Guide to Making Smarter More Persuasive Data Visualizations shows how a good visualization can communicate the nature and potential impact of information and ideas more powerfully than any other form of communication. For a long time, data viz was left to specialists: data scientists and professional designers. No longer. A new generation of tools and massive amounts of available data make it easy for anyone to create visualizations that communicate ideas far more effectively than generic spreadsheet charts ever could. What's more, building good charts is quickly becoming a need-to-have skill for managers. If you're not doing it, other managers are, and they're getting noticed for it and getting credit for contributing to your company's success. In *Good Charts*, data viz maven Scott Berinato provides an essential guide to how visualization works and how to use this new language to impress and persuade. Data viz today is where spreadsheets and word processors were in the early 1980s, on the cusp of changing how we work. Berinato lays out a system for thinking visually and building better charts through a process of talking, sketching, and prototyping. This book is much more than a set of static rules for making visualizations. It taps into both well-established and cutting-edge research in visual perception and neuroscience, as well as the emerging field of visualization science, to explore why good charts and bad ones create feelings behind our eyes. Along the way, Berinato also includes many engaging vignettes of data viz pros illustrating the ideas in practice. *Good Charts* will help you turn plain, uninspiring charts that merely present information into smart, effective visualizations that powerfully convey ideas. HBR Guide to Persuasive Presentations will teach you how to take the pain out of presentations. Terrified of speaking in front of a group? Or simply looking to polish your skills? No matter where you are on the spectrum, this guide will give you the confidence and the tools you need to get results. Written by presentation expert Nancy Duarte, the HBR Guide to Persuasive Presentations will help you:

1. Win over tough crowds
2. Organize a coherent narrative
3. Create powerful messages and visuals
4. Connect with and engage your audience
5. Show people why your ideas matter to them
6. Strike the right tone in any situation

[Good Charts, Updated and Expanded](#) Scott Berinato, 2023-08-29. The ultimate guide to data visualization and information design for business. Making good charts is a must-have skill for managers today. The vast amount of data that drives business isn't useful if you can't communicate the valuable ideas contained in that data: the threats, the opportunities, the hidden trends, the future possibilities. But many think that data visualization is too difficult a specialist skill that's either the province of data scientists and complex software packages or the domain of professional designers and their visual creativity. Not so. Anyone can learn to produce quality data viz and more broadly, clear and effective information design. *Good Charts* will show you how to do it. In this updated and expanded edition, data viz expert Scott Berinato provides all you need for turning those ordinary charts kicked out of a spreadsheet program into extraordinary visuals that captivate and persuade your audience and for transforming presentations that seem like a mishmash of charts and bullet points into clear, effective, persuasive storytelling experiences. *Good Charts* shows how anyone who invests a little time getting better at visual communication can create an outsized impact both in their career and in their organization. You will learn a framework

for getting to better charts in just a few minutes Design techniques that immediately make your visuals clearer and more persuasive The building blocks of storytelling with your data How to build teams to bring visual communication skills into your organization and culture This new edition of Good Charts not only provides new visuals and updated concepts but adds an entirely new chapter on building teams around the visualization part of a data science operation and creating workflows to integrate visualization into everything you do Graphics that merely present information won't cut it anymore Make Good Charts your go to resource for turning plain uninspiring charts and presentations into smart effective visualizations and stories that powerfully convey ideas
