Fiction Novels Fatma Gamze Erkan, 2024-01-03 This book explores the relationship between humanity and nature while challenging the notion that anthropocentric behaviour causes the environmental catastrophes depicted in the four selected British eco science fiction novels These novels are John Christopher s *The Death of Grass* 1956 J G Ballard s *The Drought* 1965 Brian Aldiss s *Earthworks* 1965 and John Brunner s *The Sheep Look Up* 1972 all of which fictionalise the fact that the consequences of environmental problems can be diverse but equally serious This book examines how even the smallest damage caused by human beings to the environment negatively affects them other living beings and the ecosystem they need to live and flourish In conjunction with these the factors and conditions that push characters in the novels to ignore and harm the environment are also scrutinised While examining how and why the environmental problems in the novels have arisen it is evaluated whether the authors propose solutions to these problems and if so what they are *Sport and Monstrosity in Science Fiction* Derek J. Thiess, 2019-04-30 This book pits the imaginative sports of science fiction against our widespread suspicion of the monstrous athletic body The biopolitical nature of sport demands we see these bodies as our bodies capable of the greatest physical feats science fiction can imagine but also our worst fears of injury and death *Storytelling for Sustainability in Higher Education* Petra Molthan-Hill, Heather Luna, Tony Wall, Helen Puntha, Denise Baden, 2020-03-25 To be a storyteller is an incredible position from which to influence hearts and minds and each one of us has the capacity to utilise storytelling for a sustainable future This book offers unique and powerful insights into how stories and storytelling can be utilised within higher education to support sustainability literacy Stories can shape our perspective of the world around us and how we interact with it and this is where storytelling becomes a useful tool for facilitating understanding of sustainability concepts which tend to be complex and multifaceted The craft of storytelling is as old as time and has influenced human experience throughout the ages The conscious use of storytelling in higher education is likewise not new although less prevalent in certain academic disciplines what this book offers is the opportunity to delve into the concept of storytelling as

an educational tool regardless of and beyond the boundaries of subject area Written by academics and storytellers the book is based on the authors own experiences of using stories within teaching from a story of the Ecology of Law to the exploration of sustainability in accounting and finance via contemporary cinema Practical advice in each chapter ensures that ideas may be put into practice with ease In addition to examples from the classroom the book also explores wider uses of storytelling for communication and sense making and ways of assessing student storytelling work It also offers fascinating research insights for example in addressing the question of whether positive utopian stories relating to climate change will have a stronger impact on changing the behaviour of readers than will dystopian stories Everyone working as an educator should find some inspiration here for their own practice on using storytelling and stories to co design positive futures together with our students

Questioning the Eco-Ethics of Future Colonialism and Terraforming of Mars Seher Özsert, 2025-07-07 This book explores the causes of the existing crises in both human and non human worlds and searches for convenient solutions to these catastrophes The book with reference to ecocriticism and Kim Stanley Robinson's Mars trilogy argues that escape from the apocalyptic future foreseen on Earth through the terraformation of another planet represents the future of colonization and we are therefore doomed to another apocalypse on another planet Foregrounding the distinctive tenets of the eco ethical questioning of colonizing and terraforming Mars through the multiple perspectives in the trilogy the book reveals that economic and political systems are identified as controlling forces in the relationship between culture and nature Therefore the book implies that the capitalist system is the root of catastrophes conceived as superannuated and can only be saved through ecologically conscious human beings The book additionally explores the issues of postcolonial scapegoating of the Other for existing problems and discusses inhuman solutions such as neo Malthusian logic Finally the book highlights the crucial human responsibility for the future of all living things

Timelines of American Literature Cody Marrs, Christopher Hager, 2019-01-29 A collection of engaging essays that seeks to uniquely reperiodize American literature It is all but inevitable for literary history to be divided into periods Early American antebellum modern post 1945 such designations organize our knowledge of the past and shape the ways we discuss that past today These periods tend to align with the watershed moments in American history even as the field has shifted its perspective away from the nation state It is high time we rethink these defining periods of American literary history as the drawing of literary timelines is a necessary even illuminating practice In these short spirited and imaginative essays 23 leading Americanists gamely fashion new unorthodox literary periods from 600 B C E to the present from the Age of Van Buren to the Age of Microeconomics They bring to light literary and cultural histories that have been obscured by traditional timelines and raise provocative questions What is our definition of modernism if we imagine it stretching from 1865 to 1965 instead of 1890 to 1945 How does the captivity narrative change when we consider it as a contemporary not just a colonial genre What does the course of American literature look like set against the backdrop of federal denials of Native sovereignty or housing policies

that exacerbated segregation Filled with challenges to scholars inspirations for teachers anchored by an appendix of syllabi and entry points for students Timelines of American Literature gathers some of the most exciting new work in the field to showcase the revelatory potential of fresh thinking about how we organize the literary past **Queer Lasting** Sarah Ensor,2025-02-04 Queer Lasting asks what contemporary environmentalism s seemingly necessary emphasis on the future has rendered unthinkable and looks to the literatures from two periods of queer extinction the 1890s and the 1980s for grammars of care continuance and collective action that emerge only at the last Edinburgh Companion to the Short Story in English Paul Delaney,2018-11-27 This collection explores the history and development of the anglophone short story since the beginning of the nineteenth century **British Modernism and the Anthropocene** David Shackleton,2023 British Modernism and the Anthropocene Experiments with Time assesses the environmental politics of modernism in relation to the idea of the Anthropocene a proposed geological epoch in which humans have fundamentally changed the Earth System The early twentieth century was marked by environmental transformations that were so complex and happened on such great scales that they defied representation Modernist novelists responded with a range of innovative narrative forms that started to make environmental crisis on a planetary scale visible Paradoxically however it is their failures to represent such a crisis that achieve the greatest success David Shackleton explores how British modernists employed types of narrative breakdown including fragmentation and faltering passages devoid of events to expose the limitations of human schemes of meaning negotiate the relationship between different scales and types of time produce knowledge of ecological risk and register various forms of non human agency Situating modernism in the context of fossil fuel energy systems plantation monocultures climate change and species extinctions Shackleton traces how H G Wells D H Lawrence Olive Moore Virginia Woolf and Jean Rhys undertook experiments with time in their novels that refigure history and the historical situations into which they were thrown Ultimately British Modernism and the Anthropocene shows how modernist novels provide rich resources for rethinking the current environmental crisis and cultivating new structures of environmental care and concern **Wild Blue Media** Melody Jue,2020-02-28 In Wild Blue Media Melody Jue destabilizes terrestrial based ways of knowing and reorients our perception of the world by considering the ocean itself as a media environment a place where the weight and opacity of seawater transforms how information is created stored transmitted and perceived By recentering media theory on and under the sea Jue calls attention to the differences between perceptual environments and how we think within and through them as embodied observers In doing so she provides media studies with alternatives to familiar theoretical frameworks thereby challenging scholars to navigate unfamiliar oceanic conditions of orientation materiality and saturation Jue not only examines media about the ocean science fiction narratives documentary films ocean data visualizations animal communication methods and underwater art but reexamines media through the ocean submerging media theory underwater to estrange it from terrestrial habits of perception while reframing our understanding of mediation objectivity and metaphor **Readings in**
