## **Juggling Food And Feelings:**

**Juggling Food and Feelings** Mary Elizabeth Gatta, 2002-01-01 In *Juggling Food and Feelings* Mary Gatta applies social and structuration theory to the workplace as she analyzes the emotional challenges faced by restaurant workers. Gatta utilizes extensive participatory observation of and interviews with restaurant managers and servers to explore how workers deal with emotional experience in the workplace. Positing that we ordinarily maintain an emotional balance, Gatta theorizes that our ability to cope with emotional disturbances in the workplace depends on situated rebalancing scripts used to control feelings. Contributing to the sociology of gender, social psychology, and labor theory, this study of occupations expertly reveals the complex typology of emotion management.

**Handbook of the Sociology of Emotions** Jan Stets, Jonathan H. Turner, 2007-02-25 For almost thirty years sociologists have increasingly theorized about and conducted research on human emotions. Surprisingly, it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry. What makes this late date surprising is that it is now obvious that human behavior, interaction, and organization are driven by emotions. It was an immense oversight for emotions to be de-emphasized in sociological theorizing and research for most of its 175-year history. Since the 1970s, however, the study of emotions has accelerated and is now at the forefront of sociological analysis. This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions. Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions. The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs. The first section of the book addresses the range of emotions and how they can be classified, the neurological underpinnings of emotions, and the effect of gender on emotions. The second section reviews the prominent sociological theories of emotions, including theories emphasizing power and status, rituals, identity, and self-psychoanalytic dynamics, exchange, expectation, states, and evolution. While there is little integration among these theories, this state of affairs will not last forever. The third section addresses theory and research on specific emotions such as love, jealousy, and envy, empathy, sympathy, anger, grief, and the moral emotions. While this list does not exhaust the range of human feeling, they are central emotions that drive human behavior, interaction, and social organization. The last section explores how the study of emotions has added new insight into other subfields within sociology, such as the study of the workplace, health, and social movements. These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology. Although no book can completely cover a field, even a relatively new one like the sociology of emotions, this *Handbook of the Sociology of Emotions* comes close to being comprehensive. The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years.

**Skill Formation in Asia** John Benson, Howard Gospel, Ying Zhu, 2013-05-29 Asia has undergone rapid transformation over the past several decades as many countries have embraced new technologies and the processes of globalisation. Over this period, the inflow of foreign capital into the region, the level of trade amongst these countries and trade with other parts of the world has increased substantially. The ensuing economic growth has led to some significant changes in labour markets and the demand for skilled employees and their deployment within organisations. Focusing on a number of developed and developing Asian economies, this book explores the dynamics of workforce development and skill formation and considers questions of both skills shortages and skills gaps. The book assesses the current state of training in the selected Asian economies, the weaknesses and strengths of their various training approaches and what the present state of training means for the future economic development of these economies.

**Gender and Leadership in Unions** Gill Kirton, Geraldine Healy, 2013-01-25 Reflecting the increased attention to gender and women in the field of employment relations, there is now a growing international literature on women and trade unions. The interest in women as trade unionists arises partly from the fact that women comprise 40 percent of trade union membership in the USA and over 50 percent in the UK. Further, despite considerable overall union membership decline in both the UK and USA, more women than men are joining unions in both countries. Recognition of the importance of women to the survival and revival of trade union movements has in many cases produced an unprecedented commitment to equality and inclusion at the highest level. Yet the challenge is to ensure that this commitment is translated to action and improves the experience of women in their union and in their workplace. *Gender and Leadership in Trade Unions* explores and evaluates the similarities and differences in equality strategies pursued by unions in the US and the UK. It assesses the conditions experienced by women union members and how these impact on their leadership, both potential and actual. Women have made gains in both countries within union leadership and decision-making structures; however, climbing the ladder to leadership positions remains far from a smooth process. In the trade union context, women face multiple barriers that resonate with the barriers facing aspiring women leaders in other organizational contexts, including the gendered division of domestic work, the organization and nature of women's work, the organization and nature of trade union work, and the masculine culture of trade unions. The discussion of women trade union leaders is situated more broadly within debates on governance, leadership and democracy within social justice activism.

**Emerging Intersections** Bonnie Thornton Dill, Ruth Enid Zambrana, 2009-01-01 The United States is known as a melting pot, yet this mix tends to be volatile and contributes to a long history of oppression, racism and bigotry. *Emerging Intersections*, an anthology of ten previously unpublished essays, looks at the problems of inequality and oppression from new angles and promotes intersectionality as an interpretive tool that can be utilized to better understand the ways in which race, class, gender, ethnicity and other dimensions of difference shape our lives today. The book showcases innovative contributions that expand our understanding of how inequality affects people of color, demonstrates the ways public policies reinforce existing systems

of inequality and shows how research and teaching using an intersectional perspective compels scholars to become agents of change within institutions By offering practical applications for using intersectional knowledge *Emerging Intersections* will help bring us one step closer to achieving positive institutional change and social justice      **Research on Future Skill**

**Demands** National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, 2008-02-29 Over the past five years business and education groups have issued a series of reports indicating that the skill demands of work are rising due to rapid technological change and increasing global competition Researchers have begun to study changing workplace skill demands Some economists have found that technological change is skill biased increasing demand for highly skilled workers and contributing to the growing gap in wages between college educated workers and those with less education However other studies of workplace skill demands have reached different conclusions These differences result partly from differences in disciplinary perspective research methods and datasets The findings of all of these strands of research on changing skill demands are limited by available methods and data sources Because case study research focuses on individual work sites or occupations its results may not be representative of larger industry or national trends At a more basic level there is some disagreement in the literature about how to define skill In part because of such disagreements researchers have used a variety of measures of skill making it difficult to compare findings from different studies or to accumulate knowledge of skill trends over time In the context of this increasing discussion the National Research Council held a workshop to explore the available research evidence related to two important guiding questions What are the strengths and weaknesses of different research methods and data sources for providing insights about current and future changes in skill demands What support does the available evidence given the strengths and weaknesses of the methods and data sources provide for the proposition that the skills required for the 21st century workplace will be meaningfully different from earlier eras and will require corresponding changes in educational preparation      *Qualitative Research and the Modern Library* Valeda Dent Goodman, 2011-07-30 *Qualitative Research and the Modern Library* examines the present day role and provides suggestions for areas that might be suited to this type of research for the purposes of evaluation The author discusses how the results from such research might be applied and the overall impact of using this type of research to inform development of a more user centred organisation The book provides a thoughtful look at the implications of using qualitative research to inform decision making processes within libraries and is written by an author and library researcher with international experience in various types of libraries implementing improving programs and services and supporting user needs Fills a gap in the current literature that hasn't been found in journal articles written on this topic Contains practical applications of qualitative research principles with practical examples of select projects Written by an author and library researcher with international experience in various types of libraries including work with large scale qualitative studies research design and evaluation of library services
