Saxton, 2021-02-12 The Devil s Fruit uses anthropology s tool kit to examine farmworkers embodiment of toxic pesticides and social and workplace relationships in California s agricultural industry Rather than stopping at description and critique Saxton explores how activist ethnographic methods and ethics align conflict and support ongoing struggles for farmworker health and environmental justice Vermin, Victims and Disease Angela Cassidy, 2019-09-25 This open access book provides the first critical history of the controversy over whether to cull

wild badgers to control the spread of bovine tuberculosis bTB in British cattle This question has plagued several professional generations of politicians policymakers experts and campaigners since the early 1970s Questions of what is known who knows who cares who to trust and what to do about this complex problem have been the source of scientific policy and increasingly vociferous public debate ever since This book integrates contemporary history science and technology studies human animal relations and policy research to conduct a cross cutting analysis It explores the worldviews of those involved with animal health disease ecology and badger protection between the 1970s and 1990s before reintegrating them to investigate the recent public polarisation of the controversy Finally it asks how we might move beyond the current impasse

China's Global Quest for Resources Fengshi Wu,Hongzhou Zhang,2016-11-18 The world s key resources of energy food and water which are closely connected and interdependent on each other are coming under increasing pressure as a result of increasing population development and climate change In the case of China following its recent economic surge energy food and water are already nearing the point of shortage This book considers how China is working to avoid shortages of energy food and water and the effect this is having internationally Subjects covered include domestic policy debates on China s resource strategies challenges for managing transboundary waters related to China responses from various regions and countries to China s Go Out strategy and China s increasing energy links with Russia and declining agricultural trade with the United States The book concludes by discussing in comparative perspective China s outward resource acquisition activities and the consequent policy implications

The Case for Pandora James M. Essig,Steve McCarter,2017-01-12 This book is about building craft for space travel space travel not in the far distant future but in the immediate future There is no question that we have the technology to build and power a large craft capable of traversing the galaxy and for now this book will focus on achieving the goal of intragalactic travel We will describe various methods of power generation and propulsion delineate the materials and technology for construction discuss the building of the spacecraft from the outside in and show what is required to sustain life on the craft for extended periods of time While we will go into some detail on each of these pointing out advantages and disadvantages to components and methods this is not nor is it intended to be a highly technical book to be used by specialists Rather it is intended to inform the general readership about what is possible and perhaps what is not in building and operating spacecraft for long distance and long duration travel with current and available means

Global Agriculture and the American Farmer Kimberly Ann Elliott,2017-06-27 The United States is one of the world s largest producers and exporters of a range of agricultural commodities and the largest provider of foreign assistance so U S policies have big effects on global food security and other global public goods linked to agriculture On the positive side of the ledger President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty which are mostly rural But that generosity is undercut by U S support for farmers that distorts global markets and ignores negative spillovers for the rest of the world In

this book Elliott focuses on three policy areas that are particularly damaging for developing countries traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere the biofuels mandate which in its current form increases market volatility while doing little if anything to mitigate climate change and weak regulation of antibiotic use in livestock which contributes to the global spread of drug resistant super bugs While noting that broad reforms are needed to fix these problems Elliott also identifies practical steps that U S policymakers could take in the relatively short run to improve farm policies for American taxpayers and consumers as well as for the poor and vulnerable in developing countries

Environmental Water Markets and Regulation Katherine Owens,2016-11-18 River systems around the world are degraded and are being used unsustainably Meeting this challenge requires the development of flexible regimes that have the potential to meet essential consumptive needs while restoring environmental flows This book focuses on how water trading frameworks can be repurposed for environmental water recovery and aims to conceptualise the most appropriate role for law in supporting recovery through these frameworks The author presents a comprehensive study of the legal frameworks in four jurisdictions the States of Oregon and Colorado in the western United States the province of Alberta in Canada and the Murray Darling Basin in Australia Basin State of New South Wales A close comparative analysis of these four jurisdictions reveals a variety of distinctive regulatory arrangements and collaborations between public and private actors In all cases the law has been deployed to steer and coordinate these water governance activities The book argues that each regime is based on a particular regulatory strategy with different conceptions of the appropriate roles for and relationships between various actors and institutions Legal frameworks do not have the capacity to rationalise and provide an overarching and absolute solution to the complex environmental and governance issues that arise in the context of environmental water transactions Rather the role of law in this context needs to be reconceptualised within the paradigm of regulatory capitalism as establishing and maintaining the limits within which regulatory participants can operate innovate and collaborate

The BRICS Studies Xu Xiujun,2020-05-14 Given their immense potential for development and representation of a new international political and economic order the BRICS countries have become a strong nascent force on the global stage However as overall economic growth continues to slow down and the geopolitical situation becomes more complex the BRICS countries are facing a series of new challenges that require further development in the way they cooperate with one another This volume offers a panoramic view of cooperation between the BRICS countries in the light of these new challenges The editors reveal that policy coordination has been strengthened bringing into play complementary advantages as viable ways for promoting robust sustainable and balanced growth in the world economy They argue that the experience gained and lessons learned in the development of and cooperation between the BRICS countries has offered a positive role model for cooperation between other countries as well as providing valuable lessons for research in international politics Students and scholars in international relations and politics will benefit from this volume

