2011-01-13 This collection speaks to universal concerns presenting creative and resourceful solutions from dozens of librarians representing a wide variety of institutions [A Textbook on Fundamentals of Renewable Energy and Green Technology](#) Dr. D Sendil Kumar,Dr. Meena Agrawal,Mr. Srinivas Kasulla,Dr. Anil Kumar,2024-05-15 A Textbook on Fundamentals of Renewable Energy and Green Technology is a comprehensive guide that delves into the core principles and practices shaping the burgeoning field of renewable energy and green technology Authored by leading experts in the field this book serves as an indispensable resource for students researchers and professionals seeking a thorough understanding of sustainable energy solutions The textbook begins by elucidating the fundamental concepts underlying renewable energy providing readers with a solid grounding in topics such as solar wind hydro geothermal and biomass energy systems Through clear explanations and illustrative examples readers gain insight into the technological advancements driving the adoption of these renewable sources worldwide Furthermore the book explores the interdisciplinary nature of green technology

examining its intersection with fields such as environmental science engineering economics and policy Readers are equipped with the knowledge needed to evaluate the environmental and socio economic impacts of renewable energy deployment as well as the tools to design and implement sustainable solutions tailored to specific contexts Rich in both theoretical insights and practical applications A Textbook on Fundamentals of Renewable Energy and Green Technology equips readers with the analytical skills and critical thinking abilities necessary to address the complex challenges facing the energy sector in the 21st century Whether used as a classroom resource or a reference guide in professional settings this book empowers individuals to contribute meaningfully to the global transition towards a greener and more sustainable future

Demystifying Emerging Trends in Green Technology Pankaj Kumar Mishra,Satya Prakash Yadav,2025-02-18 Demystifying Emerging Trends in Green Technology explores the transformative intersection of computational intelligence disruptive technologies and green innovations This volume offers insights into diverse fields such as blockchain IoT artificial intelligence machine learning and sustainable development Each chapter presents cutting edge research and practical solutions addressing environmental sustainability energy efficiency and eco friendly technologies With contributions from leading researchers this book discusses advancements like blockchain based security green marketing smart waste management sustainable agriculture and innovative healthcare solutions It emphasizes the role of interdisciplinary approaches in driving a greener and smarter future Key Features Integration of AI IoT and blockchain in sustainable systems Applications in healthcare agriculture energy and environmental science Practical and innovative solutions for real world challenges Insights into future trends in green technology and disruptive innovation *Sustainable Development and Planning VI* C. A. Brebbia,2013-05-01 This book contains the proceedings of the sixth conferences on the topic of sustainable regional development organized by the Wessex Institute of Technology First held in 2003 the conference facilitates communication between all scientists specialising in the wide range of subjects included within sustainable development and planning These include planners environmentalists architects engineers policy makers and economists who all must work together in order to ensure that planning leads to sustainable development that meets present needs without compromising our future The papers included in the book cover Regional planning City planning Sustainability and the built environment Cultural heritage Environmental management Resources management Social and political issues Rural developments Sustainable solutions in developing countries Transportation Energy resources Environmental economics **Corporate Environmental Management Information Systems: Advancements and Trends** Teuteberg, Frank,Marx Gomez, Jorge,2010-06-30 This book summarizes the state of the art in the emergent field of Corporate Environmental Management Information Systems showing researchers managers engineers and information technology specialists how to develop and implement effective CEMIS Provided by publisher *Software Engineering and Advanced Applications* Davide Taibi,Darja Smite,2025-09-09 This three volume set constitutes the refereed proceedings of the 51st Euromicro Conference on Software

