Greek Sculpture And The Problem Of Description:

Greek Sculpture and the Problem of Description A. A. Donohue, 2005-06-08 This book examines how interpretation and examination of Greek sculpture are intertwined **Proceedings, American Philosophical Society (vol. 149, no. 1, 2005) , The Representation of Space in Graeco-Roman Art** Michael Koortbojian, 2023-11-06 This book assesses the role of relief in the representation of space in Graeco Roman artistic practice and its study from Winckelmann to the mid twentieth century when Classical art developed as a theoretical discipline The role of relief in the history of ancient sculpture has long been acknowledged yet the problems posed by an engagement with the representation of space have not been a subject of specific and sustained inquiry Neither a conventional history nor a comprehensive historiography this book traces the study of relief of its formal character its artistic purpose its aesthetic significance and its historical treatment The contribution to scholarship is three fold 1 By means of a wide array of examples the book demonstrates that the visual strategies employed to represent space during the Graeco Roman period were a continuously evolving repertory tied to the refinement of techniques and the transformation of styles that those techniques brought into being 2 It examines ideas now commonplace based on scholarship now long neglected if not completely forgotten And 3 it reveals how competing interpretations of the representation of space in relief elaborated new approaches to the monuments and their representations Beauty and the Gods Hugo Shakeshaft, 2025-03-25 A history of the origins of the classical ideal of beauty in archaic Greece To look like a Greek god is proverbial for beauty today just as it was for Homer nearly three thousand years ago In this book Hugo Shakeshaft tells the untold story of beauty's inextricable link with the divine in this formative era of ancient Greek history c 750 480 BCE Through in depth analysis of a wide array of ancient sources the book offers a panoramic view of the Archaic Greek world in arguing that ideas of beauty were fundamental to how Greeks thought about and worshipped their gods Surveying everything from Homeric epic lyric poetry and votive inscriptions to vase paintings sculpture and the architecture of Greek temples Shakeshaft reveals how ideas and experiences of beauty structured human relations with the divine in Archaic Greece Comparisons are made throughout the book with the literature art and architecture of the diverse cultures of the ancient Near East to clarify its insights into Archaic Greece These comparisons highlight that the association of beauty and the divine has been at the heart of many societies throughout human history despite its oversight in the lively debate about beauty in academia and the art world in the twenty first century With a novel contribution to this debate and the history of aesthetics the book uncovers an aspect of ancient Greek history with an enduring legacy showing how we still live with the cultural dialogue which originated in this period Arts of Allusion Margaret S. Graves, 2018-07-31 Through close studies of ceramics metalwares and other plastic arts from the ninth to the thirteenth centuries Arts of Allusion reveals the object as a crucial site where pre modern craftsmen of the eastern Mediterranean and Persianate realms engaged in fertile dialogue with poetry literature painting and most strikingly

