The tongue and eye.

Gizmo Warm-up

Stimuli are changes inside or outside the body that cause a response. In the Senses Gizmo, you will explore how different sense organs detect stimuli from the environment and send messages about that stimulus to the brain.

On the NEURAL PATHWAYS tab, drag the apple slice into the white **Stimulus** box. Drag the eye into the **Sense organ** box. Click **Play** (▶).

1. What do you observe?

I observe that the eye light receptors are activated by incoming light.

2. How do you know that the eye senses the apple?

I know the eye senses it because the light receptor is transferring from the eye to the brain.

3. The **neural pathway** represents the **nerves** that connect the sense organ to the brain. What happens along the neural pathway when the eye sees the apple?

The neural pathway changes color and has light receptors which transfer to the visual cortex which allows the eye to see.