Engineering and Advanced Applications SEAA 2025 held in Salerno Italy during September 10-12, 2025. The 62 full papers were carefully reviewed and selected from 177 submissions. These papers were organized in the following topical sections: Part I: Data and AI Driven Engineering, Cyber Physical Systems, Model Driven Engineering and Modeling Languages; Part II: Practical Aspects of Software Engineering, Systematic Literature Reviews and Mapping Studies in Software Engineering; Part III: Software Management, Measurement, Peopleware and Innovation, Software Process and Product Improvement, Software Analytics, Mining Software, Open Datasets and Repositories, Emerging Computing Technologies. Innovative Economic, Social, and Environmental Practices for Progressing Future Sustainability Go, Chai Lee, 2022-05-13. The Sustainable Development Goals are a collection of 17 interlinked global goals designed to be a blueprint to achieve a better and more sustainable future for all. Sustainable development is a long-term solution to how we plan our indefinite progress in the future, and the concept covers a broad scope of environmental, social, and economic developments. Sustainable development is the ideal vision of the future and requires further study and consideration. Innovative Economic, Social, and Environmental Practices for Progressing Future Sustainability explores the current practices in economic, social, and environmental sustainable development. Covering topics such as digital economies, community development, and equality, this reference work is ideal for academicians, researchers, practitioners, policymakers, government officials, decision makers, instructors, and students. Green Technology and Smart Materials for Engineering Applications Jashanpreet Singh, Hitesh Vasudev, Ankit Sharma, Murali Mohan Cheepu, 2025-08-08. Sustainability and technological advancements are rapidly gaining traction on a global scale and are becoming increasingly prominent across a wide range of industries, as evidenced by current market trends. Companies are making significant investments in the research and development of smart materials that can adapt to their surroundings in real time, thereby improving their performance and productivity. The heightened interest in environmentally friendly and intelligent materials can be attributed to the recent surge in research conferences and patent applications in this field, highlighting the need for a comprehensive resource that can provide a thorough explanation of these developments. Green Technology and Smart Materials for Engineering Applications provides a thorough examination of smart materials, including their unique properties and applications in sustainable construction. It explores the versatile uses of green materials in different industries, emphasizing sustainable manufacturing practices and resource-efficient materials. The integration of eco-design and innovation is looked at for the creation of sustainable materials, highlighting the importance of green and smart materials in optimizing energy consumption. Additionally, the book offers insights into reuse and recycling techniques that promote circular economy principles and sustainable business models related to green and smart materials. Real-world examples and success stories are used to illustrate the environmental and economic impacts of implementing smart and green materials in various industries. This book is intended to serve as a comprehensive reference guide for academics, researchers, scholars, and professionals working in the fields of manufacturing, processing, material science, and

environmental engineering The primary objective of this book is to showcase sustainability by emphasizing the diverse array of green and smart materials utilized in various engineering applications Through this publication readers will gain valuable insights into the importance of incorporating environmentally friendly materials into their work ultimately contributing to a more sustainable future *Technological Innovation and AI for Sustainable Development in Events and Festivals* Anukrati Sharma,Jeetesh Kumar,Shruti Arora,2025-05-30 From sustainable event planning to the influence of VR AI and mobile applications on tourist behaviour this book explores the dynamic landscape where innovation meets tradition It studies the intersection of green technologies sustainable infrastructure and the delicate balance between cutting edge tools and the intrinsic emotional aspects of human engagement Aligned with the United Nations 17 Sustainable Development Goals the book highlights AI s potential to drive meaningful contributions to a sustainable future It anticipates the imminent transformation of festivals and events through technological innovation and AI implementation It will allow the reader to gain insights into how automation streamlines logistics optimizes marketing efforts and enhances the overall attendee experience

Proceedings of the NDIEAS-2024 International Symposium on New Dimensions and Ideas in Environmental Anthropology-2024 (NDIEAS 2024) Tulishree Pradhan,Amareswar Galla,Maria Stoicheva,Amitabh Pandey,2024-06-12 This is an open access book NDIEAS 2024 Discussions on environmental challenges frequently center around human dependence susceptibility and resilience Yet the subject matter of the present anthropological discussion regarding the ecological framework would mainly concentrate on spatial advertising and scientific investigation In this symposium the focus will be expanded to include human anthropology as a fundamental element of the political notion of environmental sustainability and the foundation for effective local national and global actions Humanity s survival entirely depends on the environment However we further rely on sociopolitical and legal frameworks which are open to capture misdirection confusion With this viewpoint in mind the panel discussion will look at how neoliberalism both international and national legal and political frameworks and other factors have influenced how we perceive the world around us It is going to capitalize on environmental anthropology s observations as well as additional crucial elements to evaluate the spread of sustainable solutions to environmental issues and look at the ways in which forces like globalization and technological advancement might give people a false sense of invulnerability While significant the assumptions of mitigation as well as adaptation require as well to be looked into The expansion of industries greater manufacturing and consumerism are goals of globalization and another neoliberal socio economic reconfiguration which has a tendency to encourage human abuse of the environment and reduce our ability to respond to issues related to the environment International Conference on Smart Environment and Green Technologies - ICSEGT2024 Fahreddin Sadikoglu Mammadov,Rafik A. Aliev,Janusz Kacprzyk,Witold Pedrycz,2025-01-04 This book compiles state of the art studies and real world applications in ecosystems and smart environments It covers important subjects like creating a sustainable economy green and renewable energy and IoT powered industrial and agricultural

systems Along with providing insights into theory modelling and the deployment of smart cities and infrastructure the book also examines the use of AI in the earth and environmental sciences and economy The book is intended to be a priceless tool for scholars professionals and recent graduates It acts as a manual and source of inspiration for promoting environmentally friendly technologies and sustainable solutions It opens the door for creating intelligent systems that maximise resource use reduce carbon footprints and enhance general quality of life by incorporating the most recent technological developments

AI and Green Technology Applications in Society Kumar, Rajeev, Abdul Hamid, Abu Bakar, Binti Ya'akub, Noor Inayah, Nyamasvisva, Tadiwa Elisha, Tiwari, Rajesh Kumar, 2024-11-29 Artificial intelligence AI and green technology are increasingly intertwined playing a critical role in driving sustainable solutions across various sectors of society AI powered systems optimize energy consumption by predicting demand and enhancing the efficiency of renewable energy sources like solar and wind power In agriculture AI enables precision farming reducing waste and conserving resources by analyzing soil conditions weather patterns and crop health Additionally AI contributes to the development of smart cities where it helps reduce carbon emissions through traffic optimization energy efficient buildings and sustainable waste management Combined with green technologies AI accelerates innovation fostering a more sustainable and eco conscious society *AI and Green Technology Applications in Society* explores the intersection of AI and sustainable technologies detailing how AI is driving innovation in environmental conservation and energy efficiency It further delves into ethical implications challenges and the future potential of integrating AI with green technologies to promote a sustainable and eco friendly future Covering topics such as climate change precision agriculture and smart cities this book is an excellent resource for AI researchers policymakers sustainability professionals academicians graduate and postgraduate students and more [Kurukshetra May 2024 \(English\)](#) Publications Division, A monthly published in Hindi and English The journal is devoted to all aspects of rural reconstruction and village democracy The journal carries educative and informative articles on rural development and is useful for scholars academicians and students preparing for civil services and other competitive examinations **The**

Human Security Paradigm: Challenges & Opportunities Dr. Priti Chahal ,Dr. Meenakshi Mawi ,Dr. Megha Kumari ,2024-12-20 In an era marked by unprecedented global challenges the concept of human security has emerged as a significant framework for rethinking traditional approaches to security Historically security was almost exclusively understood in terms of state sovereignty military capacity and territorial protection However as the world has become more interconnected with transnational threats becoming more complex there has been a growing recognition of the need to move beyond the state centric militarized definition of security The human security paradigm offers an alternative one that emphasizes the security of individuals and communities rather than just that of states This shift reflects the reality that the threats faced by people today are multidimensional and transcend national borders From poverty inequality and environmental degradation to terrorism pandemics and cyber threats the sources of insecurity are increasingly non military

in nature demanding a more comprehensive and people centric approach Foresight for Dynamic Organisations in Unstable Environments Sandro Mendonça, Bartolomeo Sapio, 2013-12-16 Foresight has an especially important role in times of transition and trouble In times of turbulence foresight arises as a tool for intellectual freedom and enhanced strategic leverage But foresight itself is always in a continuing process of innovation as it is not detached from the changing environment that engulfs organisations Taking stock from innovative developments in foresight methodologies and implementation experiences is relevant as new experiments have rapidly accumulated in this new century Looking ahead calls for a review of new perspectives and recent practice on foresight methodology and on how foresight is embedded in organisations This book brings together a sample of real world cases and of conceptual proposals bridging between practitioners and researchers in the field of futures research Such an ambition is an increasingly difficult balancing act as the gap between the needs of organisational leaders and the incentives of academics becomes an ever widening gulf due to increasingly specialised and self absorbed agendas To further this book s goals we had the opportunity to assemble an international team of authors coming from a variety of backgrounds to provide their first hand view from the frontier of new foresight empirical work and theoretical reflection This book was originally published as a special issue of Technology Analysis and Strategic Management
