Justice Community And Dialogue In International Relations Cambridge Studies In International Relations:

Justice, Community and Dialogue in International Relations Richard Shapcott, 2001-11-08 Shapcott investigates the question of justice in a culturally diverse world asking if it is possible to conceive of a universal or cosmopolitan community in which justice to difference is achieved Justice to difference is possible according to Shapcott by recognising the particular manner in which different humans identify themselves Such recognition is most successfully accomplished through acts of communication and in particular conversation The accounts of understanding developed by H G Gadamer provide a valuable way forward in this field The philosophical hermeneutic account of conversation allows for the development of a level of cosmopolitan solidarity that is both thin and universal and which helps to provide a more just resolution of the tension between the values of community and difference Students and scholars of international relations international ethics and philosophy will be interested in this original study The Oxford Handbook of International Relations Christian Reus-Smit, Duncan Snidal, 2010-07-01 The Oxford Handbook of International Relations offers the most authoritative and comprehensive overview to date of the field of international relations Arguably the most impressive collection of international relations scholars ever brought together within one volume the Handbook debates the nature of the field itself critically engages with the major theories surveys a wide spectrum of methods addresses the relationship between scholarship and policy making and examines the field's relation with cognate disciplines The Handbook takes as its central themes the interaction between empirical and normative inquiry that permeates all theorizing in the field and the way in which contending approaches have shaped one another In doing so the Handbook provides an authoritative and critical introduction to the subject and establishes a sense of the field as a dynamic realm of argument and inquiry The Oxford Handbook of International Relations will be essential reading for all of those interested in the advanced study of global politics and international affairs Constructivism in International Relations Maja Zehfuss, 2002-07-25 Maja Zehfuss book offers a fundamental critique of constructivism focusing on the work of Wendt Onuf and Kratochwil Using Germany's shift towards participation in international military operations as an illustration she demonstrates why each version of constructivism fails in its own project and comes apart on the basis of its own assumptions Inspired by Derridean thought this book highlights the political consequences of constructivist representations of reality Each critique concludes that constructivist notions of key concepts are impossible and that this is not merely a question of theoretical inconsistency but of politics The book is premised on the notion that the empirical and the theoretical are less separate than is acknowledged in international relations and must be read as intertwined Zehfuss examines the scholars role in international relations worrying that by looking to constructivism as the future they will be severely curtailing their ability to act responsibly in this area *Private Power and Global Authority* A. Claire Cutler, 2003-08-14 Transnational merchant law which is mistakenly regarded in purely technical and apolitical terms is a central mediator of domestic and global political legal orders By engaging with literature

in international law international relations and international political economy this book develops the conceptual and theoretical foundations for analyzing the political significance of international economic law In doing so it illustrates the private nature of the interests that this evolving legal order has served over time The book makes a sustained and comprehensive analysis of transnational merchant law and offers a radical critique of global capitalism

How the Weak Win Wars Ivan Arreguín-Toft, 2005-12-08 How do the weak win wars The likelihood of victory and defeat in asymmetric conflicts depends on the interaction of the strategies weak and strong actors use Using statistical and in depth historical analyses of conflicts spanning two hundred years in this 2005 book Ivan Arreguín-Toft shows that independent of regime type and weapons technology the interaction of similar strategic approaches favors strong actors while opposite strategic approaches favors the weak This approach to understanding asymmetric conflicts allows us to make sense of how the United States was able to win its war in Afghanistan 2002 in a few months while the Soviet Union lost after a decade of brutal war 1979-89 Arreguín-Toft's strategic interaction theory has implications not only for international relations theory but for policy makers grappling with interstate and civil wars as well as terrorism

A Poststructuralist Discourse Theory of Global Politics Dirk Nabers, 2015-10-07 This book develops a discourse theory of crisis and change in global politics Crisis is conceptualized as structural dislocation resting on difference and incompleteness Change is seen as the continuous but ultimately futile effort to gain a full identity The incompleteness and contingent character of the social represents the most important condition for democratic politics to become possible and for a theory of crisis and change to become conceivable In this new understanding crisis loses its everyday meaning of a periodically occurring event Instead crisis becomes an omnipresent feature of the social fabric It represents the absence of ground of social foundation and it rests within the subject as well as within the social whole