architecture **Creating a Hellenistic World** Andrew Erskine, Lloyd Llewellyn-Jones, 2010-12-31 Alexander's conquest of the Persian empire had far reaching impact in space and time. Much of the territory that he seized would remain under the control of Macedonian kings until the arrival of the Romans. But Macedonian power also brought with it Greeks and Greek culture. In this book leading scholars in the field explore the creation of this Hellenistic world, its cultural, political and economic transformations, and how far these were a consequence of Alexander's conquests. New kingdoms were established, new cities such as Alexandria and Antioch were founded, art and literature discovered fresh patrons. Egyptians and Iranians had to come to terms with Graeco-Macedonian rulers and settlers, while Greeks and Macedonians learned the ways of more ancient cultures. The essays presented here offer an exciting interdisciplinary approach to the study of this emerging Hellenistic world, its newness but also its oldness, both real and imagined. Maternal Conceptions in Classical Literature and Philosophy Alison Sharrock, Alison Keith, 2020-02-28 This book explores motherhood in Greek and Roman literature, focusing on images of mothers and their relationships with their children across a variety of genres. **Greco-Scythian Art and the Birth of Eurasia** Caspar Meyer, 2013-11 Drawing on evidence from archaeology, art history and textual sources to contextualize Greco-Scythian metalwork in ancient society, Meyer offers unique introductions to the archaeology of Scythia and its ties to Asia and classical Greece, modern museum and visual culture studies and the intellectual history of classics in Russia and the West. **Displaying the Ideals of Antiquity** Johannes Siapkis, Lena Sjögren, 2013-08-29 Displaying the Ideals of Antiquity investigates the study and display of ancient sculpture from archaeological, art historical and museum studies perspectives. Ancient sculptures not only give us knowledge about ancient Greek and Roman pasts but they also mediate ideals that inform modern perceptions of antiquity. This book analyzes how an art historical tradition establishes and preserves an idealized view of antiquity in classical archaeology and in museum exhibitions. The authors investigate how these ideals are kept alive today, an approach that often is neglected in studies on ancient reception. This book offers an international scope and illustrates how academic conceptual foundations influence museum exhibitions. This timely volume discusses contemporary museum exhibitions of ancient sculpture and clarifies how old discourses continue to affect museum exhibitions and conceptualizations of ancient sculptures. The authors analyze close to 100 museums around the world and demonstrate the ways in which ancient sculptures are mediated across Europe and the West. **Ornament and Figure in Graeco-Roman Art** Nikolaus Dietrich, Michael Squire, 2018-03-19 How does decoration work? What are the relations between figurative and ornamental modes? And how do such modern western distinctions relate to other critical traditions? While these questions have been much debated among art historians, our book offers an ancient visual cultural perspective. On the one hand we argue Greek and Roman materials have proved instrumental in shaping modern assumptions. On the other hand those ideologies are fundamentally removed from ancient ideas; an ancient perspective can therefore shed light on larger aesthetic debates about what images are or indeed what they should be. This anthology of specially commissioned essays

explores a variety of case studies both literary and art historical alike it discusses materials from across the ancient Mediterranean and from Geometric art all the way through to late antiquity the book also tackles questions of figure and ornament in relation to different media including painting free standing statues relief sculpture mosaics and architecture A particular feature of the volume lies in bringing together different national academic traditions building a bridge between formalist approaches and broader cultural historical perspectives

Paul and Image Philip Erwin, 2020-09-29 In *Paul and Image* Philip Erwin challenges conventional interpretations of 1 Corinthians that tend to overlook the significance of ancient Roman visual culture in framing and posing exegetical questions He argues that in 1 Corinthians Paul engaged in a long standing philosophical discussion of visual representation with consequential implications for how he and his Corinthian addressees interacted with the imagery around them By situating Paul's letter in the context of the critical discourse on visual representation from Plato to Philo to the Second Sophistic Erwin redefines Paul's critique of human wisdom treatment of idols and resurrection discourse in visual terms

Egyptianizing Figurines from Delos Caitlín Barrett, 2011-09-20 This book investigates Hellenistic popular religion through an interdisciplinary study of terracotta figurines of Egyptian deities mostly from domestic contexts from the trading port of Delos A comparison of the figurines iconography to parallels in Egyptian religious texts temple reliefs and ritual objects suggests that many figurines depict deities or rituals associated with Egyptian festivals An analysis of the objects clay fabrics and manufacturing techniques indicates that most were made on Delos Additionally archival research on unpublished notes from early excavations reveals new data on many figurines archaeological contexts illuminating their roles in both domestic and temple cults The results offer a new perspective on Hellenistic reinterpretations of Egyptian religion as well as the relationship between popular and official cults

American Journal of Archaeology, 1904 **A History of Sculpture** George Henry Chase, Chandler Rathfon Post, 1924 **Flesh and the Ideal** Alex Potts, 2000-01-01

Winckelmann's writing has a richness and density that take it well beyond the bounds of the simple rationalist art history and Neo-classical art theory with which it is usually associated. He often seems to speak disturbingly directly to our present awareness of the discomfiting ideological and psychic contradictions inherent in supposedly ideal symbolic forms.
