*Judicial Sales of Ships* Lief Bleyen, 2015-12-16 This work focuses on a specific aspect of the enforcement of maritime claims namely judicial sales of ships a procedure creditors typically resort to in the event of an irreversible default situation A substantial part of the book approaches the topic from a comparative perspective the goal being to assess the similarities and differences of the judicial sale procedure between three specific jurisdictions Belgium the Netherlands and England Wales In this study the comparison is used to further analyse the impacts of these differences on the effectiveness and reliability of the judicial sale procedure in each jurisdiction and also forms the basis for assessing the feasibility of harmonising judicial sale procedures and fostering their acceptance Considering the international character typical of judicial sales of ships conflict of law questions are very likely to arise during these procedures Accordingly the comparative study where appropriate is viewed against a private international law background

International Maritime Law and Practice Časlav Pejović, 2025-04-23 This book provides a different perspective on the ever popular topic of maritime law, emphasising historical and comparative aspects. It provides the reader with a broader view of how maritime law has developed throughout history and operates within various legal systems. Each chapter starts with historical development, meticulously explaining the development of various maritime law concepts to enable a higher level of understanding in the contemporary context. The text adopts a comprehensive comparative approach that has two segments. One segment is related to the coverage of several major maritime jurisdictions. Focusing mainly on English law, it also provides selected legislation and essential case law information from several other jurisdictions: US, France, Germany, Italy, Japan, China, etc., many of which are not easily accessible in English. The other relates to the comparison between common law and civil law on a general level. This book will be of significant interest to lawyers working in shipping companies, law firms specializing in shipping, international organizations related to shipping and maritime law, and international traders. It also provides invaluable aid to shipmasters and ship officers, empowering them with the knowledge to effectively deal with various maritime law issues in their professional activities. The book's content will be of direct relevance to maritime law scholars and students, enhancing their understanding of this complex field.

*Maritime Cross-Border Insolvency under the UNCITRAL Model Law Regime* Jingchen Xu, 2020-12-10 This book covers the pressing issues of cross-border cases involving admiralty and bankruptcy law. For example, what should happen when a shipowner files an insolvency proceeding in one country while at the same time facing an in rem action against its vessel in another country? Should the in rem action arising in one country be stayed or dismissed because of the existence of insolvency proceedings in another country? The book discusses the relevant issues regarding the treatment of maritime creditors throughout insolvency proceedings, the determination of the centre of main interest of an offshore shipping company, and the scope of a debtor's assets. The author uses a comparative law analysis, selecting four leading shipping countries: Australia, the UK, the US, and Singapore, and examines their approaches to the above three problems when applying the UNCITRAL Model Law regime. The book also proposes a solution to help eliminate the ambiguity arising from maritime cross-border insolvency cases under the UNCITRAL Model Law regime, with a view to enhancing the development of the shipping industry.