Biosafety of Genetically Modified Organisms 3 Karen Hokanson, Andrew F. Roberts, Joerg Romeis, Joe Smith, Alan Raybould, 2021-10-14 **Rewriting Nature** Paul Enríquez, 2021-06-24 Rewriting Nature is a cogent riveting interdisciplinary exploration of the law science and policy of emerging genome editing technology **Treaties in Force**, 2014 Cobbett's Parliamentary Debates Great Britain. Parliament, 1879 **The Soils of the Philippines** Rodelio B. Carating, Raymundo G. Galanta, Clarita D. Bacatio, 2014-04-23 The first soil survey in the Philippines was done by Mr Clarence Dorsey an American soil scientist in the province of Batangas in 1903 The Soils of the Philippines however is the first comprehensive summary of more than a century of soil survey work in this country It integrates the soil concepts of the reconnaissance soil survey results which commenced as early as 1934 and continued until the mid 1960s with the semi detailed soil surveys that continue to this day The result is the first ever genetic key for classifying Philippine soils at soil series level thus making it possible for any newcomers to the soil survey field to confidently produce their own soil map at a more detailed map scale to suit the project requirements This book brings together discussions on soils and soil mapping units and up to date international techniques and technologies It makes soils relevant to current political realities and national issues As soil survey moves from a reductionist agricultural development planning tool to a more holistic and integrated approach to enable us to understand our dynamic and complex environment The Soils of the Philippines will be the only source of authoritative and updated data on soil resources for macro level resource management planning for decades to come With a vanishing breed of experienced soil surveyors not only in the Philippines but also worldwide it may remain the only book on Philippine soils for the next hundred years or more Since soils follow a geological and not a human time frame the contents of this volume will stay relevant for soil surveyors even in a fast changing world As the country leaps from an agricultural economy towards modernization and a more diversified economic base some of the soil series in the Philippines for example the Guadalupe series underlying the skyscrapers of Makati City are becoming extinct as a result of urban development Therefore this book serves as the repository for the soils that we possess the soils that have been lost through decades of urbanization while at the same time it creates a soil classification system for the soils we are yet to discover **Treaties in Force** United States Department of State - Office of the Legal Adviser, 2014-04-08 Treaties in Force is prepared by the Department of State for the purpose of providing information on treaties and other international agreements to which the United States has become a party and which are carried on the records of the Department of State as being in force as of its stated publication date January 1 2013 With respect to treaties and agreements in force as of January 1 2013 information regarding status is up to date as of the date indicated as authoritative The term treaty as a matter of U S constitutional law denotes international agreements made by the President with the advice and consent of the Senate in accordance with Article II section 2 of the Constitution of the United States In addition to such treaties this publication covers international agreements in force that have been concluded by the Executive a pursuant to or in

accordance with existing legislation or a prior treaty b subject to congressional approval or implementation and or c under and in accordance with the President s constitutional powers Treaties in Force is arranged in two sections Section 1 includes bilateral treaties and other international agreements listed by country or other international entity with subject headings under each entry Arrangements with territorial possessions of a country appear at the end of the entry for that country In some cases treaties and international agreements applicable to a territory prior to its independence are included in the entry for that country on the basis of its assumption of treaty obligations upon becoming independent as noted at the beginning of the entry for that country For convenience some treaties and agreements concluded with countries whose name or statehood status has changed continue to be listed under the name in use at the time the agreement was concluded if the title of the treaty or agreement has not been formally amended Section 2 lists multilateral treaties and other international agreements to which the United States is a party arranged by subject The depositary is the authoritative source for a current list of parties and information on other matters concerning the status of the agreement and status information often changes Information is provided on the depositary for the agreement in question and contact information including an Internet site is provided for the depositary where available

Phosphorus Pollution Control Aleksandra Drizo, 2019-10-16 Phosphorus Pollution Control Policies and Strategies Deterioration and decline of water resources due to pollution caused by humans and their activities has become a universal health environmental social and economic problem Excess discharges of nutrients in particular phosphorus has been recognized as the most prevalent water pollution problem globally Moreover its perpetual occurrence and expansion creates imminent threats to water and food security Despite extensive research during the past five decades many key questions in eutrophication science remain unanswered This book summarizes the most recent policies and strategies for phosphorus removal and recovery from municipal residential and agricultural wastewater effluents and runoff into a concise and up to date volume The book will be of interest to environmental and water resources scientists and engineers consultants policy makers and practitioners working in the field

Risk Regulation in the Internal Market Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social

sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity
