Julius Shulman Palm Springs:

Julius Shulman, 2008-02-12 Through Julius Shulman's lens the architecture of Southern California became iconic images of modernism. His photographs heralded the glamor and casual elegance of a lifestyle and architecture that has become revered worldwide. Focusing on the desert paradise of Palm Springs which was his seminal crucible, this book presents his masterpieces. Images range from Richard Neutra's Kaufmann House and Albert Frey's Raymond Loewy House to Paul R Williams' house for Lucille Ball and Desi Arnaz, Frank Sinatra's house, John Lautner's house for Bob Hope as well as other famous landmarks. The book features more than sixty buildings by fifteen of the most notable mid twentieth century architects. With new photography and images culled from his personal collection as well as the Getty Center, this book includes many images never before seen. *Julius Shulman Color (Luxury Edition - Night)* David Wills, 2024-02-15 **Palm Springs Modern** Adèle Cygelman, 1999 Examines the impact architects and designers have had on Palm Springs L.A. Obscura Julius Shulman, 1998 **Julius Shulman Los Angeles** Sam Lubell, Douglas Woods, 2016-02-16 A compilation of Julius Shulman's extraordinary images of his adopted city ranging from residential commercial shops factories and street life of Los Angeles a true portrait of a modern metropolis. The book will show the photographs chronologically from 1934 when Shulman shot Richard Neutra's Sten House on spec to 1972 when Los Angeles comes into its own as a world metropolis. About 250 images of various aspects of the city life are represented from residential to commercial shops offices churches schools and street life. A Constructed View Joseph Rosa, Esther McCoy, 1994 Julius Shulman one of the great masters of modern architectural photography is the preeminent recorder of early California modernism. By 1927 when he was sixteen Shulman was already using the family Brownie box camera to document his Southern California surroundings and experiences. In 1936 his professional career was launched when he sent Richard Neutra some uncommissioned photographs of the architect's Kun House. Shulman went on to document the famous Case Study House Program architects included Charles and Ray Eames Pierre Koenig and Eero Saarinen and also the architecture of the 1930s through the 1980s especially that of Southern California but also country and worldwide. His subjects included the buildings of R M Schindler John Lautner Raphael Soriano Frank Lloyd Wright Mies van der Rohe and Oscar Niemeyer among many others. Through his work Shulman defined the image of Los Angeles and framed the architecture of the time for a global audience. In addition to an overview of Shulman's career and photographic oeuvre this book emphasizes Shulman's method of constructing photographic views. These constructions which complemented his innate ability to compose striking photographs often transcend reality to capture the spirit time and place of a work of architecture. An analysis of architecture's visual presentation examines not only the media of the era John Entenza's Arts and Architecture for instance but also the work of Shulman's photographic contemporaries. Master of the Midcentury Catherine Cody, Jo Lauria, Don Choi, 2021-09-14 Master of the Midcentury The Architecture of William F Cody is the first long overdue book on this key Palm Springs architect abundantly illustrated and

Midnight Modern Tom Blachford, 2017-02-14 Midnight Modern brings into focus a view of Palm Springs and its internationally renowned modernist houses never before shown shot entirely by the light of the full moon Created over the course of three years by Australian photographer Tom Blachford the surreal images function as portals in time with the homes cars and beautiful scenery appearing almost exactly as it all did 60 years ago The crisp moonlight adds a new dimension to the famous mecca of desert modernism and shows a contrasting side of a town famous for its sunshine cocktails and hedonism Working closely with the Palm Springs community Blachford gained remarkable access to some of the most coveted architectural jewels in the area including the Kaufmann Desert House Edris House Frey House II Frank Sinatra Twin Palms Estate and dozens of restored Alexander tract homes in the valley Blachford s work builds on the famous documentary and lifestyle approaches of Julius Shulman and Slim Aarons but injects a signature mystery His cinematic aesthetic acts as a stage for an untold narrative inviting the viewer to script their own drama going on behind the walls of these historic homes This original lush work is a rich contribution to the record for those midcentury architecture and design lovers fascinated by Palm Springs

The Palm Springs School: Desert Modernism 1934-1975 Alan Hess, 2025-02-11 Palm Springs is at the center of a unique tradition in architecture marked by invention and a sensitivity to local conditions that has resulted in design that exerts an influence far greater than the town s small size The book is the first to fully explore the wide ranging forms this architecture has taken from houses to gas stations hotels to airports banks to restaurants and spas Much more than a resort destination Palm Springs has served as a laboratory of the Modern here so much architectural innovation and

design took form From the steel and glass boxes of Richard Neutra to the earthy organic homes of John Lautner and everything in between the solutions of architects and designers including notably William F Cody E Stewart Williams and Albert Frey were diverse and are ever more relevant in the face of contemporary challenges Their answers addressed questions that still hold urgency How to design sustainably in harsh climates How to use technology efficiently and creatively to meet those challenges How to build affordable and high quality mass produced housing How to reflect a region s culture economy and distinctive atmosphere Architects here responded to nature s climatological demands and Palm Springs became a center for innovations that were rooted in practice more than theory Benefitting from the architectural freedoms offered by the remoteness of the California desert designers explored new approaches that we can now identify as central to the Palm Springs School shown here in rich archival and contemporary photography SHAG: PALM SPRINGS David Wills,1921-04-15

Havenhand,2019-01-24 *Mid Century Modern Interiors* explores the history of interior design during arguably its most iconic and influential period The 1930s to the 1960s in the United States was a key moment for interior design It not only saw the emergence of some of interior design s most globally important designers it also saw the field of interior design emerge at last as a profession in its own right Through a series of detailed case studies this book introduces the key practitioners of the

period world renowned designers including Ray and Charles Eames Richard Neutra and George Nelson and examines how they developed new approaches by applying systematic and rational principles to the creation of interior spaces It takes us into the mind of the designer to show how they each used interior design to express their varied theoretical interests and reveals how the principles they developed have become embodied in the way interior design is practiced today This focus on unearthing the underlying ideas and concepts behind their designs rather than on the finished results creates a richer more conceptual understanding of this pivotal period in modernist design history With an extended introduction setting the case studies within the broader context of twentieth century design and architectural history this book provides both an introduction and an in depth analysis for students and scholars of interior design architecture and design history

Nothing Permanent Todd Cronan, 2023-06-20 A critical look at the competing motivations behind one of modern architecture's most widely known and misunderstood movements Although mid century modern has evolved into a highly popular and ubiquitous architectural style this term obscures the varied perspectives and approaches of its original practitioners In **Nothing Permanent** Todd Cronan

displaces generalizations with a nuanced intellectual history of architectural innovation in California between 1920 and 1970 uncovering the conflicting intentions that would go on to reshape the future of American domestic life Focusing on four primary figures R M Schindler Richard Neutra and Charles and Ray Eames Nothing Permanent demonstrates how this prolific era of modern architecture in California rather than constituting a homogenous movement was propelled by disparate approaches and aims Exemplified by the twin pillars of Schindler and Neutra and their respective ideological factions these two groups of architects represent opposing poles of architectural intentionality embodying divergent views about the dynamic between interior and exterior the idea of permanence and the extent to which architects could exercise control over the inhabitants of their structures Looking past California modernism's surface level idealization in present day style guides home decor publications films and television shows Nothing Permanent details the intellectual aesthetic and practical debates that lie at the roots of this complex architectural moment Extracting this period from its diffusion into visual culture Cronan argues that mid century architecture in California raised questions about the meaning of architecture and design that remain urgent today