Security, the Environment and Emancipation Matt McDonald, 2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to

the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

Shaping Peace in Kosovo Gëzim Visoka, 2017-04-05 This book explores the prospects and limits of international intervention in building peace and creating a new state in an ethnically divided society and fragmented international order The book offers a critical account of the international missions in Kosovo and traces the effectiveness of fluid forms of interventionism It also explores the co-optation of peace by ethno nationalist groups and explores how their contradictory perception of peace produced an

ungovernable peace which has been manifested with intractable ethnic antagonisms state capture and ignorance of the root causes drivers and consequences of the conflict Under these conditions prospects for emancipatory peace have not come from external actors ethno nationalist elite and critical resistance movements but from local and everyday acts of peace formation and agnostic forms for reconciliation The book proposes an emancipatory agenda for peace in Kosovo embedded on post ethnic politics and joint commitments to peace a comprehensive agenda for reconciliation people centred security and peace enabling external assistance

Diplomatic Interventions K. Fierke, 2005-04-22 Diplomatic Interventions argues that war is a social construction In so doing it unsettles the definition of intervention as a coercive interference by one state in the affairs of another to examine the range of communicative or diplomatic practices which through their presence modify the experience of war The tension between claims that war is pervasive and that war is a social construct is analysed in relation to a range of moral legal military economic cultural and therapeutic interventions The concluding chapter highlights how the book itself is a critical intervention that requires us look at again from a new angle at international practice

Islam and International Relations Faiz

Sheikh, 2016-07-11 International Relations tends to rely on concepts that developed on the European continent obscuring the fact that its history is far less international than one might expect But in today's global world who does this ignore and marginalize And what impact does that have on the discipline's potential to assess world politics This book explores an Islamic approach to the international showing that Islam can contribute keen insights into how we do IR and how we might change that practice to be more inclusive while also highlighting the limits of an Islamic International Relations Exploring conceptualizations of community and difference in Islamic traditions the book relates these notions to concepts that are considered universal in IR such as state based politics and the necessity for secularism In this way the book shows how the study of political Islam might help to interrogate and redefine key concepts within international politics In a world of continuing polarization between Islam and the West this book offers IR a chance to engage in a constructive dialogue with Islamic traditions in order to better understand global politics

The Ethics of Territorial Borders J. Williams, 2006-04-12 The Ethics of Territorial Borders develops a distinctive line of argument drawing on political theory and geography as well as international relations Unusually this book argues for the ethical significance of borders themselves pointing to their role in human diversity and the enduring appeal of territorial division

Critical Approaches to International Security Karin M. Fierke, 2015-03-06 During the Cold War the concept of international security was understood in military terms as the threat or use of force by states The end of East West hostilities however brought critical perspectives to the fore as scholars sought to explain the emergence of new challenges to international stability such as environmental degradation immigration and terrorism The second edition of this popular and highly respected text offers a wide ranging and comprehensive analysis of the growing field of critical security studies All the chapters have been fully revised and updated to map the on going evolution of debates about international security since 1989 including the more recent shift in emphasis from critiques of the realist practices of states to those of global liberal governance Topics covered include the relationship between security and change identity the production of danger fear and trauma human insecurity and emancipation The book explores the meaning and use of these concepts and their relevance to real life situations ranging from the War on Terror to the Arab Spring migration suffering in war failed states and state building and the changing landscape of the international system with the emergence of a multipolar world and the escalation of global climate change Written with verve and clarity and incorporating new seminar activities and questions for class discussion this book will be an invaluable resource for students of international relations and security studies

Terrorism, Talking and Transformation Harmonie Toros, 2012-02-27 Using rare field research this book investigates whether and how talking may transform terrorist violence Given the failings of today's dominant counterterrorism strategy is talking a viable policy option to transform conflicts marked by terrorist violence This book examines the reasons why negotiating with terrorists is so often shunned by decision makers and scholars as a policy response concluding that such objections are primarily based on a realist and statist understanding of terrorism

that has dominated the field so far Based on interviews with top rebel and military commanders in the southern Philippine region of Mindanao and interviewing key actors in Northern Ireland Terrorism Talking and Transformation investigates how talking may contribute to the transformation of conflicts marked by terrorist violence The result of this analysis is a theoretically grounded empirically recognizable and emancipation oriented framework that can be used to investigate the potential of talking in transforming not only terrorist and counterterrorist violence but also the underlying structural violence that often surrounds it This book will be of much interest to students in the fields of terrorism studies security studies Southeast Asian studies conflict resolution transformation and IR in general and of use to practitioners in the field
